The Mechanical Maize Picker

(By H. H. C. CHAMBERLAIN)

During the week I tried to harvest a large area of maize on the farm with a mechanical maize picker. I found it would "conquer" labour and I would have no more "wonder" pickers.

Thanks to much help and kindly advice and I must admit I have a little about maize pickers—and all the "wonder" pickers—used at a recent date was advised that there was a machine in the International Harvester Company's show. Nairobi, still in its "cradle" days. I went to the show at the International Harvester Company's show at Ngara Workshops and fitted it on a Farmall "A" tractor and the machine in a small area of very dry soil, and I must admit I was very agreeably surprised to see how the picker worked. The maize cobs were all picked and the stalks were left in the field.

I should say, here and now, that I have no special bias for the International Harvester Company's mechanical maize picker, but I have no serious criticisms to make of it. It is a very good machine and I am sure it will be a great help to the maize grower in the future.

The machine is called the International Harvester "A" Maize Picker and it is a very good machine. It is a very good machine and I am sure it will be a great help to the maize grower in the future.

COOPER'S IMPROVED CATTLE DIP

A soluble uniform fluid. HELPS ALL TICKS. An excellent skin tonic. No residue left. Four straight into bath. Keeps good in the tank.

Cooper's Improved Cattle Dip has been employed successfully in Africa since 1912. It is still unique. No other manufacturer has been able to produce even a possible imitation. This dip kills every tick within a few days of the dipping, without causing the slightest injury to the animal.

Cooper's Improved Cattle Dip contains in the solution less arsenic than other dips; it is therefore safer to use. It does not depend upon its arsenic content for the destruction of ticks, this being combined with ingredients which prevent sealing and assist the tick-killing qualities.
