FAMILION PROFILES

(By John Aker) — E.C.C. (cricket commentator) — ON A WINTER PLACE

There is a lot of talk about the winter season in cricket. The weather is a crucial factor in determining the outcome of matches, and players must adapt to the conditions. This is particularly true in winter, when the ball tends to swing more and the pitch is often slower.

Americans lay down 5 main driving points

BECAUSE American golfers lay down 5 main driving points in their quest for the Ryder Cup, it is not surprising that they have some special secret tactics in their bag. More than half of the points are in the area of the green and the hole. The American team is known for its precision and accuracy, and these points are a key to their success.

South African maize growers may 'go slow'

MAIZE growers in South Africa are expected to be slow to accept the new maize variety, 'Golden Wonder', which is being introduced by the Government.

The Government has been promoting the variety since 1947, but it has not been widely accepted by the growers.

The reason for this is that the variety is not as hardy as the old varieties, and it is not as resistant to drought.

The Government is now trying to persuade the growers to accept the variety, but they are not doing very well.
