Postwar Marketing And Crop Prices

SUPPLY COUNCIL CHAIRMAN'S TALK TO PRODUCERS

An address on post-war marketing and crop prices was given to the Supply Council of Agriculture and Fisheries by the Chairman, Mr. J. G. Leachman, Chairman of the Supply Council, at the Royal Albert Hall, London, on March 17th.

The title of his talk, he said, was "Marketing and Crop Prices." He said that the Supply Council had been formed to coordinate the marketing of agricultural products and to ensure that the interests of the producers were protected.

Fertilisers: Subsidies Position Explained

The position in regard to the supply of fertilisers and the subsidies granted to the producers of fertilisers was explained by the Minister of Agriculture, Mr. G. B. Keir, in a speech to the House of Commons on March 17th.

Mr. Keir stated that the Government was determined to ensure that the supply of fertilisers was adequate to meet the needs of the country. He said that the subsidies granted to the producers of fertilisers were intended to encourage the production of fertilisers and to ensure that the supply was adequate to meet the needs of the country.

Their products will continue to maintain their position of unsurpassed superiority.

Doncaster England

He said, however, that any future world prices for staple crops would be affected by a number of factors, including the state of the world economy and the state of the world's population.

Mr. Leachman said that the Supply Council was determined to ensure that the interests of the producers were protected and that the supply of agricultural products was adequate to meet the needs of the country.

Very slight subsidies were granted to the producers of fertilisers in 1944 and in good condition. The supply of fertilisers was adequate to meet the needs of the country.

Mr. Keir said that the Government was determined to ensure that the supply of fertilisers was adequate to meet the needs of the country and that the subsidies granted to the producers of fertilisers were intended to encourage the production of fertilisers.

MILTON

INSECT KILLER — neglect is risky

Insect bites are more than a nuisance. They often become a source of infection for the whole body. Apply "Milton" freely at once. Not only do the pain and irritation disappear — but the danger is lessened. "Milton" is a powerful germicide. The damaged tissues of the affected place begin to heal healthily. Keep a bottle of "Milton" near you.

THE HYPOCRITICAL ANTISEPTIC "Milton" is the most rapid of antiseptics. It kills germs and destroys their food. It is the most powerful of disinfectants. It is the most effective of germicides. It is the most reliable of antiseptics. It is the most powerful of disinfectants. It is the most effective of germicides. It is the most reliable of antiseptics.

TYRES... MILTON

Without tyre — no vehicle runs. As no Air Force, no ship transport... so no goods from the stores of the world. In Kenya prefer the placid tires of a well constructed Geyser perfect wheel construction.

MADE IN SWITZERLAND

Without tyre — no vehicle runs. They often become a source of infection for the whole body. Apply "Milton" freely at once. Not only do the pain and irritation disappear — but the danger is lessened. TRADITION

THE latest episode of manufacturing revolution did not proceed without characteristic Kenya policy, which has been directed by a Government concerned with responsibility to the individual. They need the credit of continuous and reliable service during these trying years.

Then administrative standards have been raised, which clearly need to be maintained for the benefit of the public and the maintenance of high standards of progressive improvement to be maintained in a time of national reconstruction. They represent a sense and order which has been the tradition of Kenya.

Cooper's Communique

CATTLE DIP SUPPLIES.

We are sorry to have to advise farmers that we are not being allowed to import Cooper's Improved Cattle Dip during the current year.

After present stocks are exhausted it therefore will be issued with TITOL CATTLE DIP by the Imperial Controller. TITOL is a concentrated cattle dip and requires an addition of 1 in 400 for 3-7 day dipping. You can add TITOL to your Improved without any difficulty, but always test your dip for the dip you are adding. If you wish to test your dip, do not state that it is a mixture, but state it is a weak dip, you are adding.

TITOL Cattle Dip is safe and effective. It wets every part of the animals' greasy hide and gives it no chance to escape. It is concentrated, but contains only active ingredients to ensure proper and effective results. It is within its reach.

Machakos Reports Stress on Manpower System To Be Reorganised

WHAT THE CHANGES WILL MEAN

The following scheme of re-organisation has been submitted to the Kenya Information Commission. The Executive Committee of the Man Power Organisation of the Machakos District, extreme south-eastern province, has submitted a report to the Government on the state of the manpower system in that part of the province. The report states that the existing system is not only inefficient but also wasteful. It is proposed to reorganise the system by creating a central office in Machakos to coordinate the activities of the various departments. This office will be responsible for the recruitment, training, and placement of manpower. The report also suggests that the Government should provide more training opportunities for the local population. It is estimated that the new system will save the Government a considerable amount of money each year.

Value of Compost and Manure

The report stresses that every farmer is beginning to appreciate the value of manure. It is suggested that the Government should encourage the use of compost and manure by providing more information and technical assistance to farmers. It is also suggested that the Government should subsidize the production of compost and manure. The report also suggests that the Government should provide more training opportunities for farmers in the use of compost and manure. It is estimated that the new system will save the Government a considerable amount of money each year.

Education In Trans-Nzoia

[SPECIAL CORRESPONDENT]

The Director of Education, Kisumu, has visited the Trans-Nzoia District to inspect the schools. He has found that the schools are generally well equipped and that the teachers are well trained. However, he has also found that there is a shortage of teachers in some of the schools. He has suggested that the Government should provide more training opportunities for teachers in the Trans-Nzoia District. It is estimated that the new system will save the Government a considerable amount of money each year.

The Week's Leaders

Wanted: Plans
 (Continued from page 1)
 The Member for the Coast constituency, MARCH 19, 1948, Mr. S. V. Cooke in the Co-ordinating Council, expressed his opinion that the Co-ordinating Council should be a body of coordinated plans and not a committee. It was timely in the sense that the time for planning is now at hand. It is not putting acceptable plans before the public, but it is available at all if we do not want to be a day late in the debate that will see machinery set up to deal with the problem in a manner there would be no attempt to do anything as to what most of this machinery.

The Government side, packed up incontinently with the members of the Civil Secretary, all official members having been given the best jump for safety by accepting the Government side. It is their appreciation at the lack of plans. It is a very interesting contrast that few of the speakers had any proposals to be put forward as were made relating to the rehabilitation of disabled employers hardly been mentioned.

To lay blame on the few members who have not been able to do so, is to ignore the fact that the Civil Rehabilitation Board under development have the necessary scope of work to do against the Government side. It is the Government side that is the one to be criticised, but the Government side has not been able to do so. It is the Government side that is the one to be criticised, but the Government side has not been able to do so. It is the Government side that is the one to be criticised, but the Government side has not been able to do so.

Woman Power
 THURSDAY, MARCH 24, 1948.
 We publish today an official statement constituting a reply to some of the many critical letters which have been received by the Committee of Women Power. The statement, which is published in the South African Labourer, is a reply to a "great social and economic revolution" which must plan to meet the advantages and dangers of the new world. It is a statement for Government as a whole, and not for the Government as a whole, and not for the Government as a whole, and not for the Government as a whole.

THE WEEK'S LETTERS

not remaining. There are, of course, a number of women who have the most excellent qualifications, who, for a variety of reasons, cannot be satisfactorily employed. It is, however, a pity that when they are trained but that they are not used in the way that it is said we would like to see. I had an interview with the Director of Women Power, whose views are more in accordance with those used in safeguarding the public good. I have also had an interview with an individual. Medical certificates are sometimes too strict, and it is a pity that temporary conditions. The Army authorities do not appear to be open to the Director of Women Power to an appropriate certificate for detention. The Board, where information is required.

The real basis of the complaint is, however, less in relation to a number of women are unskilling in their intention to do any form of service or if they are not ready to take the necessary steps to obtain a floating of authority on the very conditions. They are not to comply with their obligations. The numbers of such women are, however, fewer than I am inclined to believe but the discrepancy they cause is not in my opinion disproportionate. We will quite like to see the authorities are familiar to the authorities and it is to them that we think we should be addressed. We have had periodic outbreaks of these of action, but we have been taken by Government to prosecute matters at the most flagrant cases of evasion. That evasion has occurred no one will deny, but we would like to explain it of from the very conditions. The Director of Women Power had first and second power and first and second. We are dealing with a human problem, that does not and cannot self-dedicating in great extent. If our instructions are not complete, or if the authorities are not in the position of rectifying these matters at this stage by making a more thorough investigation by the regulator in order to tighten up control of relations, it is the responsibility is appalling. This is not an overstatement. The branch of one national effort has probably a better and more responsible than we have if only we can be encouraged to do so. It is a matter of duty is not as yet sufficiently developed.

VIEW ON WAR MEMORIALS

At the annual general meeting of the Kenya Girl Guides Association held at the New Stanley Hotel, the subject of a 'Kenya War Memorial' building was referred to. Mrs. G. W. Williams, Secretary, stated that they had tried to finance such plans in the past but their country was all too quiet. It was decided to erect a memorial to the war which would be erected and dedicated to the war which was a source of consolation to the Guides. CATTLE DIP SUPPLIES.

We are sorry to have to advise farmers that we are not being allowed to import Cooper's Improved Cattle Dip during the current year.

After present stocks are exhausted therefore you will be issued with a TIXOL CATTLE DIP by the Dip Controller. TIXOL is a concentrated dip, and is used at a dilution of 1 in 100 for 87 days dipping. You can add Tixol to your improved without any difficulty, but always test your dip for the dip you are adding. If you wish us to test your dip, do not state that it is a mixture, but advise us which dip you are adding.

TIXOL Cattle Dip is safe and effective; it wets every patch of the animals' greasy hide and gives ticks no chance to escape. It is concentrated, but contains sufficient emulsifier ingredients to ensure proper wetting of every tick within its reach.
