It makes you feel different; your hands reach the Transvaal when laughing or roaring. You're old of that ridiculous help-up pad because the legs. And since Transvaal is only a fraction the size of an external pad, disposal just isn't a problem any more. Transvaal is made of surgical cotton is blow-dry application. THE SCRUM

The scrum is a fundamental part of rugby. It is a contest between two teams to gain possession of the ball. The players bind together and push against each other. The team that gains possession can then attempt to score a try.

IN FIG FLATTE

By ELIZABETH BARRERS

Pierre Balmain believes that a woman need not have a single extra pound of flesh to look like a goddess. He has shown us, in his latest collection, that a woman can be as slim as a reed and as beautiful as a queen.

But throughout the history of the fashion world, Balmain has been a pioneer. He has shown us that a woman can be as slim as a reed and as beautiful as a queen. He has shown us that a woman can be as slim as a reed and as beautiful as a queen.

LADYLIKE APPROACH
He is the ladylike but in a feminine, sophisticated way.

CONFIDENT YOUTH
He had all the confidence of youth, but not the restlessness of youth.

Without hesitating he went to the heart of the matter and found that the woman of today is not a woman of today.

BUSINESS RIVALS
Young Balmain was almost to admit the great difference between the fashion world of today and the fashion world of yesterday.

There are two main reasons why the fashion world of today is not the fashion world of yesterday.

EXPERT ADVICE
Large Paris department stores have organized special apparel departments, where changes are made to suit the needs of the customer.

Many high-fashion hats are not elegant, but are practical. They are made of materials that are easy to care for.

BELL SKIRT FOR DANCING
The new bell skirt for dancing is a masterpiece of design. It is made of a material that is both soft and strong.

The car runs quietly and easily. You give efficiency up for nothing. You can feel your ear rest better on Supershell - and you realize why. The reason's simple. Supershell has the power-mercury touch. It also has I.C.A., which is worth its weight in gold. I.C.A. keeps pistons smooth by removing carbon deposits on combustion chambers and on push-rod pins. It is used in modern high compression engines. So always get Supershell with I.C.A., the power for full, smooth power. And remember, if you see the Shell - that's the I.C.A. too.

PLAN AHEAD TO BRING UP PUPPIES

By M. G. VIDOR

MANY times I have been asked about rearing puppies and how to get them away from the street from the day they are born. Feed them all the proper things and give them proper attention.

After three weeks, and again six days later, also should be given a dose of penicillin and streptomycin and ground-roast. I always use Contaminol against the former and Santarin against the latter. It is essential to keep the pups clean and dry. They should be kept in a warm place and fed with milk. They should be kept in a warm place and fed with milk.

SELECT COMMITTEE TO STUDY RULING ON MAIZE BILL DEMANDED

Concern at powers of marketing board DEBATE ADJOURNED

DEMANDS for the setting-up of a Select Committee to examine the Maize Marketing Bill were made in Kenya Legislative Council yesterday when the Bill was presented for the second reading.

Several Members claimed that the appointment of such a committee was necessary because of the complicated nature of the Bill which could not be adequately considered by the Council in committee.

The debate on the second reading, moved by the Minister for Agriculture, Mr. Hunsdon, was adjourned till Tuesday. The principal objects of the Bill is to vest the marketing of maize in a marketing board with comprehensive functions "for the betterment of the maize crop."

Amendment proposed

Notice of a proposed amendment was given by Mr. Ringold, who said that "because of suspicion that the marketing board would merely be a Maize Control, or another rating he had decided to propose an amendment to the committee stage, so that the Board should appoint agents open to the agreement of the Minister."

Mr. Hunsdon replied that the Bill was not intended to set up an extreme form of control but was being drafted in the proper hand and the question arose of whether it was really necessary. No provision had been made in providing facilities to producers to criticize possible proposals for explanation from it.

LOOKING BACK ON THE KENYA ROYAL TOUR

THE KENYA ROYAL TOUR... 1952

An enthusiastic welcome wherever she went—that was the Queen Mother's experience during her two-week tour of Kenya. The Masai or "haka" danced "with joy" for the Queen Mother heralded the arrival of long-awaited rain; the farming people of Equator cheered as loudly as any during the Royal train's whistle-stop; and in the up-country towns of Eldoret and Nyeri large crowds gathered to greet the Queen Mother.

Returning to Eldoret from Kamau on Sunday, the Queen Mother had a picnic tea at this lovely spot in the Elgeyo Escarpment, where she is seen with the Governor, Sir Evelyn Baring. Right: With the District Commissioner, Mr. A. B. Simpson, and Mrs. Simpson, the Queen Mother was attending a reception at the District House in Kisumu. Below: The Queen Mother inspects some of the prize cattle at the Western Kenya Show at Eldoret.

Remember these facts when you order spare parts

- There's only one reliable source for Caterpillar machine parts of original quality — your Caterpillar Dealer. He's your authorized dealer in this area.
- Caterpillar alone has the experience in research, development and manufacturing techniques to produce the parts that work best and last longest.

To be sure of proper performance and long life, remember that there are no bargains in Caterpillar parts. Only Caterpillar parts of original quality — guaranteed and expertly made — will give you the maximum life from your Caterpillar engine.
