"JOURNEY TOGETHER"

The film this week at the Theatre Royal "Journey Together" comes out in a horse circle. It is similar to "The Way Ahead," only it is an R.A.F. story produced and acted by the R.A.F. except for Edward G. Robinson who takes the part of an instructor at a Californian flying school. The big theme is the training of a bomber crew. The personal stories deals with a young engineer, a tender-hearted pilot, and a young Cockney who join the R.A.F. This is the first film at which British people are good. The photography is first-class, the music is magnificent. The popular playwright, Terence Hanlon, had a hand in making the film and the R.A.F. symphony orchestra provides background music which all add to its attractions.

COOPER'S IMPROVED CATTLE DIP

A soluble uniform fluid. KILLS ALL TICKS. An excellent skin tonic. No tedious mixing. Pour straight into bath. Keeps good in the tank.

Cooper's Improved Cattle Dip has been employed successfully in Africa since 1912; in 1946 it is still unique. No other manufacturer has been able to produce even a possible imitation. This dip kills every tick within a few days of the dipping, without causing the slightest injury to the animals.

Cooper's Improved Cattle Dip contains in the solution less arsenic than other dips. It is therefore safer to use. It does not depend only upon its arsenic content for the destruction of ticks, this being combined with ingredients which prevents scalding and assist the tick-destroying qualities.

DIETARY FARMING NOTES: CHERANGANI

With the end of May at hand the rural district of Cherangani is completed. The rural district has been established by the Government and the land has been irrigated, and the district has been divided into 11 sub-districts. The total rainfall in the year 1945 was 111.5 inches. The work of cultivating the sound maize crop is well ahead of schedule. The most critical and the stage of labour appears to be generally adequate. There is no danger of shortage of certain classes of labour, such as seeders, cultivators, and planters. It is being aggravated by the prohibition placed on the import of labour coming into the district and the proposed reduction of existing agricultural labour causing widespread dissatisfaction. Some farmers will go out of production. In all equatorial areas, there have been several new settlements in the Cherangani area, and to one and all we extend a very hearty welcome. There are still some excellent farms for disposal, but I fear that requests for these farms will be made regarding most of them.

ACREAGE GRANTS FOR MAIZE

One of the measures taken early in 1946 to stimulate the production of maize was to introduce acreage grants for the first 100 acres of the 7500 acre farms for all those farmers who had planted maize in 1945. This payment was repeated for maize planted in 1946 and 1947. The Commission of District Production and the Commission of District Development have announced that the maize acreage grant will be extended to 1000 acres of maize planted in 1946 and 1947. The grant will be 7500 Shs. 15.00 an acre for every acre of maize planted in excess of 80 acres. The rate of the grant was reconsidered and the approval of the Government has been obtained to the payment of Shs. 100.00 an acre for every acre planted in excess of 80 acres in 1946 and 1947. The grant will be planted and cultivated in accordance with the rules of government.

Coffee Payments

The Coffee Board of Kenya has been informed that the following amounts will be paid to farmers received at the mills for coffee beans during the 1945-46 season: ... After the coffee has been milled, it is packed in 60 lb. bags and is delivered to the mill. The coffee is then packed in 60 lb. bags, according to classification, and is delivered to the mill.

Opening of Coffee Curing Mills

The Coffee Board of Kenya has been informed that the East African Coffee Curing Company will open their mills on 1st September. The mills will be open for the storage and curing of coffee beans and will be prepared to receive coffee beans from all sources.

THE BRITISH WAY
 At a time when the British Government and the Government of Kenya are engaged in a struggle to bring about an acceptable and amicable settlement of the Kenya problem, it is interesting to note that the "West" press is attempting to present a distorted picture of the situation in Kenya. This is done by the use of the word "British" in a derogatory sense, and by the use of the word "Kenya" in a derogatory sense. The British Government is not a "British" Government, it is a "British" Government. The Government of Kenya is not a "Kenyan" Government, it is a "Kenyan" Government. The British Government is not a "British" Government, it is a "British" Government. The Government of Kenya is not a "Kenyan" Government, it is a "Kenyan" Government.

Town Council's Final Policy
 There was great interest in the Town Council's final policy on the Kenya problem, which was adopted on Thursday, June 14, 1946. The Council has decided to support the British Government's policy of a "British" Kenya, and to oppose the Government of Kenya's policy of a "Kenyan" Kenya. This decision is a significant one, as it shows the Town Council's support for the British Government's policy of a "British" Kenya, and its opposition to the Government of Kenya's policy of a "Kenyan" Kenya.

WAR HELPED KENYA COFFEE
 A report from the Kenya Coffee Board, which was published in the Standard on Friday, June 14, 1946, shows that the war has had a beneficial effect on the Kenya coffee industry. The report states that the total production of coffee in Kenya for the year 1945 was 1,200,000 cwt., which is a record for the industry. This increase in production is due to the fact that the war has led to an increase in the demand for coffee, and to an increase in the area under cultivation.

THE CHILDREN'S HOSPITAL FUND
 The Kenya Children's Hospital Fund, which was established in 1944, has received a grant of £3,730 from the Government of Kenya. This grant is the largest ever received by the fund, and it will be used to purchase medical equipment and to pay the salaries of the staff. The fund is a voluntary organization, and it has received many donations from the public.

Municipal Breweries
 The Municipal Council has decided to sell the Municipal Breweries to a private concern. This decision is a significant one, as it shows the Council's support for the private sector, and its opposition to the public sector. The Council has decided to sell the breweries to a private concern, and to receive a sum of money for the purchase price. This money will be used to pay the salaries of the staff, and to purchase medical equipment.

Correspondence
 The Editor of the Standard has received many letters from readers, and he has published many of them. These letters deal with a wide range of topics, including the Kenya problem, the war, and the economy. The Editor has published these letters because he believes that they are of interest to the public, and because they provide a valuable opportunity for readers to express their views on current events.

The union is a voluntary organization, and it has received many donations from the public.

HEAVY TAXATION IN SEYCHELLES

STANDARD CORRESPONDENT

THE general taxation levied upon the Seychelles, June 15, brought more prominently before the public the realization of the unusually heavy incidence of the tax. The Government is anxious that the public should be made aware of the fact that the tax is not levied upon the goods themselves, but upon the profits of the business. This is a fact which is not generally known, and it is one which is of great importance to the public.

Following are the weekly weather forecasts issued by the East African Meteorological Office for the period ending yesterday morning. The period of low pressure north of the Mozambique Channel during the latter part of the period showed slow movement westward and was not until the latter part of the period that it was replaced by a strengthening and westward movement.

An intense high-pressure system is moving westward from the Indian Ocean and is expected to reach the East African coast during the latter part of the week. This will bring with it a change to a more settled and generally milder weather.

Over Southern Uganda there will be afternoon and evening thundershowers with some increase in intensity during the latter part of the period. In the remainder of Uganda, there will be a more settled weather with some light rain during the latter part of the period.

The East African Meteorological Office forecasts for the latter part of the week: East Africa: generally settled with some afternoon showers. Over Southern Uganda: afternoon and evening thundershowers.
