What Price Loveliness?

Elizabeth Arden has proved that loveliness can be yours with the greatest economy if these simple rules are followed:

Don't experiment with your skin; use preparations that are made by a real woman who tests them on herself and uses them constantly in her Salons throughout the world. With Elizabeth Arden's preparations, supervised by Miss Arden herself, results are assured. Her regular use gives loveliness, purity and softness, and the ingredients are so concentrated that a little goes a long way. Ask for her booklet which tells you exactly what to do.

Great Britain's Biggest Air Estimates Presented

REBUILDING STRENGTH OF THE FORCE

Far Greater Striking Power of the New Machines

RUSH OF RECRUITS

Valuable Co-operation by the Dominion Governments

Introducing the Air Estimates in the House of Commons on Monday afternoon, Sir Philip Spender emphasised that the Government had not abandoned the hope of securing an Air Pact and the general stabilisation of air armaments, but until such an opportunity offered there was no alternative but to proceed with their expansion plans.

The striking power of the new types of aircraft now being provided, far exceeded that of machines in use until comparatively recently. Research and development were continuing on with a view to obtaining machines of even greater speed, range and capacity.

Reference was made to the big progress being made with Empire air services and it was hoped the complete scheme of flying boat services to Africa would be in operation early this summer.

Replying to the debate, Sir Thomas Inskip said there was no reason to suppose that the programme contemplated up to the end of 1959 would not be completed in time.

CONSTANT RESEARCH

(Reuters and British Official Wireless Service)

London, March 16.—The highest estimate of the cost of the programme presented to Parliament was £182,500,000, including the loan provision, compared with £138,000,000 asked for by the Government in the Budget. It shows an increase of over £44,500,000 on the total estimate of 1956.

As regards the way in which the programme is being financed, Sir Philip Spender said that the Government was not at all dependent on the aid of any other Government.

NIGHT-LONG WATCH OF BANKS IN FEN DISTRICT

Awaiting a Crisis

Evacuations are being taken against the danger of extensive flooding in the Fen district.

MAKING THE AFRICAN A USEFUL CITIZEN

SOCIAL SERVICES

IMPORTANCE OF EDUCATION AND VOCATIONAL TRAINING

What is being done in Nairobi to make of the African a good and useful citizen? This is a question often asked and answered in general terms. It is, "Everything possible with the personnel and finances available. Both Government and unofficial bodies are doing their share."

Government School at Pumwani

The Government African School at Pumwani, rebuilt about a year ago and now accommodating approximately 100 scholars, has recently taken to perform, only aided by the general services of the African to learn and his attitude to primary education.

Vocational Training

In instituting Government's educational activities, the Government has been successful in making the African go for vocational training. This, however, is not the only method of training the African.

The Bow Shop

While not strictly either industrial or social, it is claimed that the Municipal Bow Shop, which is engaged in the prevention of roach-bait, will benefit and such-like services to the community.

Departmental Restriction

Public activities by Government, particularly those organized by various departments include the Medical Training Institute where natives are trained as dentists, hospital orderlies, industrial workers and so forth, and the Agricultural School at Pumwani, where the aim is to provide vocational training for the African.

Native Affairs Officer

A Municipal Native Affairs Officer, seconded from the Government administrative service, is to be appointed to the Pumwani Native Affairs Office. He will be responsible for the welfare of the African in the Pumwani area.

AFRICAN CIVIL SERVICE CONDITIONS

To the Editor, "E.A. Standard,"
Sir—Kindly allow me a few lines in your valuable columns to comment on the conditions lately reported in Uganda by Dr. Wilson, Secretary of the African Commission, with all respect to the good sense of what he has reported on Uganda. I am interested in them that according to my own view, and at Makerere College, that education is not in itself a means to make people rich but a means to make them better. Education is what African life should be. I should like to see the conditions that have been reported in Uganda. I am interested in them that according to my own view, and at Makerere College, that education is not in itself a means to make people rich but a means to make them better. Education is what African life should be. I should like to see the conditions that have been reported in Uganda.

Government (Industrial) under the Temple Entry Bill. To my mind, the trouble is not with the Industrial Commission but Mr. O'Brien's attitude to Indians in this Colony that with the help of the Commission and which would be of great use to the Government. COOLER BUILDINGS

During the excessive heat which has been experienced during the last few months, here often has a remark been made expressing a wish that it was cooler.

Few persons realize that the temperature of a building can be reduced, not only by the installation of a best roofing type of glass in the windows of the structure.

Colours can be achieved by the use of "Colours" glass which cuts off 80 per cent of the heat from the Sun, while transmitting about 60 per cent of the light.

Representatives for the Manufacturers of this glass are Messrs. Banks and Co., Ltd., while stocks are always held by Messrs. Idemcocks Ltd.—Adv.

Miss Elizabeth Ord-Watt.

Away back near the beginning of January, I packed my trunk and set out for my first expedition.

I was going Home and I wanted to go by road. I want and had the travel agent say...

There was the Nairobi Road and there was the Nairobi Road. But you haven't got a car and this is the rainy season.

The only thing against ill-health was the average African fare in a thing with two hand-walks was not a fault but a feature.

We set out from Nairobi with three days provisions for a two-day journey. The rain came and on the first evening...

At the end of the Lake I found the floods on every side and my horse was almost drowned.

"WHY SHOULD NOT MAPS BE RE-EDITED IN GERMANY FROM TIME TO TIME WITH, IN EACH SUCCESSIVE EDITION, A FURTHER PORTION OF THE BRITISH EMPIRE COLOURED THE SAME AND NOBODY IN THAT COUNTRY, OWING TO THE CONTROL OF THE PRESS, WOULD BE AWARE THAT THE POSSESSION OF THEM EXISTED IN SHADOW RATHER THAN IN SUBSTANCE?"

— Miss Thelma Cazell, M.P., in the "News-Chronicle."

RESOLUTION OF COLONIAL CONTROVERSY

There are the usual number of heated references to East Africa in the Overseas Press, ranging from negative statements to praise.

The majority of English newspapers published the statement of the Hon. Mr. J. H. Chamberlain, Secretary of State for the Colonies, in which he stated that the British Government was not prepared to discuss the question of the return of the German colonies to Germany.

Most of the papers in the Colonies have been favourable to the British position, but some have been more sympathetic to the German cause.

These territories would then be added to Germany on the map, and it is to be expected that the next edition of the map will show the German colonies as part of Germany.

The Development of Native Agriculture in the Nyanza Province

Most important of the reasons of Nyanza Province is the fact that the vast majority of the three Nyanza provinces are still in the primitive stage of development. The population of over a million people is still dependent on a few kinds of primitive agriculture. The population of over a million people is still dependent on a few kinds of primitive agriculture. The population of over a million people is still dependent on a few kinds of primitive agriculture.

THE Government has been devoting considerable attention to the development of native agriculture in the Nyanza Province. This has been done through the establishment of various agricultural departments and the provision of technical assistance to the farmers.

One of the main problems in the development of native agriculture is the lack of modern farming equipment. The Government has been working to provide the farmers with the necessary tools and machinery to improve their yields.

Another major challenge is the lack of access to markets and transport facilities. The Government is working to improve the roads and build more markets to help the farmers sell their produce.

The Government is also providing training and extension services to the farmers. This includes teaching them modern farming techniques and how to use fertilizers and pesticides effectively.

With continued government support and the cooperation of the farmers, the agriculture in the Nyanza Province is expected to develop significantly in the coming years.

Round The Bridge Table

The following interesting deal was recently played at the "Country Club" in Nairobi. The deal was as follows:

♠ A Q J 10 9 8 7 6 5 4 3 2
♥ K 8 7 6 5 4 3 2
♦ A Q J 10 9 8 7 6 5 4 3 2
♣ K 8 7 6 5 4 3 2

West opened with 1♠. East responded with 2♠. South made 2♠. The deal was a classic example of a "Round The Bridge" deal, where the declarer's hand is very weak but they manage to make the contract.

KENNEL NOTES

By Margaret Colyer

I have received a letter from Mrs. Jones of the Nairobi Club who is giving them after the usual time, during the winter months, to a system of wavy hair. Certain cases of poisoning, especially in the form of a rash on the face, are common in the winter months. The first sign is a redness of the face, which is usually accompanied by a fever and a loss of appetite.

The color of the stomach is very important in many cases of poisoning. It is usually a pale yellow or green. The color of the stool is also important. It is usually a pale yellow or green. The color of the urine is also important. It is usually a pale yellow or green.

The Spanish Civil War

REBEL ADVANCE ON MADRID CHECKED

"Openly Fighting Against Italy"

"We are openly fighting against Italy," declared General Miaja, commanding Madrid defences to-day. It is officially declared that there are several Italian Blackshirt divisions and one Italian regular army division on the division of Italian Generals under supreme command of General Mazini.

The Government claim that in a counter-attack on the insurgent position between Brihuega and Valdearenas they regained ground which they had lost and inflicted terrific losses on the Insurgents.

The Insurgent headquarters at Salamanca declares that despite snowstorms and freezing cold the big Insurgent push to surround Madrid was proceeding. After the capture of Brihuega two Insurgent columns set out north-west and south with the object of linking up with the Insurgents in the Guadarrama mountains on one flank and Toledo on the other.

General Miaja

From Abyssinia to Spain

replied, "We have been considering the matter this morning at the Home Office, and the Home Secretary has authorized us to say that with Max Wilkinson's assurance with regard to this Committee meeting and its nature he will be prepared to withdraw his name. In reply to a further question, whether in the case of Mr. Vaelt, the only member of the Committee whose name he had intended to withdraw to-morrow morning, Mr. Lloyd George said that he might possibly do so, but he could not say for certain."

It is asserted that the forces on the front include four regular divisions of the Italian army with special troops, which include black German and Italian technicians, and four companies of engineers.

The Insurgents claim that they advance a continuing, while according to the Government a line has been established. The Insurgents were ordered to the Government's line from Guadalupe and that steady progress is being made by three Italian divisions and 400 soldiers, the hero of the defence of Toledo.
