### CORRESPONDENCE

To the Editor, "E.A. Standard"

Sir—With reference to the letter which appeared in today's E.A. Standard I would like to mention that not only I am the same person as the "Cold Bath" but that a letter addressed by me to the East African Power and Lighting Co. on the subject of the same problem was acknowledged and a reply was sent to me to the effect that I was to request to take up the matter with the Government. I have done so by recently rather than choose to write to you. I am sure you will be glad to hear that the Government has accepted your suggestion.

Yours sincerely,

### ART

To the Editor, "E.A. Standard"

Sir—In a letter described by Central Editor Phillips as "important" dated the 15th of August, the Government's representative S.R.B. has taken objection to my article "The Art of the Artist". This objection seems to be connected with some confusion of the artist's status as a member of the community, and not as a member of the State. It is not intended to be a criticism of the artist's work, but a statement of the fact that "Art is primarily a matter of expression, in terms of the individual's personality."

S.R.B. tells me that G.D. expounded this fallacy of the artist's status. If any artist is given years of education, it is not to be used to create a system, it is to be used to create a style, a manner, a way of looking at things, a way of seeing things, a way of feeling things, a way of thinking things, a way of living things, a way of being things. It is not intended to be a statement of the fact that "Art is primarily a matter of expression, in terms of the individual's personality."

To the Editor, "E.A. Standard"

Sir—I was greatly perturbed to read the article in the "E.A. Standard" of August 25th, 1944, headed "The Art of the Artist". It is a pity that the article was published in the "E.A. Standard" as it is a matter of public interest.

I appreciate the efforts of the Government to improve the artist's status, but it is a pity that the article was published in the "E.A. Standard" as it is a matter of public interest.

### REORGANISATION

Plans Of  
Kenya Branch

The last report of the British Legion for the year 1943, which has been published in the "E.A. Standard" of August 25th, 1944, is a most interesting and revealing document. It shows that the British Legion has done a great deal of work for the benefit of the ex-servicemen and their families during the past year.

### A Priority Job!

**KEEPING THE FAMILY FIT IS A PRIORITY JOB FOR THE HOUSEWIFE.** Her usual way in which she can do so is to see that her family are content. Content may not be the best word to use, but it is not content that she must keep up with the flour ration. Content is content in preventing fatigue. Besides saving pennies there are other ways in which she can do so.

**Optimal Dining.**  
1 cup of oatmeal  
1 cup of shredded wheat  
1 small amount of milk  
Salt and pepper  
Method: Put all the ingredients into a bowl and mix thoroughly. Mix with a little water as possible then cook in a clean brown pudding dish. But for an hour. Turn out on a dish and serve with a good brown gravy or with a bit of melted butter.

**Optimal Soups.**  
1 cup well cooked oatmeal  
1 tablespoon melted butter  
1 teaspoon of sugar  
1 teaspoon of salt  
1/2 cup of flour  
Method: Mix well together. If needed to make a dough stir with spoon until smooth. Roll in a thin sheet. Cut into strips. Cut a slit down the middle. Put in a pot of water. Cook for 15 minutes. Drain and serve with a good brown gravy or with a bit of melted butter.

**Remember.** Watch for these developments every day. Keep the facts about food. Call this standard keep it before you.

This is a ration period. (August 27 to September 17th 1944). Issued by the Central Committee Distribution Board, Nairobi.

Day-long freshness...

Keeping cool is largely a matter of keeping the pores open and unobstructed. Wright's penetrates right into the pores with a fragrant refreshing lotion that is cooling, cleansing, invigorating. It not only revivifies the skin but encourages it to warm off steam's gas and infectious too. (but use Wright's carefully—there's less of it about now).

COOPER'S COMMUNIQUE

KEROL

Sheets of Kerol in East Africa are few at present, but we are glad to be able to advise farmers that fresh supplies should arrive shortly.

Use Kerol to the best advantage for internal purposes. Kerol can have the greatest effect when given regularly in the form of stock licks or added to mash. The animal's alimentary canal is Kerolized by those small quantities which frequently enter it. It becomes a trap for germs and undeveloped larvae of internal parasites. And the more and smaller animals take in those small doses of Kerol, the smaller chance there is for a germ occurring in the digestive tract through which germs or larvae can enter.

Scientists Can Produce Rain -To Order!

[FROM A CORRESPONDENT] PROGRESS has been made by American scientists in the production of rain. In a recent report, they state that there is a theoretical possibility of inducing rain by the use of artificial clouds. The scientists have found that if a cloud is made of water and rain-gas, it will rain. The scientists have found that if a cloud is made of water and rain-gas, it will rain. **DETTOL**

Disinfectant

"Tell me, doctor... How can 'Dettol' kill germs instantly and yet allow the wound to heal?"

"Dettol" never fails to disinfect because germ-killing living tissues, although they are similar substances. "Dettol" is three times more deadly to germs than any carbolic acid, yet it causes the tissue to heal as fast as possible. "Dettol" is an easy and safe preparation for applying and a refreshing way of cleaning personal hygiene.
