This was the first time since the inception of the competition that the home side—S.A.P. Caledonia, Edinburgh, and Railway in the side—have won only one point separating them. The victory showed their best since they lost to the 1st and 2nd teams, and although the 50th anniversary was celebrated, Command showed to win. NEWS FROM RHODESIA—

North and South make ready for fateful elections

THE general elections which will take place in both Northern and Southern Rhodesia during the next few months may prove as fateful in their way as the political events which followed South Africa's election in the Union of South Africa.

At such the South African election, they may have a marked effect on the future of the country. The general election in the Union of South Africa was a landmark in the history of the Commonwealth. It was the first time that the people of a large Commonwealth country had voted in a general election. The results of the election were a surprise to many of the people of the Commonwealth. FAN BELTS

The fan on most engines are driven by V-belts which are essential to their proper operation. The Operator's Instruction Book of the fan is too small, however, slipping will result in heavy wear. If the fan belt should be an emergency used on fan start bearings.

The tried on the manufacture of V-belts has reduced the initial stretch to a minimum, eliminating the necessity of frequent adjustments. This has led to the longer life of belts but also increased the load for the more exact installation. When installing, loosen the more exact adjustment so that the belt will stretch over the pulley grooves.

Keep the belt clean, grease and oil are the most enemies of V-type belts.

"Good equipment makes a good farmer better"

On her harvest hinges Europe's recovery

By ANTHONY DORSET

ALL over Europe the harvest is being hurried in. The crops will be secured in a matter of days, and the recovery of the continent will largely depend on its ability to reap more of its own grain.

Must be higher

The year before last, when European harvests were 70 per cent of the normal, Europe was expected to produce 20 million tons of wheat. It is expected to be an 12.5 million tons.

Ambitious

With these plans are complete. The Government has the necessary resources to produce about two-thirds of the wheat and other cereals which it needs for its own consumption.
