BROAD BASE TERRACING Failures and the Causes

DURING the past two years, officers of the Soil Conservation Service have had the opportunity of inspecting terraced fields and constructed by farmers in many parts of the country.

Maintenance is largely a matter of correct planning and the use of appropriate cultural methods in the field. These matters will be dealt with in later articles.

LAYOUT OF SCHEME

Terraces have often been made to drain off the maximum of 1,500 ft. in the gradient to be drained in one direction, sometimes terracing draining up to 4,000 ft. in the same direction.

SPACING

The spacing of terraces is often for two wide. Standard spacing is 10 ft. based on the assumption that the maximum quantity of water likely to run off any area will be expressed roughly by the formula: Q=CIA.

GRAZING

Bringing down and back to top of almost invariably results in the soil being left to be eroded. It is often found that the failure to remove high places in the terraces is one of the main causes of failure to bring them down to the level of the rest of the terrace.

SOLA FARMERS' MEETING

MOMENTOUS questions were discussed at a well attended meeting of the Solar Association held in Mr. Banks' house on February 3, and matters of urgent importance were raised, affecting the Colony as a whole and the farming community in particular.

Artificial Insemination

The Hon. Director of Veterinary Services, Mr. Dunbar, with the Hon. Director of Agriculture, Mr. Blund, the Agricultural Research Officer, Mr. C. J. G. Smith, Mr. J. D. Anderson, and Captain Gwynn were present.

ADVANTAGES

It is pointed out that the general impression to the cattle with the use of artificial insemination is the progress of high milk yields, and the fact that the cow is able to give the full milk production of the cow.

OVERCOMING STERILITY

Mr. Nicholson wondered if the Government would grant a subsidy for the sale of a kit, to enable the farmer to overcome sterility in his herd.

DISTRICT FARMING NOTES

NORTH KENYA... ended with a complete failure of the short rains over most of the district.

During the past month, the maize ration position has once more been a matter of some concern, both here and in the Nanyuki district.

PIG FEEDING

POTATOES seldom figure in the main diets of visitors tied down to regular rations, but in certain districts, they are rarely available in sufficient quantities.

"Our baby was DEATH'S DOOR"
Mrs. D. Coleman of Johannesburg writes—
"We tried all food, but nothing would suit the little man. At last I tried NUTRINE. The doctor said that it was a real little John Bull and a month—all thanks to NUTRINE."
NUTRINE. It enriches. For the past 10 years I have recommended NUTRINE. It makes babies perfectly formed bodies, gives powerlessness to colds and children ailments. It ensures balanced growth and lifelong health. Ask your doctor for it.

NUTRINE
—NEXT BEST TO MOTHER'S MILK
Feed Baby yourself if you can, but if your Milk is deficient, turn to NUTRINE.

The authorities must have the information they are seeking the individual to provide. It is a duty of every citizen to help the authorities in this way by completing the registration forms without delay when they are issued and to cooperate fully. Particularly it is their honest duty to fill them in honestly, because if they are caught trying to get more food than they are entitled to, they will have to return to the position under the scheme we hope the law will have no mercy on them. It is a duty to complete the forms very much alive to the position, and to return them as soon as possible.

Additional steps to save food have been announced. The Government has decided to give out of granulated maize flour a National Day ration to be abandoned. It is hoped that, as it was never popular before, it will be more popular now. It is to be used for the purpose of releasing the maximum quantity of wheat flour for the Middle East—was issued enough. But everybody will hope that there will be no return to the mixture. Bread rationing, say by means of a smaller loaf, will be put in force. It is hoped that this will be made in such a way that the price must be correspondingly reduced. If the authorities want to save food, they must be prepared to do so.

The second and overriding principle is that the rationing of food must be based on the needs of the population. The meals provided in hotels and restaurants must be reduced. This is a duty of every citizen to help the authorities in this way by completing the registration forms without delay when they are issued and to cooperate fully. Particularly it is their honest duty to fill them in honestly, because if they are caught trying to get more food than they are entitled to, they will have to return to the position under the scheme we hope the law will have no mercy on them. Sailor Charged With Manslaughter

STANDARD correspondent London, February 10.—A sailor charged with manslaughter after the death of a fellow sailor on board a ship in the Indian Ocean. The sailor, who is named as John Smith, was charged with the murder of another sailor, James Brown, on board the ship "The Victoria" while it was en route to the East Indies. The charge was brought against Smith by the British Consul in the East Indies.

The case is being heard at the Admiralty Court in London. The prosecution is led by the British Consul, and the defence is led by a local lawyer. The case is expected to last several weeks.

DEFINITE IN RUSSIA

If there was anything left of the Hitler invincibility myth, Joseph Stalin's army has finally destroyed it.

But Hitler's great armies of invasion in the Caucasus and Ukraine, compelled to retreat by the British Navy in search of the materials of modern warfare, have not retreated because of weakness of resources.

The German High Command has been out-generalled by the superior strategists in charge of the Russian plan.
