Norwich City hold own against Pompey

WELL over 1,000 people saw Saturday's 23rd round FA Cup tie which was played at the home of the hosts. The crowd provided a number of surprise results but few shocks and all three encounters were decided by goals scored in the early stages of the match.

At the other extreme, had the home side been able to score a goal in the first half, they would have been able to take the game to the second half. Instead, they were forced to wait until the 70th minute for a goal which was enough to see them through.

The match was a close one, with both sides showing attacking play. In the end, the home side's goalkeeper was called upon to make a number of fine saves to keep the score at 0-1.

ANIMALS ARE MAKING NEWS

Scruffy the cat hit front pages

ANIMALS are making news in Britain today. In the past few weeks Britain have had a mad cow, a mad pig, mad sheep, mad chickens, mad horses with charmed lives and high-leaping dogs. Scruffy the cat, which hit Britain into news columns and animal news columns, has been the latest animal to make news.

An eight-year-old black and white tabby named Scruffy has been the subject of a number of newspaper articles and has been the subject of a number of newspaper articles.

Scruffy's fame began when he was taken to the hospital in London to be treated for a skin disease. He was taken to the hospital in London to be treated for a skin disease.

NEW YEAR OPENS UNPROMISINGLY FOR OIL INDUSTRY INVESTORS

INVESTORS in the British oil industry withdrew on terms at the opening of 1958, a year which has been a curious combination of boom and depression for the industry. The Government's general policy in 1958 has been to encourage investment in the oil industry, but the industry has not responded to this policy as it has done in previous years. The industry has been hit by a combination of factors, including a decline in oil prices, a decline in oil demand, and a decline in oil production. The industry has also been hit by a decline in investment in the industry, which has led to a decline in the industry's ability to produce oil. The industry has also been hit by a decline in the Government's support of the industry, which has led to a decline in the industry's ability to produce oil.

Official silence

This has led to a general silence in the industry, with many investors withdrawing their funds. The industry has also been hit by a decline in the Government's support of the industry, which has led to a decline in the industry's ability to produce oil. The industry has also been hit by a decline in investment in the industry, which has led to a decline in the industry's ability to produce oil.

Stumbling block

The stumbling block in the industry is the Government's policy of nationalization. The Government has been nationalizing the industry, which has led to a decline in investment in the industry. The industry has also been hit by a decline in the Government's support of the industry, which has led to a decline in the industry's ability to produce oil.

Accommodating

The industry has been accommodating to the Government's policy of nationalization. The industry has been willing to accept the Government's terms of nationalization, which has led to a decline in investment in the industry. The industry has also been hit by a decline in the Government's support of the industry, which has led to a decline in the industry's ability to produce oil.

GOVERNMENT SPENDING

Current deficit in Britain suggests that warnings of 'inadequacy' were justified

By RICHARD DENMAN

THE news that Britain finished the new financial year ended on December 31 with a "true deficit" of one million pounds, revenue and expenditure in the year. This is a significant increase from the "inadequacy" of the previous year, when the deficit was only 500,000 pounds. The deficit is a result of the Government's increased spending on social services and defence. The Government has also increased its borrowing, which has led to a decline in the industry's ability to produce oil.

GOVERNMENT REPLIES: NO ILL-FEELING BETWEEN TWO KENYA TRIBES

A suggestion that the ill-feeling between the Maasai and Kikuyu tribes in Kenya is due to the Government's failure to provide land for the Maasai was dismissed by the Minister of Home Affairs, Mr. E. W. Mathy, in a speech in the Legislative Council.

Mr. Mathy stated that the Government had made every effort to provide land for the Maasai, but that the Maasai themselves were responsible for the ill-feeling. He said that the Maasai had refused to work on their own land and that they had refused to accept the Government's offer of land.

F.A. CUP REPLAYS PRODUCE SHOCKS

Lowly Watford humble 'Proud Preston'

It would be an understatement to say that the F.A. Cup replays have produced a shock. They have produced a tidal wave of excitement, a tidal wave of interest, a tidal wave of hope. The fact that Watford, a club which has never before been in the F.A. Cup, should have reached the final of the replay is a triumph for the club and for the F.A. Cup itself. The fact that Preston, a club which has never before been in the F.A. Cup, should have reached the final of the replay is a triumph for the club and for the F.A. Cup itself.

Apparent certainty

It is now almost certain that Watford will play Preston in the final of the F.A. Cup replay. The fact that Watford, a club which has never before been in the F.A. Cup, should have reached the final of the replay is a triumph for the club and for the F.A. Cup itself.

Youngest ever to play for Wales

John Charles, a 17-year-old forward, has become the youngest player ever to play for Wales. He scored a goal in a friendly match against Scotland.

Ant control will stop soft scale

SOFT SCALE, one of the most common pests in Africa, can be controlled by keeping down ants. Generally, scale are present wherever there is an infestation of soft scale and when the presence of the pest is well marked, spraying with a soft scale-killing insecticide is necessary.

Writing in the *South African Forester's Weekly*, Dr. Bernard Smith, Principal Entomologist of Pretoria:

The most striking characteristic of soft scale is the fact that it is not killed by the insecticide which is used to control it. The reason for this is that the soft scale is not a pest of the plant but a pest of the ant. The ant is the one which is responsible for the spread of the soft scale and it is the ant which is the one which is killed by the insecticide.

An errand child provides the highlight of this week's 'wordens' diary of the private lives of the animals in Kenya's National Parks.

A debut of crocodiles' eggs on the Adi River.
