ANXIETY ABOUT COLONIAL COST OF LIVING

In the House of Commons on July 12 Mr. Creese asked the Secretary of State for the Colonies whether consideration was being given to the increasing anxiety of the Colonial civil servants in respect of the cost of living and whether representations had been received by the local Governments and Ministers on these and cognate matters; whether funds had been made available; and whether steps had been taken to restrict Colonial salaries...

CORRESPONDENCE

THE 1941 LOAN

To the Editor, "E.A. Standard"
 Sir—Under the heading of 1941 Loan, there appears an item—Sinking Fund—where it is stated that this sum is towards repaying the 1941 Loan?

If so, is this money kept in the same name of the Kenya Treasury? Or has this money been lent to a bank and if so, how much interest, if any does the bank pay out?

In what form and where does this money lie?

A further item appears: Estimates A172252.

I took four months to raise the loan in the City of London. How many people were employed on raising the loan during those four months, and what did they do to draw such an enormous wage?

Are the expenses of borrowing money in Kenya as heavy as in the expenses of borrowing money in London?

I believe that the people of Kenya have already lent £2,000,000 towards raising the war while the British Government borrows money from the United States.

Why do we not take our own local money and lend it to ourselves?

Major attractions like that which we only need a further £2,000,000 to build up, reliable persons like that which we only need a further £2,000,000 to build up, investments in the country awaiting money to start to organize now, we should be quite ready to repay in 1946.

Yours etc.

EGGS AND POULTRY

To the Editor, "E.A. Standard"
 Sir—Some time there was certain amount of correspondence in your paper on the egg shortage being in the poultry business in Kenya. It is interesting to observe the pressure of work was mainly in the hands of the Government.

Some of your correspondents put the shortage down to the time of year. With this I am unable to agree. I would like to have had the right time of the year and we felt we were managed well produce eggs wherever they are required. I have kept very careful records over a number of years and have found that the months of May, June and July are as good as any for egg production. The chief reason for the shortage of eggs is an over-reliance on the Government.

Poverty has also given rise to the increasing mortality among native women which we are helplessly watching with the sad realization that the only thing which is to be done is to give relief which is a temporary measure. It is interesting to observe the pressure of work was mainly in the hands of the Government.

TWO First Prizes for Rodger

"When our golden babe won two First Prizes at a recent New Zealand Show it was largely because of the quality of the milk which she produced. For this reason, and for other very good reasons, Mrs. J. B. Rodger, of Cambridge, Ontario, has been awarded two first prizes for her milk."

by never again thinking that a single case is harmless, they look in the skin, no matter how small, is a widespread gateway to germs of epidemic infection. It is distinguished in one with 'Detrol', this will prevent blood poisoning and further suffering.

Do not think that the efficiency of a germicide is dependent upon its bactericidal results, deep cleaning action, or poisonous nature. None of these properties need be associated with the power to arrest the spread of infection. 'Detrol' is not poisonous. It is a clear, clean fluid with a pleasant smell, and does not even stain linens. Yet against germs, this agreeable 'Detrol' is several times more effective than pure carbolic acid.

That is why it is used in the surgical and maternity wards of great hospitals, and why you should employ its pleasant and powerful protection in your own home.

seen to have no more than
a few seconds to run before
it exploded in mid-air.
The spotter was killed.

ANOTHER MAIL TRIK

R.A.F. officers had ground force
troops against the flying bombs.
Two sharp attacks were made,
the second being the most serious.
The flying bombs were
being sent by a half a dozen
aircraft at the same time. In
order to avoid being hit the
aircraft were sent in pairs and
the flying bombs were sent in
pairs. One flying bomb was
seen to have exploded in mid-air
just after the bomb had been
sent but no more than half a dozen
were seen.
