DOGS ON DUTY: FOX TERRIER GUIDE TO BLIND GREYHOUND

The use of dogs to lead blind people is common enough in British schoolboys. This fox terrier (right) is one of those special dogs, but his worst enemy is another dog, a blind greyhound which he found shambled in Dorchester. The two dogs are seen here meeting each other for the first time at a London station.

Former Kenya official in island uproar

RACIALISM ALLEGATION

A FEW months after his appointment as Chief Secretary, Mr. J. J. Adie, formerly Secretary for Education, Labour and Lands in Kenya, has become the centre of a controversy based on allegations of racial discrimination.

The Governor of Barbados, Sir Robert Arundell, is reported to have referred the allegations to the Colonial Office. Yesterday it was officially announced that Mr. Adie, who would normally act for the Governor in his absence, will not depart when Sir Robert flies to London for a three-week visit on Saturday.

A constitutional law Government House said that the person to be appointed as Assistant Chief Secretary, Mr. G. T. Barton, would act as Governor and that Mr. Adie would take leave here during Mr. Barton's absence. Mr. Adie arrived in Barbados in June 1957.

Mr. Adie was appointed to the post in 1954, when he was appointed to the post of Chief Secretary for Education, Labour and Lands and acted as Minister from September, 1955, until February, 1956.

He was educated at St. Andrew's School and Magdalene College, Cambridge, and then at the University of London. He was a member of the House of Commons from 1951 to 1953. He was appointed to the post of Chief Secretary for Education, Labour and Lands in Kenya in 1954.

It's all fine this morning... thanks to this laxative that gives MORE COMPLETE RELIEF!

The big difference in Phillips Milk of Magnesia is that it's prepared as well as an ideal laxative! This means that in addition to great laxative power and effective relief from constipation, Phillips also acts as the acid indigestion that usually accompanies it. FACTORY legislation is the oldest of all labour legislation and the first factory law was passed in the United Kingdom in 1802.

The system of inspection was introduced by the Factories Act of 1833. It was given statutory force by the Factories Act of 1874 and was extended to the Lancashire cotton industry in 1890.

Start made in 1902. The first Act of 1902 was a landmark, but it did little to improve the conditions of the workers.

From it developed our modern factory legislation, the one of the most important public health measures that we have in the modern State.

At present, inspection of Factories, and associated works, is carried out by the Chief Inspector of Factories, from whose department the factories are visited.

It is of interest to note that, under the provisions of the legal definition of a factory in every country, it includes such varying occupations as a small tailor's and shoemaker, as well as a coal and iron factory.

QUITE a long time has elapsed since every reasonably sized factory in every country is visited by an inspector.

These officials are being really and indeed, giving advice on such particular matters as to how to make a better affecting conditions in factories.

UGANDA GOVERNMENT WARNED TROUBLE ON RACIAL AGAIN IN LITTLE ROCK

TWO words were believed yesterday to have caused a new flare-up in conflict between President Eisenhower and Governor Faubus on the Little Rock School issue...

ELECTIONS DEBATE

An amendment aimed at bringing to an end the debate on a motion for common roll elections in Uganda in 1961 was defeated by the Uganda Legislative Council yesterday after it had been rejected by the Chief Secretary on behalf of the Government.

The amendment, proposed by Mr. J. T. Simpson, leader of the Representative Members, would have deleted the controversial part of the motion referring to 'adequate and effective safeguards for the representation of non-Africans.'

Mr. Simpson in moving the amendment, claimed there was a danger that the Government would aggravate the tension that exists in Uganda. It was unfortunate that the Chief Secretary should have rejected the representation on the Council, but there was no chance to discuss them all in a round-table conference rather than have to take a spot decision.

Lack of knowledge African's drawback

NON-AFRICANS would be needed as Representatives in Members in Uganda Legislative Council, according to some experienced in the debate by Hon. W. H. L. Gordon...

Fateful six months in the destiny of Argentina

Municipal jobs
Tuesday night's meeting
of Nairobi City Council was one of the most important held for a long time. Two chambers reviewed the Corporation's activities for the past week and found— with reports that will stimulate public interest—
CLASH
When Wilson sought that shortage of staff hinders the Council's activities. Under circumstances, the fullest possible use will have to be made of the Corporation's architects in private houses, on civil and Government work. While the Town Planning and Building Service sections will severely under-staffed, it is good news to hear the Council has recruited engineers to complete his establishment though they must be, while six key men were the officer of the Town Clerk's office, the Council to face the future with greater confidence. The Council also confirmed that Mr. Ayres' resignation to a suggestion made during Sir Colin Campbell's speech, an idea that gained much public support. It was proposed to appoint a new Town Clerk of a suitable municipality in Nairobi for a relatively short spell. A kind of 'caveat' or interim Town Clerk would discharge his duties until his energies to reorganize within the Town Clerk's office are sufficiently experienced to ensure that the Corporation meets the high standards set by the Government. Some delay in the process, but he should not scruple to take any administrative action deemed necessary.

DULES-GROMYKO TALKS TOMORROW

Exchange of views on Middle East and disarmament

RUSSIA'S Foreign Minister, Mr. Gromyko, is to confer with the American Secretary of State, Mr. Dulles, in Washington tomorrow on "international issues of concern to both the United States and the U.S.S.R." The meeting had been arranged at Mr. Dulles's request.

A State Department spokesman said that the meeting would be contemplated by Mr. Dulles, but other officials said that the Middle East and disarmament questions would play a prominent part in the talks. Mr. Gromyko would travel to Washington from New York specially for the meeting, which would be held at Mr. Dulles's home.

The announcement said: "Mr. Gromyko is in the United States attending the United Nations General Assembly and the meeting was arranged at the instance of the Secretary in order to permit an exchange of views on various international issues of concern to both the United States and the U.S.S.R."

Arabs will appeal to Minister

EXTRA SEATS

"Standard" Correspondent

ARAB Members of Kenya's Executive Council are to appeal to the Minister for East Africa this month, when he is expected to visit Nairobi, to allow extra seats to be added to the Council.

The appeal is being made in view of the fact that the Council is at present only 12 members strong, whereas the Government has announced that it will be increased to 18 members by the end of the year.

The Council is expected to meet in Nairobi on October 10, and the appeal is being made in view of the fact that the Council is at present only 12 members strong, whereas the Government has announced that it will be increased to 18 members by the end of the year.

Attack on British policy

This is one of a series of conversations between the Secretary and Foreign Ministers attending the General Assembly in order to discuss important international issues with the Secretary.

Meanwhile, at the General Assembly meeting in New York, a strong attack on British policy in the Middle East and of French actions in Algeria was made by the Saudi Arabian representative, Mr. Shukriyat.

Mr. Shukriyat, who formerly represented Syria in the United Nations, said it was "a complete failure" to have a meeting in the Middle East, and that the Arab League was "a mere talking party" which was "not a real League of Arab States".

He also attacked the British policy in the Middle East, and said that the British were "not interested in the Arab people, but only in their oil".

The reserves were £1,600 million at the end of the previous week, compared with £1,600 million at the end of the previous week.

"Additives, Sir, are things that are added to things..."

the boy's a genius

It sounds simple enough. To add special qualities to a motor oil, you just... add things to it.

Simple? Revolutionary? When SHELL X-100 MOTOR OIL was first developed, eyebrows were raised in query. How could a new kind of oil altogether, an additive oil, claiming to do things a motor oil could do before and completely refuting existing ideas on motor wear?

It's not fiction, and that's why it causes most wear in engines. It is corrosion from acid products of combustion. Research has proved it. A modern oil must therefore be able to fight acid and its corrosive effects. In fact, modern oil is no longer enough. A modern oil must have a detergent action, to keep working parts clean and free from slugging deposits.

Again, standards of stability must be raised to resist the higher temperatures and pressures of modern engines.

How could these things be achieved? Shell Research found the answer... by remarkable chemical additives.

SHELL X-100 MOTOR OIL, with its ten special forms of protection, was a major advance in oil lubrication. Its success was immediate.

Today it is the leader amongst detergent oils, whose superiority is now universally recognized. It is so good another industry, how Shell are continually producing the better products which a changing world demands.

SOVIET SATELLITE CIRCLES THE EARTH 22 revolutions in 35 hours claimed 'CODED SIGNALS' MYSTERY

Definite sightings had been reported by yesterday of Russia's earth satellite, which is circling the globe at 18,000 miles an hour. Moscow Radio said it was launched. It had made 22 complete revolutions of the earth, covering 625,000 miles.

An American expert attributed the lack of sightings to the fact that the sun was obscuring observation in all parts of the world except the Arctic. But there have been continuous reports from many countries in Europe, Asia, Africa and the United States, with the surprise announcement coming public last Saturday in Washington.

There were clear signs of change in American Press and Moscow lack of funds and rivalry between the Armed Forces.

In Russia, Pravda, organ of the Soviet Communist Party, claimed that the satellite's launching was an inevitable victory for the Communist system in the world.

Observers all over the world are puzzled by the signals being received from the satellite, which are said to be "coded signals" which indicate that they contain coded information.

FIGHT TO SAVE POUND IS BEING WON

SHADOW ON SHARE MARKET

People face some hardship

BRIITAIN has won the first round in its battle to save the pound and push back the spectre of devaluation and bankers who are now bent on the conquest.

The victory was won through the intervention of the Bank of England, which has managed to prevent the pound from falling below the level of \$2.80 per £1. This is a significant achievement, as it has allowed the government to avoid the need to devalue the pound.

The success of the pound has led to a rise in the share market, with many investors seeing an opportunity to profit from the recovery. However, there is still a shadow over the market, as investors remain cautious about the long-term prospects of the pound.

World's banker

But the value of the pound on the money market is to be kept up, Britain is being urged by the world's bankers to do so. The bankers are concerned that a fall in the value of the pound would lead to a loss of confidence in the pound and a consequent rise in the price of gold.

The bankers are also concerned that a fall in the value of the pound would lead to a loss of confidence in the pound and a consequent rise in the price of gold.

Foreign bankers ramp denied

The Economic Secretary to the Treasury, Mr. Brown, has denied the charge that foreign bankers are trying to force the pound down. He said that the bankers are simply trying to profit from the fluctuations in the exchange rate.

Mr. Brown also said that the government is determined to maintain the value of the pound and will take whatever steps are necessary to do so.

Uganda goodwill mission to India

Because of political columns in the reduction in the quantity of cotton which India is to import from Uganda, the Uganda Government is planning to send a goodwill mission to India. The mission is led by the Ugandan Minister of Commerce, Mr. A. K. K. K.

The mission will visit India to discuss the cotton trade and to establish better relations between the two countries.

Germany may cut Bank Rate

The West German Federal Bank said in its weekly report that it would consider cutting the bank rate to 4 per cent if the government is prepared to do so.

The bank rate is the rate at which the bank lends money to other banks. A cut in the bank rate would lead to a fall in interest rates and a consequent rise in the price of bonds and shares.
