This was the conviction of Mr. P. M. van der Byl, secretary of the Federation of Rhodesia and Nyasaland, who was in Nairobi this week on his way to Europe.

Mr. van der Byl said that his country was the only one in the world where the industrial base was not in the hands of a few big concerns.

TROOPS STAND BY IN BERLIN

Ready for May Day trouble

SOUTH AFRICA PROHIBITS RED DEMONSTRATIONS TODAY

GERMANY and Berlin in particular seems to be the critical point of today's May Day celebrations planned by Communist and anti-Communist forces of many countries.

Three hundred British troops in full battle order and equipped with gas masks will be part of three British battalions and 5,000 United States troops standing by in the Western sectors of West Berlin. They will form into a serious clash between the Communists of East Berlin and the people of West Berlin.

Another British battalion and 1,000 United States troops will be in the Western sectors of Germany if necessary. But the West British have been told that this is their big battle day to prove they can cope with Communist demonstrators.

SINGAPORE GOVERNOR'S ESCAPE

Would-be assassin throws grenade

SIR FRANKLIN GIMSON, Governor of Singapore, escaped serious injury when a grenade was thrown at him on Friday night in a Communist attempt to assassinate him.

The assassin, a Communist, threw the grenade at Governor Gimson as he was leaving his residence. The grenade exploded, but did not hit Governor Gimson.

The assassin was seen to flee the scene. He was later captured and is being held in a prison. Governor Gimson was treated for a few minutes but was not seriously injured.

NO PROVOCATION

Starting last night 9 o'clock with a fanfare of trumpets by Communist forces, the anti-Communist forces fired thousands of rounds of small arms as well as Communist propaganda tractors to "mattalised" the Communist forces.

SOUTH AFRICA NOW DOESN'T NEED A SECOND LONDON LOAN

SOUTH AFRICA is believed to have quietly shaved her plan to float a second £20 million loan on the London market. Thanks to the great inflow of capital from Britain, the United States and Switzerland, reserves both of sterling and gold have risen so strikingly that she no longer needs another loan.

Under an arrangement made when visited London last summer, South Africa and the United States have agreed to sell a certain amount of gold in London each of 1933, 1934, 1935 and 1936. This is a new departure in the history of the world's gold market. The amount of gold to be sold each year will be worked out as the need arises. It is expected that the sale of gold will be sufficient to meet the needs of the country for the next five years.

Sugar price up from 34 to 40 cents a pound

The Kenya Prices' Controller has announced that the maximum controlled price of sugar will be increased today in the Kenya to 40 cents a pound.

The reason given is that East African sugar is not sufficient to meet the demand of the Colony and that the Government has authorized an increase of 23 per cent in the price of sugar.

The cost of imported sugar is considerably higher than that of the local crop. It is estimated that this increase will result in an increase of 10 per cent in the price of sugar.

DEVELOPMENT OF THE LUKKO

An unofficial majority

THE KABAKA AND THE RESIDENT EXPLAIN THE CHANGES

IMPORTANT changes in the constitution of the Native Parliament (for Lukko) of the Buganda Province of the Uganda Protectorate were announced at the first session of the Lukko at Mengo, Kampala. The purpose is to give the people direct representation in the Native Parliament by broadening the basis of providing a proportion to be elected and others chosen by District Councils.

The Highness the Kabaka, who opened the session, recalled that he had previously announced that a change in the electoral law was contemplated. This law was now under preparation and would be deliberated upon at the next session.

What will strike you most in the amendment? The Kabaka went on. It will be the increased, non-official membership which will provide an unofficial majority. The period of membership is also extended from one to three years.

It is out of this law which will bring on to the Lukko those people most suited to be of use to it.

AN AMERICAN CAR THAT LASTS TOO LONG

The recent British automobile show at the Grand Central Palace, New York, has been a highlight of our admiration abroad and the only first-hand proof of the fact that the export target of 20,000 cars a year to America represents about a fortnight's production of the Chevrolet factory.

But the means of visitors who have seen the exhibits could not fail to notice the representatives that we will have plenty to choose from the American export to Canada, a selling point in the States. Americans don't like to see the best of their cars in the hands of the British. They are a nation of car-lovers and their cars are a part of their lives. They are a nation of car-lovers and their cars are a part of their lives. They are a nation of car-lovers and their cars are a part of their lives.

Points for the British exporter to keep in mind

Knowledge of British requirements and conditions in many cases are constructive and in some instances, it is a fair average of the requirements of the British market. The lives of the British car-lover are not so much concerned with anti-social and the research experts of existing cars. Democracy In Uganda

It has been clear for some time that the Uganda people are in a state of rapid development, and a rapid pace is being maintained.

A GOOD CRICKET SEASON REVIEWED

Most successful one since pre-war years

Review of the past season, written by a representative cricketing authority, is on the late side, but it is a review that could not be completed until the County averages had been presented and signed. It will, however, interest most players whose cricketing enthusiasm is rarely at its ebb.

It is probably fair to contend that the last season was one of the best since pre-war days, and that the County averages have been the best since then. The batting averages were the best since 1928, and the bowling averages the best since 1929. There was a great deal of cricket in Kenya, and the season was a very successful one.

It is a pity that the season was not longer, and that the County averages were not presented earlier. It is a pity that the season was not longer, and that the County averages were not presented earlier.

THE THOROUGHBRED IS A TRUE BRITON

In the 19th century the people of Britain, unhampered by any artificial barrier, were tired of proclaiming that the United Kingdom was the best of the world. It was a very comforting saying and broadly speaking, it was a true one. It was not until the 20th century that the British stock, whether horse, cattle, sheep or pig, rapidly became the world over.

It is very considerable, as it is a matter of small breeders—many of whom are almost everywhere with a few blood names and a few pure lines of descent. The products of the breeding of these animals correspond to the needs of the various countries and the various climates in which they are bred.

The cycle
The cycle of production is that the stock, which has a breeding cycle of two years, is bred in the first year, and the stock is bred in the second year. The stock is bred in the first year, and the stock is bred in the second year. The stock is bred in the first year, and the stock is bred in the second year.
