Delegates of State arrive for today's summit

Organisational for African Unity postponed until today, delegates of the A.A.U. Political Committee reconvened and further behind as time table.

Dar police in brawl on way from Peking

THIRTY Tanzanian marine policemen on their way home from Peking beat up two Press photographers at Addis Ababa and struggled and argued with Ethiopian police, according to news agency reports. The reports are to be investigated by the authorities in Dar es Salaam today.

SECOND WIN FOR PAKISTAN

Reserves show up well in 'minor test'

PAKISTAN registered the second win of their tour of Kenya when they defeated a K.A.F.C. Reserves XI 14 at the City Park Stadium yesterday evening. Pakistan had led at the interval. Pakistan made seven changes from their 'Test' side with one positional change, while the Reserves XI had only two players from last week's Kenya Tour side.

Coast game off

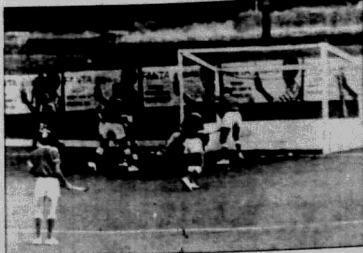

The scheduled match between the Coast and Kenya XI was postponed because of rain. The match is expected to take place on Saturday.

The Kenya XI will play against the Coast XI on Saturday at the City Park Stadium.

Brazil beat U.S. in Davis Cup.

Kenya growing 60 p.c. of world's pyrethrum
Nairobi, Kenya, Nov. 15.—Kenya is now producing 60 per cent of the world's supply of pyrethrum, a natural insecticide, according to a report from the Kenya Agricultural Research Institute.

The institute, which is based in Nairobi, has been conducting research into the cultivation of pyrethrum for several years. It has found that the climate and soil conditions in Kenya are ideal for the growth of the plant.

The institute's research has shown that pyrethrum can be grown in a variety of soils and climates. It is particularly well suited to the high-altitude areas of Kenya, where the climate is cool and the soil is rich in organic matter.

The institute's research has also shown that pyrethrum is a natural insecticide, which means that it is safe for use on food crops. It is also biodegradable, which means that it does not persist in the environment.

The institute's research has led to the development of a number of new pyrethrum varieties, which are now being grown in Kenya. These varieties are more resistant to disease and pests than the traditional varieties, and they produce a higher yield of pyrethrum.

The institute's research has also led to the development of a number of new pyrethrum products, which are now being marketed in Kenya. These products are more effective than the traditional products, and they are also easier to use.

The institute's research has led to a significant increase in the production of pyrethrum in Kenya. This has helped to reduce the country's dependence on imported pyrethrum, and it has also helped to create new jobs in the agricultural sector.

Control
Aid of £1,500 granted for self-help
Nairobi, Kenya, Nov. 15.—A grant of £1,500 has been granted to the Kenya Self-Help Association to assist in the construction of a new self-help housing scheme in Nairobi.

The grant was awarded by the Kenya Government, and it will be used to purchase materials and pay for the services of a contractor. The self-help housing scheme is a project in which the residents of the scheme are involved in the construction of their own homes.

The self-help housing scheme is a project in which the residents of the scheme are involved in the construction of their own homes. The scheme is a project in which the residents of the scheme are involved in the construction of their own homes.

OPEN GOLF TOURNAMENT PLANNED

£3,000 prize money
from local firm

KENYA will hold its first Open golf tournament next year — subject to approval by the National Council of Sport. The tournament will be open to professionals all over the world and to amateur players with handicaps of three or under. The prize money, put up by a prominent local firm, will be £3,000.
