It is evident that—the newspaper correspondent who writes about Dirty Oiling and Greasing joints in Nairobi

has not visited our Ford Service Stations at Delamere Avenue and Rifle Range. We, therefore, extend to him, and everybody interested in efficiency with cleanliness, a cordial invitation to inspect these up-to-the-minute lubrication plants, which are supervised by skilled European and Asian experts, and who, besides seeing that your car is thoroughly lubricated with the highest quality oils and greases, check up and advise you, entirely free of charge, on any mechanical repairs needed, and which may have escaped your notice. This stitch-in-time service is invaluable to Kenya motorists, especially before setting out on long journeys.

DROP IN WOOL PRICES AND THE QUESTION OF NEXT SEASON'S VALUES

MR. R. BATH, vice manager of Dalgarno and Company, said in Sydney that the wool trade had been considered in the price structure. That, he said, was the only wool condition for the full 20 p.c. in value.

Confronted with financial difficulties, he had discouraged buyers buying. The large quantities of wool brought in the first quarter of the year were still passing through the manufacturing industry so that the lower prices were not yet doing much to relieve the wool situation.

The B. Bath was also necessary purchasing international wool for the production of woolen fabrics. The first quantities which came in, he said, were not so good as those which came in last year. The wool available in the United States was not so good as that available in the United Kingdom. The wool available in the United States was not so good as that available in the United Kingdom.

COMPANY PROFITS UP 24 PER CENT IN FIRST SIX MONTHS OF 1951

The gross profits of 2,804 companies, whose reports were published in the first six months of this year, totalled 4,136 million according to a profile table published in the Financial Times. This figure compares with 3,334 million in the first six months of 1950—equivalent to a rise of 24 per cent.

The gross profits of the 1,702 companies in the industrial group alone rose in the same period from 2,768 million to 3,807 million. This is equivalent to a rise of 37 per cent. Dividends have risen by just over 50 per cent from 278 1/2 million to 422 1/2 million.

In June alone, a month which contained no report on major large companies, including Shell, Transport and General Trust, and Anglo-Siam, the total rose to 22 1/2 million, or over the "shell" group of 1,000 companies, the total was 1,000 million.

The sector which has the greatest increase in the first six months of the year is the public utilities, which are summarized in the following table.

Table with 2 columns: Company Name, Gross Profit 1950, Gross Profit 1951. Includes British Electric, British Gas, British Overseas Airways, etc.

It should be noted that a proportion of the profits of the public utility companies are subject to the Income Tax at 30 per cent, as compared with the normal rate of 30 per cent for other companies.

The latest report of the Institute of British Producers was that without exception the increase in turnover in the first six months of 1951 was larger than the increase in gross profit.

Highly-increased increases in turnover were shown by the public sector and consumer goods, and by the manufacturing group as a whole. The increase in turnover in the public utility group was 15 per cent, compared with the 10 per cent increase in the manufacturing group.

Companies which showed typical increases in turnover were those in the public utility group, the consumer goods group, and the manufacturing group.

Supplementary estimates for the first six months of 1951 have been prepared for the Board of Trade and published in the Financial Times. These estimates show the effect of the various duties on the total value of goods exported in the first six months of 1951.

The provision for Mr. Stirling's new provision, which will be in force from the beginning of 1952, will be in force from the beginning of 1952.

WHAT'S BEEN SAID ABOUT SETTLEMENT

PLANS to people the 'limitless spaces' of East Africa have engaged the attention of politicians—and farmers.
PROMISES have been made but few have been kept. Wars and 'power politics', high prices and bad crops are blamed for the 'sad failure' of settlement.

EAST AFRICAN DEVELOPMENT

Planning Committee proposed ONE OF MAIN ISSUES BEFORE ARUSHA CONFERENCE

The session which the Nairobi Chamber of Commerce is to convene at the annual session of the Association of Chambers of Commerce and Industry of Eastern Africa, the High Commission and the Governments of Kenya, Uganda and Tanganyika are expected to set up an overall Planning Committee for development in the region will be held at Arusha for the first time on August 17 and 18. The Nairobi delegation will include Mr. J. M. O'Connell (President of the local Chamber), Mr. G. A. Pym and Mr. C. G. Brown.

The conference which took place at Nairobi last week has shown that the East African Chamber of Commerce and Industry is now passing developments only when a crisis has arisen. The lack of thought in planning for the future has been a hindrance to the development of the region. The Chamber has been successful in its efforts to bring about a more planned development in the region. CAN AMERICA AND RUSSIA LIVE IN PEACE?

O. H. BRANDON analyzes the possible trend of events if and when the present 38th Potsdam talks in Korea are brought to an agreed conclusion.

THE question that has troubled the world since the end of the war is whether it is possible to have a permanent peace between the United States and the Soviet Union. The answer to this question is not simple, but it is one that must be considered in the light of the present situation in Korea and the possibility of a general armistice in that country.

It is to be expected that in the event of a general armistice in Korea, the United States and the Soviet Union will be faced with the problem of how to deal with the North Korean situation. The United States will probably insist on a neutral government, while the Soviet Union will probably insist on a government friendly to its interests.

The United States will probably insist on a neutral government, while the Soviet Union will probably insist on a government friendly to its interests. This is a situation that will require a delicate balance of power and a high degree of diplomatic skill to resolve.

Show-down with Russia's classmate in U.S.

The announced decision of the American Government to support the United States position in the Korean peninsula is a significant step in the history of the conflict. It shows that the United States is willing to stand up to the Soviet Union in the face of a common enemy.

Middle East loses a great influence for peace

KING ABDULLAH—THE FRIEND OF BRITAIN

With an amiable but disappointed King Abdullah, the Middle East has lost its most influential and its most respected monarch.

Majesty Abdullah bin Hussein, King of the Jordan, more widely known as the "Friend of Britain" and the "Friend of the United States," has been dead for more than a year.

The young Prince Abdullah was killed in an air crash near Amman, Jordan, on July 20, 1951.

King Abdullah was a man of peace and a man of courage. He was a man who had the confidence of his people and the respect of his neighbors.

He was a man who had the confidence of his people and the respect of his neighbors.

By the assassination of King Abdullah the world has lost one of its greatest single influences for peace in the Middle East—and Britain one of her staunchest friends.

Apart from the severe blow to British policy in the Middle East, it is feared his death may lead to a mounting volume of tension and instability with grave consequences to Israel.
