# PREPARATIONS FOR RATIONING

## What Nairobi People Must Do

**PLANS** for the registration of all rationable in the Colony are well advanced. The necessary arrangements will have to be completed by Government.

In the case of the Municipality of Nairobi, the larger and congested population, elaborate steps are being taken to have a record of the food requirements of every individual in the population in Nairobi. This will facilitate rationing. The official list drawn up will form a source of information for the Government, which will be able to determine the amount of food to be supplied to each individual. It is expected that the list will be completed by the end of the month.

It is stated that it is essential, even in a period of peace, for people to be able to produce their own food. It is expected that the list will be completed by the end of the month.

**Direction**  
Now for the particular registration list. Every Nairobi citizen must fill in a registration form, which will be sent to the Government. It is expected that the list will be completed by the end of the month.

**Seven Days**  
The period of registration has been fixed on Monday, February 22, to Sunday, February 28, 1943. It is expected that the list will be completed by the end of the month.

**Restaurants**  
The Government has decided to ration restaurants. It is expected that the list will be completed by the end of the month.

**Shops and stores**  
Shops and stores will be rationed. It is expected that the list will be completed by the end of the month.

**Must Do**  
Nairobi citizens must do the following: 1. Register themselves. 2. Keep their ration books. 3. Buy only what is on their ration books. 4. Report any illegal transactions.

# MILITARY STORES: A CHAMBER INQUIRY

Nairobi Chamber of Commerce has been informed that Military stores were being distributed in Nairobi. It is expected that the list will be completed by the end of the month.

**PUBLIC HEALTH**

To the Editor, "E.A. Standard"—Sir, I was thrilled to read the story in the Standard of the British Society of Medical Officers of Health's protest against the national medical service. It is my conviction that a scheme for the service is to say the least not incompatible with the service itself. Medical science, private medical practice and business are not mutually exclusive. While no medical man should be prevented from practicing his profession, it is his duty to the patient to do so. This affects medicine itself under the present system. It is the duty of the doctor towards his patients to be in a position to give the best of his skill and the best of his knowledge. Under the present system doctors are being driven to the private sector. Under the present system doctors are being driven to the private sector.
