Police name men they want to see

KENYA Police yesterday offered a reward of £2,000 for information leading to two Somalis wanted in connection with inquiries into the shooting of the Isalo District Commissioner, Mr. Walters, and Senior Chief Dida of the Borasi, last Friday.

A price of £1,000 each has been offered for two men named by the police as Mohamud Mohamed Farah and Mohamed Gele. The announcement was made by the C.I.D. headquarters in Nairobi, and police added that they will later issue full descriptions and photographs.

Farah is an associate of the Kenya Police and Gele is believed to be an ex-aid of the K.A.R. The police said they were not completely satisfied about Gele's name, but they knew he was known by this name to a number of people. Investigations are continuing into the crime, including a search of records of complete details of the Government.

After the killers had been identified, the Government asked the Somali Government to help in returning them and returning them to Kenya, but the Government refused to do so. A spokesman for the Kenyan Government said he has not yet been reached.

A MINISTRY OF SCIENCE AND TECHNICAL CO-OPERATION

Kenya as a country in the atomic age should not lag behind in establishing itself in scientific pursuits. Kenya should foster scientific research and technical co-operation in order to develop in line with other nations of the world.

In a report that may be the highest that a Ministry of Science and Technical Co-operation has ever issued, the Government has set out its policy on scientific research and technical co-operation. The report, which will only look at the scientific side of the subject, is a landmark document in the history of the country.

Feats of great hunters in anyone's days

LETTERS TO THE EDITOR

Kenya's great hunters
I am a keen sportsman and have followed the exploits of the great hunters of Kenya with interest and admiration. It is a pity that the feats of these great hunters are not better known to the general public. I hope that the Ministry of Sport will take steps to make their exploits better known to the general public.

Pilkingtons float glass outdates plate glass

PILKINGTONS

Float glass is a Pilkingtons achievement—the biggest advance in glassmaking for more than a quarter of a century. This advances the glassmaker's dream of producing a plate glass without the need for grinding and polishing and has been developed to a full production programme by Pilkingtons' technicians. Now float glass is the only glass being produced in the world. Until Pilkingtons produced float glass, Plate Glass was recognized as being inferior to one of the largest glass factories in the world. ...ana 'on the verge of starvation' and 'urgently needed' End of K.B.C. Asian series confirmed

EXPULSION OF SOMALIS SOUGHT BY MEMBERS

NATIONAL Assembly members have been complaining about the Prime Minister's handling of the Somali problem. The Prime Minister has been accused of being 'on the verge of starvation' and 'urgently needed' relief for a considerable time, and the relief must have to be maintained indefinitely, and extended unless something is done, he said.

Mr. Mwangi said the areas were overpopulated by both people and stock, and the only way to alleviate the problem was to move people and animals off the land with the aid of international finance.

MANY COULD BE MOVED

He went on: "The money could be used for irrigation schemes on either of both the Kerio or Turkwel Rivers. Many of the Turkana could be shifted to live there and the other could continue their nomadic way of life."

"The many people and animals on the land in Turkana and real enough can be produced to keep the people alive, starvation free." There was also a similar prospect in Bergele, although the Tugen were nearer to the sea and the British East Africa International finance would be hard to find to build storage warehouses of the irrigation system on the Kerio River.

BRITISH MADE SOUGHT to consider oil arms embargo

The committee made the recommendations in its second interim report, which will be among the most important documents before the Security Council when it opens debate on South Africa's apartheid policy, possibly next week.

The committee was set up a year to keep South Africa's racial policies under constant review, making recommendations as necessary to the General Assembly and the Security Council.

The report asked the Council to affirm last November's General Assembly resolutions calling member States to break off diplomatic and trade relations with the republic, beyond South African goods and close their ports and airfields to South African liners.

End to help demanded

The committee wants the Council to call upon member States supplying arms and ammunition to South Africa to stop further sales in the military and police power of the Government of South Africa as the first and most urgent step to deal with the situation in the Republic of South Africa.

The Special Committee has taken note of suspicions that, as an effective embargo should be imposed on the supply of petroleum and petroleum products to the Republic of South Africa, in addition to the cessation of arms and ammunition supplies.

Supersonic planes 'practicable' for Nairobi route

If Air-India ever introduces supersonic jets, the direct Nairobi-Bombay service would certainly be one of the major practicable routes for the aircraft, Mr. P. S. Agastya, the Nairobi manager of Air-India said yesterday.

"The Chetana is planned for March 1958, and it is expected that approximately 20,000 miles of supersonic routes will be opened up," he added.

But the view-point of the service, Mr. Agastya said, is that Air-India is not "in a hurry" to introduce supersonic jets to order, as supersonic jets are still in the experimental stage.

He was commenting on a report that the British Overseas Airways Corp. had ordered a number of supersonic jets from the Boeing Co. of America.

Mr. Agastya said that Air-India was not in a hurry to order such jets, as the present service is satisfactory and the aircraft are still in the experimental stage.

Lovely child Susan. With lovely teeth. But will she have the same lovely count in two years' time? Susan's mouth, like all children's, harbours acids which attack the protective guards against tooth decay. You see, Ammident—and only Ammident—contains Ion of Ammonia which is specially designed to counteract the harmful acids in Susan's mouth. So keep smiling, Susan. And keep brushing with Ammident.

Kenya will need another million acres to solve problem of landless

Standard Staff Reporter Nairobi.

SHORTLY after a major report during the past week in Kenya, the House of Representatives learned on Tuesday that the present million-acre scheme will not be sufficient to solve the landless unemployment problem and that another similar scheme will probably be necessary.

It has been apparent during the debates on settlement in the House that perhaps a larger scheme of agricultural colonies, with all the social problems that it involves, The Parliamentary Secretary to the Ministry of Lands and Settlement, Mr. Mwangi, said it was hoped to settle 1,000 families a month as a major operation which had never been carried out at the same speed anywhere else in the world.

Now the need for a second million-acre scheme seems apparent and it is hoped to enlist the British Government's support in bringing that about. Sir Richard Turnbull, arriving in Kenya on Wednesday, thought the idea of a second scheme sounded very desirable. The former Government-General of Tanganyika is on the first day of a series of periodic visits in connection with his duties as chairman of the Central Lands Board.

It is the Board which has the task of selecting farms for settlement and arranging their valuation and purchase, and Sir Richard it has with a rare knowledge of East Africa and its people. The House of Representatives has found time to debate the new range of subjects apart from settlement during the week. On Tuesday there was a lively discussion of three words which have recently been very prominent in the East African vocabulary.

THE words are Administration, Liaison and Reorganisation. Two Ministers, Mr. Mwangi and Mr. Oduor, explained to the House the implications of the words, which are representative of the new terms, particularly as they affect the Civil Service.

They announced that provision was being made to reduce salaries in the civil service and to nationalise certain public services.

LOSE LEAVE

SOCCER WATCH AT ELDORET

Africans now control Football Association

ELDORET Football Association has undergone its second constitutional upheaval in two years, and this time the complete control of soccer in the town is handed over to Africans.

Two years ago, the F.A. was put on a more sensible footing, with club representatives having a say, although the league was run by the municipal council.

Previous to that, it had just used a collection of white players in the game, with a few Africans in the reserves.

Now the municipal council has decided to withdraw its support, and the F.A. is being re-constituted with club representatives, but there will be no municipal control.

The new constitution was approved by 200 to 100, and the F.A. is now controlled by Africans.

KENYANS FALL IN FINALS

Three E.A. table tennis titles for Uganda woman

UGANDA'S table tennis players again demonstrated their superiority over Kenya in the finals of the East African Individual Championships at Kampala.

After their convincing win over Kenya in the team championship contest in the semi-finals, Uganda took four of the five individual titles.

Kenya's only success came in the men's doubles through the expertise of J. Mason and Edward Chikanda, proved to be too good for the Uganda pair of M. M. M. M. and F. F. But the youngsters made the Kenyans fight all the way in what proved to be the most thrilling match of the championship.

Uganda's star was Mrs. Dolly Phiri, who landed three titles. In a hard-fought women's singles match she defeated Mrs. M. M. M. M. of Kenya. Mrs. Phiri also won the women's doubles with Mrs. M. M. M. M. of Uganda.
