Nutrine made this picture possible. Both Mrs. Hastings and her little boy owe their Glorious Health to Nutrine. READ WHAT SHE SAYS: 'As I was unable to feed baby, I wrote this attached to the post office official food. I decided on Nutrine, with vitamin added. He put on weight without any trouble and we never had a waking night with him. His brother, who is 6, was also brought up on Nutrine and is now 10 and has never had a day's illness. Incidentally, I am a Nintine baby, and I have always been marvelously healthy. My mother tells me that before being put on Nutrine she had no weight without any trouble and I was so weak. There can be no doubt that Nutrine made this picture possible.'

Next Best to Mother's Milk. Feed baby yourself if you can, but if your milk is deficient, turn to NUTRINE with confidence. Obtainable throughout East Africa.

PROBLEMS OF COMMERCE
It will come as no surprise to the commercial community in East Africa to learn that the Government is constantly increasing the shortage of supplies for export goods in the United Kingdom and the United States. The conditions in the Empire are becoming progressively stricter. The Government has made a reasonable requirement in terms of imports at the time a license is issued, which may be much more difficult to meet now, or even impossible. It is therefore, every prospect that in the months ahead—and it may well be years instead of months—the stocks of everything which cannot be regarded as a substitute for essential maintenance of the life and energy of the community, will disappear from the shelves of our shops and warehouses.

Have YOU sent that cheque to the R.A.F. Beneficent Fund?
Today, for the first time in nearly a fortnight, the daily volume of donations has fallen below the level of One Thousand Pounds set by public generosity up to the present.

Mombasa Indian Committee
There is plenty of room for the African in the Empire. But the African contribution requires explanation. The East African Standard is aware that Mombasa Indians have a strong objection to District Commissioners actively 'importing their people in the Empire'.

Price Offence Caution

Joseph L. P. de Mello, a salesman of the National Pharmacy, appeared before the District Court in the Municipality of Nairobi on Monday, April 13, 1943, for the offence of selling medicine at a price in excess of the price determined by the Government. It was alleged that the defendant had sold a bottle of medicine for 5/-, an overcharge of 2/-, which price was in excess of the price determined by the Government. The defendant was fined 10/- and costs, and the order was made that the defendant should pay the amount of the fine into the Public Account of the Government.

TANGANYIKA AND UGANDA MAKE A START

The R.A.F. Benevolent Fund Appeal has finished its second in a splendid style with a total of nearly £16,000 it has today's list includes a personal donation from His Excellency Governor of Tanganyika and Lady Jackson, and it is expected to bring the coming weeks the Tanganyika subscriptions will amount up.

From Tanganyika, too, comes a very handsome donation of from a well-known Indian firm in Dar es Salaam. Uganda has contributed £21,000 from its existing War Fund, as a bying start to the people of the Province.

The East African Standard would remind all Administrative Officers in Kenya that the Government has told Administrators that (as in the case of the Balkan's Work Fund) there is no objection to District Officers actively interesting in native people in this Appeal for the Royal Air Force, in the very fact there is a welcome donation from the Masai in the Galatia district.

Whenever we announce a plan to allow the public to visit Uganda, one of Africa's latest and most modern, on Saturday afternoon, April 24.

The question again today is have YOU sent your cheque to R.A.F. Benevolent Fund? If not, you can ask your bank to do it and it is simple.

Chèques should be made payable to R.A.F. BENEVOLENT FUND and addressed to the following:

Royal Air Force Benevolent Fund Air Headquarters P.O. Box 4266 NAIROBI.

ATTENTION OF POTATO GROWERS

If you are going to plant potatoes for the next rain, you will wish to get your seed in the ground at just the right time, as well as at the right depth and spacing. A McCormick-Deering Potato Planter will insure this being done.

M McCormick-Deering planters deposit the seed with an accuracy that is not equalled by any other method, and certainly cannot be expected from hand labour. The difference to you, besides a crop of potatoes that is properly planted and one that is improved in every particular, is that the planter is a perfectly plain machine. Improper planting is an inexcusable waste of land, time, and seed.

We have a few planters still available. Better obtain yours before present stocks are exhausted.

Terracing: Experience In U.S.A. and Kenya

"Engineer" replied to Mr. C. H. M. Powell's article on terracing and the collection of stored lands in our issue of 10th February. Here are Mr. Mather's comments thereon.

DIPOURER's letter of 28th February suggests that the recommendations which I have made regarding terracing are of theoretical value only. Thousands of acres of maize and other crops are being planted annually in the Transvaal and United States by the methods I have advocated, following American acceptance and practice.

I am asking Mr. H. H. Powell, Director of the large Estates and Investment Ltd. group, to attempt to reply, as a practical test, to the criticisms made by Dipourer. His replies are being followed in a critical manner by the author of this article, rather than a practical experience of terracing.

Several farms in the Kikuyu District are in a very poor state of cultivation, it is true, they throw the soil down.

The following is the extract from "Planning for Terracing" (International Commission of Agricultural, Soil Conservation Service Bulletin—No. 10). It is not commonly used, it appears to have been written for the purpose of showing the benefits of terracing and does not refer to the methods of terracing.

EAST AFRICAN CROP PRODUCE

It is generally known that the staple crops in the tropical countries to import fresh lots of seed of most temperate crops every year. We are now FORCED to produce as much as possible ourselves, although presently we still manage to import quantities of the seed of the staple crops.

THE INDUSTRY GROWS IMPORTANT TO AFRICA. It started exporting seed hundreds of years ago and has now become a staple of many hundreds of thousands of people and is now being sold in the London has ever handled.

IN THE KENYA HIGHLANDS over 100,000 acres of vegetable seed is being grown each year by the Government, of Agricultural and other departments, and this seed is being sold to the public at a price which is very low.

PROBLEMS. Some plants from tropical regions will not normally produce seed in the tropics. This is owing to the fact that we do not have a winter and therefore the temperature does not fall to the point where the plants can produce seed.

BACKACHE. A symptom of sluggish kidneys. Do you wake up each day with aching back, aching limbs, muscles and joints stiff and sore. Is the urine thickened and scanty. Is the uric acid content high?

These are the common symptoms of kidney trouble. If you have any of these symptoms, you should get your kidneys cleaned out. This can be done by taking a course of treatment with Backache Tablets.

Backache Tablets are a powerful diuretic and they help to remove the uric acid from the blood. They also help to relax the muscles of the back and joints, and they help to improve the circulation of the blood.

Backache Tablets are available from all chemists and druggists. They are also available from the following agents: Messrs. J. H. & J. G. M. Ltd., Nairobi; Messrs. J. H. & J. G. M. Ltd., Mombasa; Messrs. J. H. & J. G. M. Ltd., Dar-es-Salaam.

and remain further, annual deposits of manure and other fertilizers will result in a substantial increase in the yield of the soil. It is the author's belief that the best method of soil conservation which will result in the highest yields of crops is to keep soil in the place.

and buyers will have to get together and select the best of the Kenyan Seed Trade will be chaotic. It would be to sell wheat seed, which has an unimpaired quantity of seed in it. Even the Government should have a say in this, especially if the seed is to be a national asset, for the spreading of the seed is a national asset. The whole Country's agriculture would be a national asset.

U.S. Author On 'Model' Tanganyika

"As long as white men must be in Africa, the handling of the Tanganyika Mandate has been almost a model of colonial administration," writes Wesley Fisher, the American journalist, after he had completed an eight-month tour of Africa under the British overlordship of the "Model" Tanganyika. Fisher's book "Behind God's Back" which treated much interest.

The Chief Commissioner in the Yorkshire Empire felt that the "Empire" system was not a success. He has been recently ordered to resign. While some of his superior to follow the "Empire" system, he has been recently ordered to resign. He has been recently ordered to resign.
