And calling for a bundle of sticks he commanded them each by one to try if they could cut any of them break it. They all tried but to no purpose, for the sticks being closely bound together it was impossible for them to do so. After this he ordered the bundle to be unloosed and gave a single stick to each of his sons, bidding each to try and break it; this they did with all imaginable ease.

It was like a miracle, in 1920, when Goodrich went trying to make more transport vans before its big-truck tires. Advertising, demonstrations, speeches, rallies, articles—every possible means of bringing home the value of the pneumatic type was tried. But the distribution of pneumatic tires was slow. Goodrich eventually called their product "Big Pneumatics" but none of the heavy-duty tires of the time thought them so important that they distributed them as "GIANTS". As Goodrich began developing "GIANTS" too, and even more than Giant Pneumatics they have been. And it should be recognized that they demonstrate, introduction and pioneering by Goodrich revolutionized the whole field of road transport and lighter vehicles. The pneumatic efficiency of the modern motor vehicle.

And called for a bundle of sticks he surrounded them one by one to try if they could any of them break it. They all tried but to no purpose, for the sticks being closely bound together it was impossible for them to do so. After this he ordered the bundle to be unbound and gave a single stick to each of his sons, holding each to try and break it; this they did with all imaginable ease.

"O my boys, behold the power of unity!" said Aesop's "Old Man" in the 7th century B.C. against the disunity of purpose in his allegory. In 1947 the K.P.A. was founded adopting the same wise precept as "Unity is Strength" to assist the farmers of East Africa forward with a complete programme of better farming and the establishment of the quality of East African produce in the world's markets.

FOOTBALL: THE POSITIONS IN THE LEAGUES

Still Distinct Possibility Of "Double" For Manchester

MANCHESTER—Manchester United and Liverpool have both secured positions in the League which will give them a distinct possibility of winning the title this season.

Manchester United, who led the League with 20 points from 10 matches, are still in the lead, but Liverpool, who have 19 points from 10 matches, are still in the running. A goal by goalkeeper Legh, scored in the 82nd minute of the match, was a surprise, but it was not a surprise to the Manchester United supporters who were confident that their goalkeeper would keep a clean sheet.

The match was a closely fought affair, but Manchester United emerged as the victors, 1-0. Liverpool, who had been expected to win, were disappointed. The result has put Manchester United 4 points ahead of Liverpool, who are still in the running.

Round the bend

Taking corners at speed was a waste of tyre, a strain on the chassis, and a danger to life and limb even in 1935. Nowadays, of course, the wire is an unbreakable one—your car is probably not quite so young as it was, and chassis and struts might easily break something you can't replace. Tyres today are not yet of pre-war quality and to round the bend at high speed is a hideous distortion which is liable to tear off the rubber and weaken the walls to the extent of putting your tyres before the aid of "Tyrosol". Taking corners at speed is sheer madness, so change down, round the bend steadily and allow pedestrians and your tyres to live to a ripe old age.

You can "Tyrosol" your tyres again and again because the process does them no possible harm. "Tyrosoling", by the way, is part of the ... Motor Mart Service.
