CAPEX WEEVIL POWDER

CapeX Weevil Powder is the most effective dust on the market, and like all other "CapeX" products, it has proved itself an extremely economical, to be all that we claim for it.

It is safe and effective in attacking the weevil feeding of the stored, thereby allowing the weevil to escape, in its development. Theoretically the most perfect dust would be ground glass, but because the material is so hard the manufacturer did not consider any of the softer earth clays such as diatomite.

It kills and prevents weevils in grain when mixed at the rate of 2-4 lbs. with a 200-lb. bag of grain. Simple, safe and effective.

Sold in any quantity at competitive prices by the sole distributors, THE KINYA FARMERS' ASSOCIATION LTD., who have just received a large shipment.

A descriptive leaflet giving full directions for use can be had from its open application or from the distributors.

DAIRY FARMERS

On the 21st of January, 1963, the Government announced that it had decided to increase the price of milk to 10/- per gallon. This decision was met with a great deal of opposition from dairy farmers who felt that the price was too low. The Government, however, maintained its position, stating that the price was necessary to cover the cost of production and to provide a fair return to the farmer.

E.A. Steel Production Falling Off

The East African steel production has fallen off in the first quarter of 1963. This is due to a number of factors, including a shortage of raw materials and a decline in demand. The steel industry in the region is facing significant challenges, and it is expected that production will continue to decline in the coming months.

The East African governments are making every effort to avert the steel production crisis. They are seeking to increase the production of steel and to reduce the dependence on imports. This is a major challenge for the region, as steel is a vital material for many industries.

Farmers Want to Come To Kenya

Farmers from other countries are showing a growing interest in coming to Kenya to establish farms. This is due to the country's fertile soil, favorable climate, and abundant water resources. Many farmers are attracted to the opportunity to start a new life in a new country and to benefit from the growth of the Kenyan economy.

The Government of Kenya is providing incentives to attract foreign investors to the agricultural sector. These incentives include tax breaks and subsidies, which are designed to make it easier for farmers to establish and operate their farms in Kenya.

Phosferine has proved a marvel to me - says Miss J. E.

"My nerves were in a terrible state, everything seemed to be on edge, and I decided to try Phosferine, and was amazed to find that it did me so much good. I can now sleep peacefully, and my nerves are in a normal state."

Nationalisation of Would Stop Imports And Private Enterprise

The nationalisation of the steel industry in East Africa would have a significant impact on the economy. It would stop imports of steel and reduce the dependence on foreign suppliers. This would be a major step towards self-reliance and economic independence for the region.

The nationalisation of the steel industry would also have a positive impact on private enterprise. It would create a more stable and predictable environment for businesses, which would encourage investment and growth in the private sector.

The nationalisation of the steel industry would also have a positive impact on the environment. It would reduce the need for imports, which would reduce the carbon footprint of the region. This would be a major step towards sustainable development and environmental protection.

The nationalisation of the steel industry would also have a positive impact on the social sector. It would create jobs and provide training opportunities for the local workforce. This would be a major step towards social development and economic growth for the region.

The nationalisation of the steel industry would also have a positive impact on the political sector. It would reduce the influence of foreign interests in the region and increase the power of the local government. This would be a major step towards political independence and self-determination for the region.

GOVERNMENT HOUSE "INVADED"

prompt Baraza In The Grounds

HUNDRED and fifty Kikuyu—some of them women and children—gathered to Government House at seven o'clock for a meeting to meet an interview with His Excellency Governor Kenia, Sir Philip Mitchell.

They were escorted to the Ritz Valley Province where they were met by the Governor. The Governor held a baraza in the grounds of Government House and the squatters were given an opportunity to express their grievances.

The squatters expressed themselves as dissatisfied with the Government's policy and their demands. They demanded that the Government should take steps to improve the conditions of the squatters and to provide them with adequate housing and employment.

The Governor listened to their grievances and promised to take steps to improve their conditions. He also promised to provide them with adequate housing and employment.

The Governor's promise was met with approval by the squatters. They were satisfied with the Governor's response and they departed from Government House at a late hour.

Bride Killed On Her Honeymoon

DAKOTA CRASH IN PORTUGAL

A man who, with his bride, was being flown to Portugal, in the sea over the Azores, was killed when the plane crashed near the Azores.

The crash occurred on the morning of the 15th. The plane was carrying a bride and groom and several other passengers.

The cause of the crash is still under investigation. It is believed that the plane was flying low over the sea when it crashed.

The bodies of the bride and groom were recovered from the wreckage. They were found in a state of shock.

The investigation is continuing. It is hoped that the cause of the crash will be determined soon.

Triumph of Strike Renewed at Mombasa

The strike at the Mombasa docks has been renewed. The workers are demanding better wages and conditions.

The strike has caused a serious shortage of goods in Mombasa. The Government is trying to get the strike to end.

The workers are determined to continue their strike until their demands are met. They are supported by the public.

The Government is offering a compromise to the workers. However, the workers have refused the offer.

The strike is expected to continue for some time. It is causing a lot of trouble for the Government.

The Government is trying to get the strike to end. It is offering more money to the workers.

PALESTINE Palestine is on the brink of another calamity. It would seem to be beyond the power of man to recreate an atmosphere in which there will be no further bloodshed. There is a wide divergence of opinion between the two sides of the question. The interpretation of the Balfour Declaration and the 1917/1918 was. Confusion reigns here as a result of the interpretation of the Balfour Declaration by British who for various reasons have made promises to both Jews and Arabs which can hardly be interpreted to their mutual advantage. It is clear that time could have been conserved. The only thing that can be said is that Britain did not promise the whole of the country to either party.

Change and! Always Cleanliness means first for Health!

The skin is the window - yet, like hidden machinery, it is the most important part of the body. It is the first line of defense against disease and infection. It is also the most sensitive part of the body, and it is the first to show signs of age and wear. To keep the skin in good health, it is essential to use a good skin cream. **Geo. Blowers' Cream** is the best skin cream available. It is made from the finest ingredients, and it is guaranteed to keep the skin soft, smooth, and healthy. It is also a good remedy for dry skin, eczema, and other skin conditions. It is available in all good stores.

USE NON-FORCED AIR FLOW

for cuts and grazes

It is by now a common sense idea to substitute for games which used to be played in the open air, games which can be played in a hall. This is especially true in the case of children, who are often injured by cuts and grazes. **Non-Forced Air Flow** is a new and improved method of playing games in a hall. It is a very simple and easy to use system, and it is guaranteed to keep the air in the hall fresh and clean. It is available in all good stores.

Milton for safety!

Use the **Milton** disinfectant to disinfect in every other governmental department. See the instructions enclosed.

Plan For Mass Production Of Groundnuts

"WORLD'S NEED IS AFRICA'S OPPORTUNITY"

Mechanised Cultivation Of 3,210,000 Acres

ULTIMATE OWNERSHIP BY AFRICANS THE GOAL

There was issued in East Africa and simultaneously in London yesterday the report of a mission appointed by the British Government to investigate the possibilities of mass production of groundnuts in East and Central Africa.

Their report is dated September 20, last year and they say in an introductory note: "We are confident that the project for the mass production of groundnuts is a practicable one and that if the necessary staff and heavy field equipment is forthcoming when required, the territories of Tanganyika, Northern Rhodesia and Kenya could attain within a period of five years an annual production of 800,000 tons of groundnuts. This represents only a relatively small part of the present total shortfall of vegetable oils and fats, but we have no doubt that, given the will, this large figure could be vastly exceeded in south of the Sahara area."

Will Test Players Turn Professional?

The question of whether players will turn professional is a hot topic in the world of sports. Many players are currently amateurs, and they are looking for ways to make a living from their sport. Some players are considering turning professional, while others are not. The reasons for this are varied, and they include factors such as the level of competition, the amount of money available, and the player's own interests. Some players are motivated by the prospect of a large salary, while others are motivated by the desire to compete at the highest level. The question of whether players will turn professional is a complex one, and it will continue to be a topic of discussion for many years to come.

"SIX GOOD TYRES..."

HOW GOOD ARE THEY?

There's at least one feature of second-hand cars which can't fool you. Tyres are amongst the most important items and this clearly will tell you whether or not you are getting "good" tyres. Examine the carcasses of the tyres, looking specially for "cracking" and signs of "prying" - the signs which tell you that the tyre is old and that it is not as good as it looks. If the carcasses are sound, disengage the chains, tread because the Treadmilling process can make these as good as new again.

TYRESOLES

TYRESOLES neither cracks, bulges nor is any damaged worn tyre so that they are good as new. They are made of a special compound of Tyresoles, again and again, giving you thousands of extra miles of wear.
