122, LEADENHALL STREET, E.C.3

A 4680

GENERAL TRADERS OF AFRICAN WHARFAGE CO., LTD. AND AFRICAN MARINE & GENERAL
ENGINEERING CO., LTD. MOMBASA AGENTS FOR BRITISH INDIA STEAM NAVIGATION CO.

The spectacular ruins at Great Zimbabwe present archaeologists with an intriguing puzzle. When and by whom they were built has yet to be firmly established but all agree that the ruins are surrounded by extensive works which once the mines of gold took place on a large scale.

In the romantic explanation suggested by some, Great Zimbabwe lay the greatest goldfields of the ancient world. King Solomon's Mines from which was obtained the gold used in the adornment of the Great Temple in Jerusalem. Another theory claims the ruins a Bantu work of the 11th or 12th century A.D., when Zimbabwe may have served as a centre for the gold trade with the Moors and others.

Whatever their origin, the ruins remain an interesting link in the history of mining in Southern Rhodesia. Today the mining of gold, chrome and coal continues to contribute to the prosperity of the country, and up-to-date information from our branches in Southern Rhodesia covering the mining industry and other commercial activities is readily obtainable on request.

BARCLAYS BANK (DOMINION, COLONIAL AND OVERSEAS)

HEAD OFFICE: 54 LOMBARD STREET, LONDON, E.C. 2

STEEL & TIMBER IN SHORT SUPPLY

**THE
ALUMINIUM
ALLOY
and
PLASTICS**

• TAN Goldfield

THE EXTRAORDINARY GENERAL MEETING OF THE Goldfield Ltd., held in London on Friday last, was adjourned. Dr. T. Cullen, the Chairman, said that since the meeting had been called, a development had taken place, and there were prospective buyers of the company "lock, stock and barrel". The position was not likely to become worse by trading since the company was ~~then~~ ^{now} disappointing in the meantime, and share-holders might do better by holding on.

Wankle® G-11W

For a full & clear rise in the London Stock
Exchange of the shares of the company, the
company has issued a statement over the signature
of N. Lewis, the secretary, that's nothing like the shape of favourable
development; or, indeed, any development of any kind
has taken place in the company's affairs since the chairman's
statement to the stockholders at the annual general meeting on
December 17th.

The Ricecrashed

A RISE in the price of zinc of £5 per ton to £75 was notified by the Ministry of Supply last week. The three grades of standard cost £4 5s per ton more, red seal being £73, green seal £70 10s, and white seal £75 10s per ton.

Charter Trust

CHARTER TRUST AND AGENCY CO. have declared a dividend for the year ended November 30 last, of \$1.00 per share, less than compared with \$1.00 in the previous year. Net revenue was \$3,993,153 (\$3,489,153).

Mineral Production

WORLD PRODUCTION OF IRON ORE in 1957 is estimated at 1,300 million tons, and world consumption at 1,310 million tons.

De Beers

DISSETERS' CONSOLIDATED MINES, LTD., are to appoint
a committee.

Prospecting and Hunting

COLONEL R. C. SAMUELSON was interviewed by the B.B.C. recently in their "In Town To-night" feature. He said:

African my real interest—East Africa chiefly, where I've been for 25 years. Years ago I used to do some salvage work and pearl-fishing near where they're now growing goldmines; what my job is gold. I've prospected all over Tanzania and Kenya, and was in the old Nakagema gold camp. I got the gold bug badly and floated my own company, but that went up in smoke while I was away in the recent war. So I've many thousands of my money.

I left at first, but I've just started another one now. I'm moving back soon to look after it. I expect to get my money back. I should have had it before if I hadn't got cold feet at the last minute. In 1946 I flew home with an option on a silver mine, but wolfram slumped after I'd raised the capital, so I gave up the option. Now the price has rocketed again. That's all in the day's work—and, anyway, there's big game.

"You hunt as well?" asked the interviewer.

"Yes. I've a hunting game garden for Tanzania and I spent many years collecting trophies. I still hold record claim, the largest of the antelopes."

"Tell us about your adventures with big game?"

The usual. The world, I suppose, was full of buffalo. I believe I'm right in saying that there's only three people who have come out of a real buffalo charge alive; but I had three ribs broken and my Native boy was killed. Two grand Africans carried me 10 miles, slung on a pole, and wouldn't leave the day or night. Next to buffalo the elephant is the greatest customer.

"Worse than lions?"

"Oh, no. I once fell with a lion and you can't run an elephant with one! It can grab you and catch you alive with suction from his trunk, and then smash him to pieces."

"But perhaps my naughtiest escape was... from a snake—a green mamba. As I'm about dead myself, I have odd ways of attracting my attention sometimes. They often throw pebbles at me. Well, I was standing under a tree one day and felt a bang on my toe-peep. Lucky I was wearing socks. I looked round for the boy who was throwing stones, and there was a 10-foot mamba in the tree, having a meal at me!"

"That sounds like a jungle adventure. I must say I tried to compensate for that sort of thing."

"There isn't a gas into your blood. There's always something new and interesting. Not long ago, for example, I did a trip into the tiger-gold country and found the pignut. But gold is the biggest draw. I once spent seven years working 100-foot wide river. I've got an even bigger job on hand now, but that's a secret of mine being."

N. Rhodesia Legislature

(Report continued from page 572)

the department could not be efficient. The staff usually had complaints about something, and had threatened to strike in January. Finally, to improve the state of affairs, the government have rarefied its staff and were too frequent.

Mr. G. M. WILLIAMS also said that teachers had become disenchanted that they had discussed the possibility of a strike. Yet the Government had not treated the situation seriously.

THE BRITISH NATIONAL RHODESIA urged a review of the entire educational system, saying that non-officials did not possess the necessary expert knowledge and needed a strong committee with outside experts. There was a loyal team of teachers, keeping abreast of many developments, but the education being given was still not all that it might be.

Mr. G. B. BECKETT suggested that some of the teachers' evidence should be given confidentially, because some people might be frightened of repercussions. The educational position would become desperate within the next year unless the highest priority was given to buildings for staff and schools.

Import Policy

IMPORT LICENCES will now be freely granted for goods from the United Kingdom which do not fall into the following categories: goods which can be sold for dollars or other hard currency; goods which are made wholly or largely of dollar materials and goods which are in short supply and can be had by the United Kingdom in trade negotiations; to obtain essential supplies for the whole sterling group; the lowest possible cost to the monetary resources of the group. Sir William Battleshill, Governor of Tanganyika, speaking in the Legislative Council last week.

Mitchell Cotts and Co. Ltd.

MITCHELL COPTS & CO. LTD. reported a net profit of £192,703 for the year ended June 30, 1947, compared with £125,842 in the previous year. Preference dividends £4,537, £70,000 was reserved (£49,000) and dividends ordinary shares amounting to 25% (£18,500) require £85,556, leaving £108,651 to be carried forward against £76,021.

The issued capital consists of £150,000 in 5½% cumulative preference shares of £1 each and £622,077 in ordinary shares of £1 each, 414,718 ordinary shares having been issued to shareholders during the year at 23s. 4d. Share premium account stands at £425,386 and general reserve at £75,000. Shares in advances to and undistributed profits of subsidiary companies are at value at £3,104,369, and current assets at £2,280, including £57,000 in Government stocks and £7,001 in cash.

The consolidated balance sheet of the company and its subsidiaries shows current liabilities at £3,667,583 fixed assets at £694,742 and current assets at £5,226,716.

Directors are Mr. Alexander Hartmann (President), Mr. Leonard Aldridge (Chairman), Messrs. H. G. Burge, J. G. Dunn, J. M. Donaldson, Holmes, P. Knight, E. H. Williams and R. S. van der Veen. The 28th ordinary general meeting will be held in London next Monday at noon.

The full statement will appear in our next issue.

East African Airways

A DEFICIT of £25,484 is reported on the last year's working of East African Airways Corporation; that is nearly double above the estimated loss. The reasons are stated to be failure to reach the planned mileage of 7,000 miles, suspension of main services for nearly a month for safety reasons, delay in opening certain routes owing to lack of navigation aids, and lack of suitable aircraft in adequate numbers. More than 9,000 passengers were carried during the year without accident.

Uganda is expected to harvest between 20,000 and 25,000 tons of robusta coffee this season, thus becoming the largest coffee-producing colony.

NEWS ITEMS IN BRIEF

Unlike Kenya, Uganda will not reduce rates of fire tax in 1948.

The use of English does has been approved by the Department of Education in Southern Rhodesia.

Three Africans lost their lives in a grass fire which ranged over 40,000 acres in the Mwanga district of Southern Rhodesia.

A memorial to the memory of Commander E. W. F. Callwell, R.N., who died in Uganda as Nyasaland School, of which he was headmaster.

An appeal for records and photographs connected with the early days of townships in Kenya has been issued by the Commissioner for Local Government.

Final plans of the new Scottish church in Nairobi have been passed and tenders will shortly be sought.

Contributions to the building fund now exceed £8,800.

The Liberal Party executive in Southern Rhodesia has nominated 21 election candidates, and a further nine are shortly to be considered by the local branches.

The part of Government House, Mombasa, should stand as a nursing home until the new hospital wing is ready was unanimously resolved by the Mombasa Chamber of Commerce.

Reports from the Sudan State that more than 1,000 men of Segenofa Province have volunteered for service in the Arab cause in Palestine, and have left the Condominium with a further 200 men from Kosti.

Derbyshire Stone, Ltd., will act as advisers to the United Africa Company, Ltd., managing agents for the groundnut scheme in Tanganyika, in regard to the development of limestone deposits, and two officials of the company have flown to East Africa in this connexion. The intention is to use ground limestone for agricultural purposes.

Gift parcels from Northern Rhodesia to the United Kingdom now pay postage of 4d. and 5d., a reduction of 1d. It is officially stated that the postage rates are divided as follows:—N. Rhodesia, 2d.; S. Rhodesia, 4d.; Bechuanaland, 3d.; East Africa, 3d.; Beira, 3d.; United Kingdom, 5d. Efforts to arrange for greater reduction in the handling charges were not successful. Parcels not exceeding 2 lb. can be sent at 8d. per lb. by the special small package postal service.

Rhodesia Railways Wage Increase

A 10% wage increase for railway employees and a cost-of-living allowance of 10s. on the increased rates have been agreed as from January by the newly constituted Southern Rhodesian National Industrial Council for the Railway. The Council have also accepted the principle of a 40-hour week, but have recognized that, in view of the shortage of staff and excessive work, its immediate introduction is impracticable.

Former Italian Colonies in Africa

THE DEPUTIES of the four Foreign Ministers who are considering the future of the former Italian Colonies met again in London on Monday. Their main task is to decide in which order they will hear the views of other interested Governments.

At their meeting in London in November, the Deputies appointed a commission of investigation to spend seven months in the former Italian territories in Africa. That commission has recently visited Eritrea, Ethiopia, and Somalia.

While they were in Somalia on January 11 serious rioting occurred in Mogadishu and, as we have already reported, 52 Italians and many Somalis were killed. The Somali Youth League had arranged a procession in order to impress the Italians; but early in the morning of the appointed day the 2,000 or more, most of them driven by Italians, went into the neighbouring countries to bring in Natives favourable to the Italians. As a result Somalis armed with clubs, sticks, bows and arrows, and in some cases with rifles, sheltered the town and attacked members of the Youth League and other people and started looting. Italians then threw hand-grenades and machine-guns upon Italian shops and houses were looted and a number of Italians killed. Not for some hours could the Italian and police restore order.

Actions and Commission Warned

It has not been officially revealed in London that the Italian community in Mogadishu had been threatened by the British authorities that continued Italian propaganda "must inevitably prove dangerous to Italian life and property" and that the Chief Administrator, Brigadier R. H. Smith, informed the Four-Power Commission on January 7 that permission to organize processions would involve danger. However, the commission asked two days later that such processions should not be prevented.

A committee of inquiry is now investigating the riots.

At the meeting in London on Monday Sir Noel Charles, the British representative, asked if the commission of investigation now in Africa should study whether the small port of Bender Zjedra should be returned to British Somaliland. Despite the fact that all rights to it had been surrendered by the Italians to the government, the Soviet deputy proposed that a statement should first be made from Italy. The suggestion was accepted, under protest by the British representative.

Uganda Direct

Saben's Commercial Directory and Handbook of Uganda, which has just been published at 10s. post-free, by Saben & Co., Ltd., P.O. Box 690, Kampala, is a most useful compendium for anyone interested in the commerce and industry of the Protectorate. It lists post offices, telegraph offices throughout the country, all limited liability companies of the local register, cotton spinners, coffee millers, cotton exporters, tea and coffee estates, oil mills, sugar mills, and medical and legal practitioners, and in a special section gives tables of revenue, and an indication and of exports and imports generally, and by categories. There are notes on the history, resources, communications, and taxation structure of the country. The handbook can be confidently recommended to those who require information of this kind for reference purposes.

Nyasaland Budget Debated

Surplus in 1947

INTRODUCING the Nyasaland budget to the Legislative Council, the FINANCIAL SECRETARY stated that revised estimates for 1947 showed a surplus of £104,202. Expenditure for 1948 was estimated at £1,261,777 and revenue at £1,966,518, leaving an estimated deficit of £254.

Under the Colonial Development and Welfare Act, the country would receive a grant of £2,051,000 for the year ending March, 1956. During that time an additional £200,000 could easily be found from loan funds and £2,150,000 from revenue, and with amounts from other sources, such as customs and excise duties and a five per cent. tax, the total amount approved for development within 10 years would be nearly £7,000,000.

MR. M. J. BARROW, senior non-official member, pointed out that although Nyasaland received a grant-in-aid from the Imperial Government, 84% of it is revenue accrued within the colony. He suggested that the sum had come to the Imperial Treasury control. Surrender of the grant-in-aid would also relieve the British of a small part of the burden.

Coal Resources

The first adequate coal source must be exploited if the basis of its economy was to be strengthened. The tea industry had considered using oil but had decided that its use would necessitate importing 750,000 gallons of fuel oil each year if the switch-over was actually made. It would surely be sounder to develop the country's own mineral resources. Moreover, the development of coal would enable a cement industry to be established, eventually making cement available at a cheaper rate than that paid for the Southern Rhodesian product.

THE FINANCE SECRETARY said that grants under the development act had nothing to do with the development of the tea industry which had been contributed by the hard-pressed British taxpayer, and it was only natural that the Treasury should safeguard his interest. Nyasaland was being treated neither worse nor better in regard to development plans than another Colonial territory.

MR. G. G. GIBBON welcomed the Governor's remark that Africans would soon take part in the Council's deliberations, he added when those African members were to be known. Would they come from the Protectorate Council, possibly consisting primarily of dues and other holders of official office, or from the secret intelligentsia? Unless there were concerned the coming of those two viewpoints might cause a general opinion among Africans.

MRS. R. SHARPE asked for identity cards for Africans. That indeed, was essential if the man was to be assured of the increased food production desired by the Secretary of State. Before leaving a job an African would then be signed off on his identity card, as in Southern Rhodesia. The change would benefit the African by enabling him to prove his identity to a prospective employer.

S. Rhodesian Development

First Meeting of Commission

SIR MILTON THOMAS, the chairman, said at the first meeting of the Development and Planning Commission of Southern Rhodesia that Rhodesia House, London, had had more than 10,000 applications from would-be immigrants to the Colony. Many of these people quite clearly had a self-interest motive to share in the prosperity created by early settlers, and it was the commission's duty to protect the interests of the Colony's founder members. Any wild-cat scheme that would merely "make Southern Rhodesia a bonanza" had to be severely discouraged.

SIR ARTHUR GRIFFIN, general manager of Rhodesia Railways, stated that the rail position at Umtata had improved, and that less than 10,000 tons under a normal week's working was now sent by rail at the port.

The members of the commission, in addition to Sir Milton Thomas and Sir Arthur Griffin, are Sir Frank Englewood, Draper's professor of Agriculture at Cambridge University; Mr. Geoffrey Murray, chairman of the Industrial Development Commission; Mr. F. H. Humphrey, CBE, chairman of the Home Resources Board; Mr. J. B. Coward, chairman of the Electricity Supply Commission; Mr. J. S. H. Grant, chairman of the Railway Commission; Major G. S. Cameron, chairman of the Cotton Research Advisory Board; Mr. A. J. Sturzaker, Committee of Native Labour; Mr. A. L. Miller, and Miss Dudley Edwards.

Traffic in Tanganyika

ON January 1, the Tanganyika Railways and Ports Authority introduced a flat charge of 10 shillings for calculation in the amount of freight which could be carried, and of insufficient regard to the fact that the ground-freight scheme required the import of timber and awkward cargo much more difficult to move than most goods normally imported. Mr. J. R. Cuthbertson, general manager, is reported to have said to Davies Salamah:

"There has been no misapplication of capacity by the Railways administration. Both the port of Davies Salamah and the Central Line have the available equipment been operating to capacity during 1947, so goods arriving at the port have been landed and all equipment required for the scheme has been removed by rail at a reasonable rate."

The end of the best 12 months in the port's history, the position to day cannot be described as abnormal, and the tonnage of goods available movement on the railways is modest. In particular there is no need to limit the import of cars from the United Kingdom to Tanganyika because the position at Dar es Salaam port, "This cargo is easily handled and can readily be moved from the port area."

Some 1,800 tons of groundnut, not urgently required for seed purposes in Tanganyika, because the amount of ground cleared for the planting season was far below the estimate, are being shipped to the United Kingdom.

East African Development Potentials and Requirements

AS THE PAYMASTER-GENERAL, MR. H. A. MARQUAND, was about to leave Nairobi after spending a week in Kenya, a special correspondent of *The Times* who is now in East Africa telegraphed a long and interesting dispatch, which, by the courtesy of that newspaper, we are able to quote in full:

"In Nairobi Mr. Marquand has listened to some straight talk from all sections of the community, and has explained explicitly the difficulties besetting the United Kingdom, which were not universally appreciated in this relatively prosperous territory. The geographical and mortal remoteness makes it hard to picture England buffeted by enemy action and isolated through years of war economy.

Mr. Marquand has met a variety of people, and among his Nairobi who as had anything important to say has had a chance and taken the opportunity to say it.

His subjects discussed may be divided into two closely connected sectors: first, Kenya's own requirements; and, second, the possibilities of development in the interests primarily of the Empire and of Western Europe. Kenya's share of the restrictions of import control and compliance of the methods of application, and is particularly impatient of any interruption of trade with South Africa.

Mr. Marquand was able to clear up some specific points, and it was seen that some confusion has been due to the desire to leave a large sum in interpretation to the authorities here, while others, anxious for permission to spend more dollars, on the obvious method of helping her to save them would be the manufacture by British firms of cars suitable for the country and at suitable prices. Every living up-country is entirely dependent on motor transport.

Stress on Transport

The shopping list of physical requirements has a strangely familiar ring. As nearly all wear derives from the land, it is helped by agricultural and similar machinery suitable for heavy soil. The railways, to be amalgamated under the East Africa High Commission, are badly in need of new rolling-stock because of the heavy tonnage hauled during the war. Their high efficiency is universally acknowledged, but their burdens are prodigious and directly end with the war. The forming of dumps of Army stores from the Middle East at Mackinnon Road still gives them much non-commercial work. Both the volume of exports and the import of capital funds is increasing if due to the renovation of the railways. Housing material and heavy electrical equipment are urgently needed as a basis of development schemes.

As in Europe, the lack of consumer goods discourages bare work. The Natives were previously accustomed to buying cheap goods from Japan, but the pay packets have little purchasing power, so the Native labourers intermittently return to the tribal areas where they live, on the land and their wives do the work. Although there may be arguments for this system, it positively sabotages steady development. Mr. Marquand made no thorough understanding as it was not before, that the British failure to supply many of these needs was

due to the properties to which Britain had no work and the acute scarcity of dollars. At the same time he acknowledged the gain by him of potential developments should help the Kenyan Government to ensure that the limited supply of capital goods is deployed to the best advantage.

The cultivation of sisal grew rapidly during the war after the destruction of alternative materials from South-East Asia by the Japanese. It is a great dollar earner, is an industry in expansion, holds unlikely to lose its market, as sisal has no enemies to shipowners because of its buoyancy.

Tea, which is not generally known to figure in the export, are being grown successfully by the Government forestry service, and Kenya is to be an exceptional opportunity for easing the world scarcity of timber. Some 260,000 acres could be planted on the estates, there were assurances of a market when the scheme comes to full fruition. The forestry service is badly hampered by lack of scientific experts, and the Government is anxious to recruit from universities and from the Indian and Burmese services.

Need for Refrigerating Plant

Tea, the daisy-like plant which sells insecticide, also has possibilities. More tea and coffee could be grown and beef and some bacon could be shipped in greater quantities to the United Kingdom, although a strict requirement of these last named is more refrigerating plant for stored imports.

Inadequate communications and the importance of foreign labour to commercial agriculture to all alike, remain so long as there are overworked railways and congested ports of development will always be limited and selective. This will be the kernel of Mr. Marquand's studies when he goes to Dar es Salaam to-morrow.

Mr. Marquand last evening broke away from a programme of conferences to visit Native locations in Nairobi under the guidance of the mayor. The town is divided into three areas—restricted, semi-restricted and locations. In the first live Europeans, half a dozen Europeans and Asians, in the third most of the Africans except for those employed in domestic service. There are six locations in all, organized in one communities with their own shops, cinemas, places of worship, clubs, beer shops, and clinics. The newer houses are usually sited widely apart, with communal latrines and shower baths. All let at nominal rents.

The town ended with a visit to the Lavington maternity clinic, where women lie in rows, each with a small box at the foot of the bed on which she places a picnic meal. The percentage of venereal disease is so high that patients are assumed to be infected unless proved otherwise.

A serious anxiety is the scarcity of scientific experts, who seem to prefer Rhodesia to Kenya, perhaps because they are unaware that favourable openings exist here.

Mr. Marquand visited the Kongwa groundnut area at the beginning of this week.

R. Parquinon, general manager of the Tanganyika Railways and Ports, told Mr. Marquand while he was in Dar es Salaam that the efforts of his staff to deal with the enormous recent increase in inward and outward traffic had raised the average daily mileage of each railway wagon to 52, which was equivalent to the achievement of the railroads in the U.S.A. the peak of their effort.

The Dar es Salaam Chamber of Commerce told the managing director that much greater quantities of British machine tools, oil, the steel industry equipment and other building materials were urgently required by the Dar es Salaam

Land Auctions in Tanganyika

System Approved to Deter Speculators

INTERESTING A BILL to amend the Land Ordinance, the Acting Director of Land and Mines said that since 1920, if had been the general rule in disposing of public land to offer rights of occupancy at public auction to the highest bidder.

The rule of auction had not been followed where the land was required for a church, mosque or school, or for a specific purpose, and in 1920 that list was extended and increased by the addition of the following words after the mention of religious and educational buildings: "any other building for purely for religious or charitable purposes." Provision was also made for the grant of a right of occupancy without compensation at a cotton ginnery or cotton buying point. It was also granted to Imperial Airways for the purpose of carrying out contracts with H.M. Government, or for any land required to generate electricity under Government license. In 1933 the section was further amended by deleting the provision enabling the grant of a right of occupancy without auction for any other purpose, and substituting the following proviso: "in case of land situated outside the limits of a township in any special lease in which the Governor considers it desirable."

Governor's Powers

The Governor's power to grant a right of occupancy without auction in a specially desirable case had been exercised very sparingly. One instance was when the owner of agricultural property required an additional area for extension to his farm in order to make it a more economic unit. Recently, with the food crisis still troubling, the practice was begun of auctioning in special circumstances short-term rights of occupancy to stimulate food production.

The Government spokesman continued—

"The principle of a public auction of rent, whereby the land is knocked down to the highest bidder, is in many cases quite inequitable, and very often a farce. We have had cases time after time where an experienced farmer urgently in need of land has after considerable expenditure of time and money, located available land. Very often the farmer, who has gone to so much trouble and expenditure and has waited months and months, is put bid at the auction—and very often by a person

quite inexperienced in doing the land. If he is not outbid, he is forced to bid up to such a rent as might make his operations uneconomical. The archives of the Land Office record a number of such cases, and cases where the bona fide experienced farmer has been bid out and where the successful bidder has not done a thing on the land, the property has ultimately reverted to Government either by reversion or by abandonment by the occupant."

"As to plots situated in townships, cities, settlements and trading centres, the auction system has been the subject of great debate. It has not been uncommon, particularly in a small trading centre, to find the established trader deliberately bidding against outsiders in order to stifle competition."

"Consider the position of the would-be house-owner who does not have; he has the means to build his own house, but the land is not there. I consider that every such person is entitled to the land to build his own house. If, as may become available in the various townships, there are plots to be put up to public auction, the bona fide prospective house-owner will go into the open market and bid against investors and speculators. I submit that the first priority must go to the bona fide householder. If he is sold at auction, it means that the investor or speculator has got the land at a very high rent and has set up a building and passed on an exorbitant rent on to his tenant. It is against all the principles we have accepted as essential during the war regarding the stabilization of rents, and if Government by putting the plots up to public auction to the highest bidder, fails to get an exorbitant rent for that plot, they could not be consistent with general policy of the country. Those remarks apply with equal force to commercial concerns anxious to build for the purposes of their own business."

Fantastic Overbidding

A recent sale of certain commercial plots in Mbeya the up-to-date range from \$180s. to 240s. The average rental is 1,200s. The bidding representing anything from 15 times the amount of the up-to-rent, and absolutely beyond the economic value of the plots. The Land Office has now received complaints from the successful bidders, who are unsatisfied. The unsuccessful bidders are not satisfied. Safety is satisfied under such arrangements."

"In Dar es Salaam, good plots were put up for auction. The base rent was 1,200s., and they went up as 1,750s. in the commerce area, base rents ranging from 100s. to 220s.; the bidding ranged from 2,000s. to 2,500s. In Arusha in the residential area the bidding was at least five or six times the amount of the up-rent, in the business area a plot put up at an up-rent of 360s. went to 3,000s.—more than 10 times the up-rent. In present conditions plots would soar even to greater heights."

In considering the alienation of farm land we must ensure that it is properly developed for the benefit of the Territory and that adequate steps are taken to preserve its fertility. When an agricultural property is put up to public auction the mere fact that the successful bidder has bid the highest amount does not necessarily mean that he is able and willing to develop that land to preserve its fertility. In this particular proved time and again that the highest bidder may not be the most suitable man for the land."

"Disposal of land, we should have regard to the benefit, direct and indirect, of the natives of the Territory and the public interest. Under the changed conditions it behoves Government to scrutinize every alienation with the greatest care to ensure that such disposal is in accordance with the overriding policy of the Land Ordinance. Alienation by public auction to the highest bidder is not necessarily in the best interests, direct or indirect, of the Natives of the Territory. It is in the interests of the public and in the indirect and indirect interests of the Natives to see that the alienated community is properly housed and provided with shops and business premises. Public auction will not secure that and it is important for the Government to-day to find some other method of disposal."

M. E. C. PHILLIPS confirmed that there had been profiteering in land. When residential land was sold for three times the price a few years ago, and he knew one case of a plot bought during the war and resold unimproved for which the owner now asked 16 times the original cost. The system of public auction having failed lamentably and encouraged speculation, he strongly supported the Bill.

MAJOR S. E. DU TOIT and MR. M. A. CARSON welcomed the

Mr. M. A. CARSON considered that the Government should be complete liberty in regard to the disposal of public land, being guided always by considerations of the welfare of the country.

CHIEF ADAM SAPU, CHIEF KIDAH, and CHIEF ADAM SHANGALI also supported the Bill, the only opponent of which were the two native members, MR. V. M. NAZARALLA and MR. G. K. CHOBRA.

FEBRUARY 19

EAST AFRICA AND RHODESIA

MRS. J. M. SEMPLE has been elected district president of the Girls' Branch of the East African Women's League. Other members of the committee are LADY ELEANOR GALE and MESSAMDES FARNHAM, J. HINGGISON, LE BLANC SMITH, THOMPSON and WEAVER.

SIR WILLIAM GAYIN, one of the leading agricultural authorities in this country, is to advise on certain aspects of the development of the Sabie Valley in Southern Rhodesia. MR. ANTHONY R. HURD, M.P., agricultural correspondent of *The Times*, is also to visit East Africa and Southern Rhodesia in connexion with agricultural developments.

MR. J. APAMALA, who has been appointed engineer-in-chief of Cable and Wireless, Ltd., will visit Nairobi in about two months in connexion with expansion of the company's broadcasting station there. Nairobi is to become a representation for the Far East, alternative to Colombo, and arrangements are to be made for phototelegraphy from Nairobi to London.

THE REV. W. WYNNE BONES, who recently returned to East Africa from leave in Australia, was enthroned as Bishop of Central Tanganyika, Archdeacon Kidner, the Vicar-General, at the See of the Holy Spirit in Dodoma at the beginning of last month. Before the ceremony the Rev. J. J. CHAMBERS, Chancellor of the diocese, read the commendation from the Archbishop of Canterbury.

SIR RICHARD ROBIN, member for Transportation in the East Africa High Commission, and until the 9th of last year general manager of the Kenya and Uganda Railways and Harbours, is visiting Tanganyika for discussions in connexion with the amalgamation of the Kenya-Uganda and Tanganyika railways. By arrangement amalgamation is to be introduced into the structures of the three territories in April.

THE HIGH COMMISSIONER FOR SOUTHERN RHODESIA and Mrs. K. M. GOODNOUGH gave a dinner party at Rhodesia House on Monday in honour of the newly appointed High Commissioner for the Union of South Africa and Mrs. Len England. Their guests were the High Commissioners for Canada, Australia, New Zealand, and Pakistan and their wives, Lady Tait, Mr. and Mrs. T. C. Sisbourn, Mr. and Mrs. E. M. Gifford and Mr. G. Goodenough.

MR. V. ("DEALER") ALLEN, of the staff of the East African Office in London, and for many years of the Colonial Service in Kenya, left London by air at the beginning of this week for Kenya, Uganda, Zanzibar and Tanganyika. His visit is particularly concerned with increased British settlement in Tanganyika, the Government of which is about to make land available in the Oldeani and Mbozi areas. Mr. Allen expects to be back in this country in about four weeks.

SIR WILLIAM CURRIE, chairman of the P. & O. and British India Lines, and LADY CURRIE will sail at the end of this week for East Africa in the MANTOLA. After spending several weeks in Kenya, Uganda and Tanganyika, they will go south by sea on their way to the Rhodesias. They are accompanied by MR. W. J. GORDON, a partner in Messrs. Gray Dawes & Co. MR. DELGARNO, assistant secretary of the British India Steam Navigation Company, and MR. CARTER LADELL, marine superintendent of the line.

THREE FORMER MAYORS of Salisbury, Southern Rhodesia, have been appointed to the city's first aldermen. They are MR. J. B. DAWES, the first mayor, town councillor for three years, city councillor for nine, 1935-45; MR. J. C. TRADES AND COMMERCE, 1944-46; MR. N. A. PHILIP, mayor, 1937-38, town and city councillor, 1935-45; past president of Salisbury Chamber of Industries, and member of the Land Settlement Board. MR. J. L. PHILLIPS, mayor, 1931; town and city councillor, 1949-1941.

Obituary

Captain C. E. Stuart

CAPTAIN C. E. STUART, R.N.R., former captain of the *Union-Castle Line*, died recently in England at the age of 79. He joined the company in 1892 as fourth officer, obtaining his first command in 1904. When the late Duke of Kent visited South Africa in 1945 Captain Stuart was in command of the CARNARVON CASTLE, which carried the Royal party. His last ship was the *Strand* (1944), which held a record by completing the voyage from England to Cape Town in 10 days 6 hours.

The death occurred recently in Ruanda of MRS. ERTRUDE HINDLEY, wife of the Rev. W. T. Hindley.

MR. KENNETH GOOCH, who was well known in the farming community in North Kenya, died last week in Mombasa, aged 63.

DR. MUHTAR MOHAMED MAHMOUD, medical inspector of the Dingole district of the Sudan, one of the first Sudanese to qualify at the Khartoum School of Medicine, has died at Merowe.

MISS MARY DALY, a daughter of the newly consecrated Roman Catholic Bishop of Uganda, sustained fatal injuries recently in a motor accident in Port Portal. She was a junior welfare assistant in the Department of Public Relations and Social Welfare.

MR. J. C. C. SIM, who went to Kenya in 1923 and settled in the Turi district, died suddenly at his farm shortly after playing a game of polo in which he scored three goals. The cause of death was thrombosis, of which there had been no previous suspicion. After leaving Marlborough he served in the training ship CONWAY, and was for seven years in the R.N.V.R. and the Merchant Marine. In the second world war he joined the Kenya R.A.F.R. and was mentioned in dispatches. He had taken a prominent part in the formation of the Molo Club and was a member of the local District council.

Nairobi Municipal Services

MR. T. G. ASKEWITH, African Affairs Officer to Nairobi municipality, has complained that Africans have been harassed by certain of their leaders to boycott the municipal beerhalls and canteens. It appears that the staffs of these institutions make a valuable contribution to the cost of social services. Besides subsidizing housing in the town, the municipality runs shops where clean milk may be obtained at reasonable prices, and opened butcheries during the meat shortage. He stressed the fact that the Native beer sold by the European beer.

Officials on Leave

GOVERNMENT OFFICIALS on leave in this country include:

Mr. and Miss F. W. Logsdon and E. J. O'Farrell, Mr. and Miss W. H. Maxwell-Davies, Mr. R. M. Forrest, Mr. G. G. Gifford, Mr. F. E. Luscombe, Mr. W. Miller, Mr. A. Stanton, Mr. G. G. Parton and Mr. R. Thomas, Tanganyika Railways.—Mr. J. Martin, Uganda.—Messrs. W. A. Allan, C. A. E. Harwick, H. Macleay, G. A. R. Savage and J. B. Watson.

East African Office

RECENT CALLERS at the East African Office in London have included:

Mr. and Miss J. Adams, Mr. P. B. D. Ashurst, Mr. M. S. Brooks, Mr. R. G. Butler, Mr. J. M. M. Campbell, Mr. St. Claire, Commander and Mrs. W. Fenton, Mr. Reverend Gillett, Mr. W. Green, Mr. F. J. T. Gurver, Mr. and Mrs. D. G. Hines, Commander and Mrs. Heyde, Mr. and Mrs. A. Hunter, Miss B. Hutton, Mr. J. C. D. Lawrence, Mr. and Mrs. Lowenstein, Mr. R. Mayers, Mrs. and Miss B. Peters, Mr. J. Proctor, Mr. N. Proctor, Mr. J. R. Sands, Mr. and Mrs. Sands, Mr. and Mrs. H. G. Smith, Mr. Neil Stewart, Mr. K. Taylor, Mr. and Mrs. B. Thomas, Mr. F. M. Mowbray Thomas, Mr. and Mrs. G. Turley, Brigadier Turley, Mrs. A. Turton, Mr. J. Walker, Miss S. Williamson, Mr. A. Watt, Mrs. G. D. Watt, and Mr. Harold Willan.

PERSONALIA

A son has been born in Nairobi to Mr. and Mrs. S. N. PEAKER.

GENERAL SMITHS has been nominated Chancellor of Cambridge University.

A son has been born in Bulawayo to WING-COMMANDER and MRS. D. F. RIXSON.

LORD and LADY ELTON are outward bound for the Cape in the *TEALING CASTLE*, and are expected to visit Rhodesia.

COLONEL J. T. CROCKER, G.O.C.-IN-C., Middle East, will inspect the garrison at Lusaka, Northern Rhodesia, this month.

MAJOR-GENERAL W. A. MOLINE, G.O.C.-IN-C., East Africa Command, has been visiting Northern Rhodesia and Nyasaland.

O. WARBURG, Director of Messrs. Baker, Warburg & Co. Ltd., is due in Kenya from Rhodesia about March 18.

Lord and LADY EDWARD HAMILTON, of Elmenteita, Kenya, who are now in the West Indies, expect to return to East Africa in June.

MR. K. B. MEHTA and MR. A. G. MEHTA, of the Government Indian School, Kampala, were called to the Bar, Lincoln's Inn, last week.

MR. L. B. VISSIJOV, who has patented a machine for removing the husks from cashew nuts, has presented an invention to the Colony of Moçambique.

COLONEL JEFFREY, who recently revisited East and Central Africa, left England by air on Saturday for West Africa, where he will continue his study of Native administration.

THE DUKE and DUCHESS OF GLoucester will leave London this morning for Kenya, where the Duke will open the first session of the Parliament of the new Dominion.

The engagement is announced between MR. MARTIN KEAN SUTHERLAND MACKAY, D.P.C., of the Colonial Service in Kenya, and MISS BARBARA ANN WHALLEY of Marlow.

Mrs. ROGER HOSKING, of Mr. and Mrs. E. B. Hosking of Moiben, Kenya, spoke of life at Oxford University in Sunday's *Calling East Africa* programme of the B.B.C.

THE BRIGADE LEADER OLDWELL, Royal West Kent Regiment, and MISTRESS COLEHORN, only daughter of Mr. and Mrs. H. G. Colehorn, of Nakuru, have been married in Kenya.

MR. FRANKLIN FALKNER of Nakuru, and formerly of Melfort, Saskatchewan, and Miss DONOPEN ELIZABETH MAYHOOD, daughter of Dr. and Mrs. F. H. Mayhood, will-be-married next month.

SIR ROBERT HOWE, Governor-General of the Sudan, who has been in London for talks on the constitutional reform of the Sudan recently suggested by Egypt, has returned to Khartoum by air.

MR. AND A. GILLAN, only son of Sir Angus and Lady Gillan, formerly of the Sudan and now of Chipstead, Surrey, and MRS. ANN PATRICIA MAINWARING have announced their engagement.

MR. L. R. BUCKLAND, Director of Water Development in Tanganyika, has been seconded as deputy chairman of the Development Commission during the absence on leave of Mr. K. B. Hutt.

MR. ARANTES DE OLIVEIRA, one of Portugal's leading engineers, who recently visited Beira to advise on a new water-supply scheme, has been appointed resident director in Africa of the Moçambique Company.

MR. GRAHAM STANFORD, one of the writers of the *Times Mail*, is due to leave London today to start a tour of East Africa and the Rhodesias. During the war he was a passenger in the *Tancredo Castle*. When she was torpedoed off the Azores

MAJOR-GENERAL F. HASTED has resigned his appointment as Controller of Aerodromes under the Ministry of Civil Aviation. In that capacity he concerned with airfields in the Colonial Empire.

SIR FREDRICK THOMAS HOPKINSON, who was a partner with the late Lord Cowdray in the construction engineering company of S. Pearson and Son, Ltd., which built the Senar Dam in the Sudan, left £68,195.

MR. H. F. CARTMEL ROBINSON, who recently came from the appointment of Chief Secretary in Southern Rhodesia, and MRS. CARTMEL ROBINSON are visiting Kenya. They are expected in this country in April.

MAJOR W. R. S. DOBBS, Royal Engineers, son of Brigadier and MTS. E. R. Dobbs, of Ning, and Miss VIOLET AGNES MACDONALD, daughter of Mr. and Mrs. A. B. Macdonald, of Limuru, are to be married shortly in Kenya.

MR. JOHN HARE, M.P., has left London to pay a short visit to Kenya, Tanganyika and Southern Rhodesia in order to acquaint himself at first hand with some of the political and economic problems. He is a brother of Lord Listowel, new Minister of State for the Colonies.

The appointment of the REV. OLIVER C. ALLISON to Assistant Bishop in the Sudan will bring to 100 the number of C.M.S. missionaries who have been raised to the episcopate. The Bishop-elect, one of four parson brothers, has served in the Southern Sudan since 1938.

The engagement is announced between LIEUTENANT-COMMANDER J. H. FOWLER, R.N., only son of Mr. W. E. N. Fowler, of Northern Rhodesia, and of Mrs. Fowler, of Bexhill-on-Sea, Sussex, and MISS JOY MCLEON SPENSER, only child of Mrs. M. Venables, of Mosman, New South Wales.

DR. GUTHRIE DUNDEE, of Stanley, has been committed for trial on charges of sedition arising from a letter written by him, which, with the deletion of 47 words, was published by the *Kenya Weekly News*. The magistrate found that there was no prima facie case against the editor or printers.

DR. E. B. WORTHINGTON, scientific secretary to the East African Governors' Conference, and joint secretary of the Colonial Research Committee, recently flew to Pictoria with DR. J. E. KEYSTON, the recently appointed research secretary to the Central African Council, to visit research centres in South Africa.

MR. JOHN COCHRAN MUIR has been appointed Director of Agriculture for Tanganyika. Born in 1902, he was educated at Glasgow University and the West of Scotland Agricultural College. In 1927 he did a post-graduate course at the Imperial College of Tropical Agriculture in Trinidad, he was appointed an assistant superintendent of agriculture on the Gold Coast. He became senior agricultural officer in Zanzibar in 1935, and for the last three years had been Director of Agriculture in Trinidad. In Zanzibar he did much to encourage new crops and to improve varieties of various staples.

EAST AFRICA AND RHODSIA

TO THE NEWS

E.A.R.-marked. — "The era of communism is a diminishing factor,"

— Mr. G. Skeffington-Lodge, M.P.

"Mr. Gandhi was a great servant of humanity," Mr. Attlee

"I study the minds of the hon. Members opposite so far as it is possible," Mr. R. Boothby, M.P.

"A politician is an animal that can sit on the fence while keeping both ears to the ground." — *New York Times*.

"The number of divorce petitions filed during 1946 was 43,392, an increase of 33,038 on 1938." — *Manchester Guardian*.

"Sweden is a burning, valuable laboratory useful to our housing plans, because she cannot get coal from us." — Mr. Giles Romilly.

Paper and books are the first tools needed to maintain and extend political education and culture generally." — *New Statesman*.

"A man has played a greater part in his country's history than Mahatma Gandhi." — Statement issued by the M.A.J. government.

"Ninety out of every 100 candidates for the higher posts in the Civil Service fail to make the grade." —

Mr. Charles Wintour, in the *Evening Standard*.

"A really successful headmaster could have run a departmental store, a battleship or a trade with success; and vice versa," — Commander C. B. Fry.

"The Government's representations to the Soviet Government for the release of Russian-born wives of British servicemen have been treated with utter contempt and disregard." — Lord Vansittart.

"Streptomycin will be useful for only five years after it is made generally available. After that time the resistance developed by bacteria will be so great that the drug will be almost ineffective." — Professor L. Garroway.

"One-tenth of our population from 1900 to 1950 will be about 27,000,000 in 1950 and what may well be 50,000,000 in 1950 is in a great measure due to the multilateral nature of the trade we carried on."

Mr. Oliver Lyttelton, M.P.

"Missionary service in a foreign field used to be regarded as a sort of honourable degree in Christian living. Now missionary societies find great difficulty in finding persons suitable in character and training for all the posts they have to fill." — *The Christian Newsletter*.

"Building licences to the value of about £91,000 have been granted in connection with the forthcoming Olympic Games." — The Minister of Works.

"British casualties in Hongkong before it fell numbered 30% in officer ranks, 10% in British and Canadian other ranks, and 30% in Indian other ranks; the total losses being 34,413." — Major-General C. Mc Maltby.

"The tendency of many to persuade themselves that the worst can never happen is dangerous. If there is a word of ill-omen in our language it is the word 'unthinkable.' It has always been the herald of calamity." — Sir Hector Duff.

Taken over the whole field of consumers' expenditure, the purchasing power of the £ at December 16, 1947, is provisionally estimated to have been about 60% of its purchasing power in 1938."

The Chancellor of the Exchequer

"Improved growth rates of children and the remarkable reduction in mortality rates during the war were mainly due to the brilliantly successful food policy, including the provision of milk and meals in school and the grant of extra rations." — Sir Wilson Jameson, Chief Medical Officer of the Ministry of Education.

Vauxhall Bedford

Experience

Post-war Vauxhall cars and Bedford trucks have been developed from the engineering experience of more than 40 years of painstaking progress and close study of vehicle requirements for all needs in any part of the world. They are based on the proved designs of pre-war models and embody many improvements and refinements.

We are Vauxhall and Bedford specialists with long experience of the requirements of car and truck owners in East Africa. Our knowledge, experience, energies and resources are always at your disposal. We shall be glad to supply details of the new models.

Vauxhalls—10 h.p., 12 h.p., 14 h.p.
Bedfords—1-ton & 8 tons

Root of Economic Difficulties

The fundamental problem is the exchange of our finished products for essential food and raw materials. In our visible trade we were on the wrong side in 1946 by £333,000,000, last year the gap widened to £600,000,000. Coupled with the figures for our total trades the result shows serious hard currency deficit. We can see no way of making good an estimated deficit of £400,000,000 with the hard-currency countries except by drawing on our slender reserves of gold and dollars.

Increased production is the solution to most of our perplexities. The most important basic industries—textiles, coal, agriculture, and certain branches of the iron and steel industries—are still undermanned. This must be rectified. Our sources of machinery, equipment, and transport are also limited, and much of them suffer from dearths of maintenance due to the fact we cannot afford to ignore the grave risks we run if we allow our productive equipment to deteriorate any further. Despite controls, labour and materials are scattered away in unnecessary pursuits. A greater danger still is a wages and cost-of-living spiral. Inflation breeds upon itself. In its acute form such a development could bring all our efforts to nought. This problem should be resolutely tackled before it gets out of hand, for the prospect is of still fewer goods in the shops for some time to come. We must restore and rigidly preserve those traditional standards of workmanship upon which much of our prosperity depended. Wage rates at present were 35% above the pre-war level. The wage-earning classes have been treated more liberally in this respect than the rest of the community. Further increases in wages are accompanied by a commensurate increase in output merely, and to the dangers of inflation. The root of our economic difficulties is the attitude of the worker to his tasks. The level of output is far below what it could and must be. Even now few appreciate that rationing and work are directly linked, that every article produced and sold adds help to reduce the austerity of our conditions. The human desire for other wages before leisure, and the readiness with which work is thrown aside for the pursuit of sport and entertainment, bear witness to the illusions which many working people cherish. "The whole future depends solely on our own individual effort." — The Hon. Ruper E. Beckett, Chairman, Westminster Bank.

Appeasement. We have suffered a series of one-sided appeasements. Refusal to face facts has been predominant, and the greatest energy has been employed in inducing people to believe they are much better off than is really the case. Every shock suffered last year was sprung on the country at the last moment, when concealment was no longer possible, and was accompanied by explanations that the causes were unforeseen occurrences for which no one was to blame. On the other side, progress has however been made in the recent to earth. Efforts are being made to point out, in words of the syllables, the disastrous position in which the country stands in comparison of the promised prize, have been pursued. The half-measures adopted has, however, been entirely dispelled and much effort is still directed towards shielding certain strata of the population from the effects of increased austerity. We are, in fact, still appeasing. The autumn budget provides an admirable example. After the big words that preceded it, it was almost cynical, mere face-saving gesture to show that nothing had been done and that no one who mattered had been hurt. Fear rules our rulers. Not in the trade unions, fear of increased wages, fear of stopping wages increases, fear of the electorate, fear to face any unpleasant situation. The country has a long way to go before it achieves sanity. The longer the people remain drugged with make-believe, the longer will be the journey. — Captain Eric Smith, chairman, National Provincial Bank.

Remedy by Inflation. Compressed inflation lies at the root of so many of our external troubles. The remedy is to be found only through a budget surplus achieved by reduction of expenditure, in combination with measures to increase incentive to production and saving. A sound monetary policy of this kind would be far greater ultimate benefit to the wage-earner than a mere condonation of the present wage spiral, and offers at the same time the best prospect of maintaining the competitive position of our export industries. Difficult as it may be as our position is in these ways the price mechanism could be harnessed to work with the physical controls instead of against them, and the people could be made aware of the dangers in which they stand. I should like to say for the outcome. — Lord Burleigh.

Franc Threat. The danger of devaluation of the franc is that France will buy from us for francs' goods which we should ourselves be selling for dollars, and undersell us in third currency countries with our own products and leave us with francs instead of dollars. At present exchange rates a Frenchman could undersell us with his own merchandise in the U.S.A. to the extent of \$9,200 on a transaction involving £10,000. We can insulate ourselves against this threat only by prohibiting exports to France or by ordering that goods going to France must be paid for in hard currency. — Mr. F. R. Persson.

The Virtuous Circle. The combination of an inflated purchasing power, a subsidized price for necessities, and an artificial price for imported raw materials has exaggerated the amount of money chasing goods and forced the Government to continue rationing and rigid control of necessities, to restrict all imports, and to mop up purchasing power by penal taxation on the whole range of home productions. The price of British exports has been raised by the manifold delays and difficulties inherent in controlled control of all raw materials and most manufacturing processes, by the restrictions of the home market, and by raising the direct labour costs. — Mr. V. Douglas Judd.

Planning. The efforts of the British planners to put our economy from the course are proving as futile as would be an attempt to swim the Atlantic. On January 29, 1947, the programme for 1947 was 240,000 houses. — May 8, Mr. Evans announced the target unattainable. The Economic Survey fixed the export target at 40% above the 1938 level. By the end of 1947, this date was altered in August to the middle of 1948. On September 22 export targets were fixed before consultation with the industries concerned. On December 16 it was announced that those targets were being modified. The plan for this year has not yet been issued. — Mr. John Jewkes in *Marine Tide*.

Five Aims. Conservatives rule, concentration on productive employment for all workers at good wages; preservation of individual liberty; an improved standard of living for all classes; a social as well as an economic status for all engaged in industry; and the restoration of Britain as a Great Power, the centre of a flourishing Empire, and the undisputed leader of a united Western Europe. — Mr. Robert Boothby, M.P.

BACKGROUND

Non-Officials in N. Rhodesia Press Claims

Two Nominated Members To Be Replaced by Elected Members

THE NON-OFFICIAL DEMANDS for a greater share in the government of Northern Rhodesia has been reinforced by other speeches in the Legislative Council.

MR. J. W. WEST declared that the majority of European settlers wanted amalgamation with Southern Rhodesia, but in the meantime they demanded a larger part in the management of their own affairs. A mere non-official majority in Council had proved to be no more than a shadow, and they were now fighting to change it to substance.

MR. G. B. BECKETT said that the non-official majority obtained two and a half years ago had been intended as a step to something greater. It seemed doubtful if real self-government could be obtained now, but a form of government must be established in which non-officials and officials could really work in the country as a team. Everything possible should be done to attract more settlers by making it better known in Great Britain the opportunities existing in the territory.

THE ACTING CHIEF SECRETARY, MR. HODSON, referred to a statement by Mr. Goodwin that the official side of the House was attempting to thwart the wishes of the majority. Perhaps Mr. Goodwin had meant only that officials had opposed the wishes of non-officials. The fact was that once a decision had been made in favour of the official side did everything in its power to implement it, though delays were bound to occur in account of the enormous amount of work to be done.

The sooner some common ground on the constitutional issue could be found the better. Officials were convinced that the present constitution was workable. It had been discussed in London less than 18 months ago with Mr. Welensky and Sir Stewart Gore-Browne, and modifications would come into force later this year. The constitutional development had also been fully discussed at the recent London conference of African Governors. At this stage the official side could make no proposals, but he was sure that Sir Gilbert Renhill, the new Governor, would review matters with non-officials at the earliest opportunity.

Finance Committee's Powers

THE ATTORNEY GENERAL referred to the constitutional position of the Finance Committee, raised by Mr. Welensky. Recommendations made by the Executive Council might, he said, not receive the support of the Finance Committee, which could either recommend or decline to recommend, though in either case the final word would rest with the Legislative Council. It was not in order for the Finance Committee to use the word "noted," it should either "recommend" or "not recommend."

Moving the adoption of the report on the delimitation of electoral areas, he said that recommendations had been made for the replacement of two non-official members by representing Africans by two additional elected members. There was a strong demand for extra representation in Copperbelt, and one member would be to give them both seats; the other area would be to give one seat in the Copperbelt and one elsewhere. The majority of the committee felt that the Copperbelt should receive one seat only, and that the other should go to the Midland area. That would make seven urban and three rural constituencies.

The House adopted the majority report by 16 votes to four. Mr. Welensky, Mr. Goodwin, Mr. Morris and Mr. Cook voting against the motion.

Mrs. GOODWIN moved that the Government should inform the Secretary of State of the non-official view that Copperbelt representation should be increased. He was supported by Mr.

Welensky, Mr. Page, Mr. Morris and Mr. Becken, and the motion was agreed after the Government side had indicated that officials would vote neither for nor against it.

MR. F. COOK, now the Economic Secretary, withdrew remarks which might be construed as a personal attack on Mr. Welensky, and asked that the latter would withdraw remarks which led to a show of Government. He did not understand Mr. Welensky's attitude towards the appointment and salary of the Director of Civil Supplies, for at a meeting of the European Housing Committee in August, Mr. Welensky had declared that the man selected for the post must be offered a good salary, perhaps £1,500 a year.

THE SECRETARY FOR NATIVE AFFAIRS said that nobody could deny the inefficiency of Native farm labour, which was partly due to lack of consumer goods. For the African would not work if he could not spend his money. It was unlikely that a wife could be found through application or Government action. The attractions of industrial life, with regular hours and many amenities, made farm labour unpopular, and farmers must therefore aim at conditions similar to those in Britain, where men identified themselves with the farm and the soil, and took a pride in their work. The African had the same love of the soil, and he should be able to live with his family in a good house on the farm and thus feel identified with it.

Land Settlement Report

THE ECONOMIC SECRETARY announced that a veterinary officer had visited the Chisamba area, where serious cattle disease had broken out; vegetative poisoning was suspected in some cases and heart worm in others.

A request had been made by Mr. Welensky that the Land Settlement Report should be reviewed. There seemed to be no point in a Government board submitting yet another report, he thought that the board should be executive in character, with a majority of farmer members, prepared to give their time to tackling problems and advising on their solution. The farmers themselves must take a bigger hand in the direction of European agriculture. Last October a meeting of farmers' representatives had to discuss the shortage of agricultural machinery decided that a list of the needs should be compiled and sent to him, but he had still not received it; it was no use complaining of machinery shortages if farmers would not say what they wanted.

There was no point in more settlers coming to the country if land and labour were not available. Part of the solution seemed to lie in more intensive use of existing farms, many of which were not yet fully developed. On such problems an Agricultural Production and Settlement Board could offer the best practical advice.

No final decision had been taken as to whether the groundnut scheme was to go ahead in Northern Rhodesia, but there was good reason to believe that it would be launched. The final decision would be taken in April when the chairman of the Overseas Food Council would visit the country. Results of trial plantings in the Mumbwa and Fort Rosebery areas would then be available.

MR. J. F. MORRIS and MR. B. GOODWIN complained of delay in improving roads and cited the excuse that machinery could not be obtained. If Africans could obtain heavy plant, why could the Government not do so?

Education Department Criticized

In the debate on his motion asking for a select committee to investigate the position of European education, MR. WELENSKY said the Government had never appreciated the gravity of the task nor fulfilled it adequately. An official letter stated that the position regarding vacancies in 1948 for Northern Rhodesian children entering Southern Rhodesian secondary schools was critical; eight boys and 23 girls remained to be placed. European school-children in Northern Rhodesia in December, 1938, numbered 1,029, and in September, 1947, no fewer than 1,922, what showed the problem that had to be faced.

The select committee should investigate reported discontent in the European Education Department. No officials could not understand why Southern Rhodesia could secure teachers for Northern Rhodesia, the greatest difficulty in finding half a dozen. Though the number of hostels accommodation was vitally important, Government was showing insufficient drive.

MR. J. W. SERGANT said that the European Education Department had been more neglected than any other. With a staff of whom 75% were temporary and sonst not qualified,

Concluded on page 591.

Empire trade; but that plan aims at objects which are contrary to those which are so pompously announced in this document, and so quickly withdrawn afterwards. The Marshall Plan is contrary to the principles of this document.

"It is wrong to regard the expansion or greater unity of Western European trade as merely European affairs. As much of history, Holland, Belgium, France and (as included Portugal) happen to be those countries which command almost all the Colonial territories of the world, and it is by building up this idea of a Western European trading entity, and by the interchange of Colonial trade, that we can find a way out of our economic difficulties."

"We could wait quite a short time looking forward to building up an entity by this combination which could live and breath without gifts and loans and dues from the United States. To build up these entities demands discriminatory policies. What is the good of a document which says exactly the opposite? It sets up the principle of multilateralism and then knocks it down. What is really required is to set up the principle of preferences now and then to build up a financial equilibrium. Then we can proceed to free and federate trade."

World's Largest Importers

MR. G. W. ODEY, in a maiden speech emphasizing the need for the retention of Imperial Preference, (in part):

"In the 19th century we led the world in international trade. We were, and still are, the world's largest importers. In spite of that, in the 19th century we had a large favourable balance of trade. We suggest that favourable balance by exporting our capital which we used to develop and to satisfy every country in the world where our trade penetrated."

"To-day it is the United States which has the largest favourable trade balance that any country has ever had. The United States is not large importers, and with their great natural resources and their great productive capacity it is difficult to see that they ever will be. In consequence we shall never again be in a condition satisfactory for revolution to take place until the day has been made clear for the private American investor to invest his capital overseas."

"At present there is practically nowhere where he can invest his money with any confidence. Until that day dawns when capital can once again flow freely, members on this side of the House will cling to Imperial Preference, which has served us so well in the past, and pursue bilateral agreements which, while more limited in scope, are nevertheless more productive of immediate results and more in line with the realities of our present position."

An attack on Imperial Preference was made by MR. R. MACKAY, who said:

"One of the illusions to which I am faced is the colossal illusion of Imperial Preference. I am not arguing against increasing Empire trade, for the more trade we get with the countries in the Dominions the better. But more than half of Britain's investments are outside the Empire and more than half of our trade goes outside the Empire. It is ridiculous to argue that in Imperial Preference we shall increase the productivity of the world."

"The suggestion I make in all seriousness is that when our economic problems are what ours are, we were at Dunkirk, when every Minister must be worried about the balance of payments, and the dripping away of gold, and the sure knowledge that this cannot go on beyond two or three months—so that we take steps at once to get political federation of Western Europe in which we can pool the resources of that great continent. The Marshall Plan can lead us over, for about three years, provided we plan and organize the resources of Western Europe."

Economic Bondage to United States

MR. R. ECOTTBY said that the first and most important objective for 1948 was for this island to produce more food, more coal and more steel; to bring our obsolescent industries up to date; and to free ourselves from abject and permanent economic bondage to the United States, by developing the limited resources of the Colonial Empire, and by expanding reciprocal trade both with the Dominions and with Western Europe.

SIR A. SALTER doubted the effectiveness of a federation of Western Europe.

"It is quite true," he said, "that ultimately the resources of the dependent Empire, in Africa and elsewhere, will be very great; but how soon can they be developed? Will we have expenditure of capital and where is sufficient capital to come from, unless there are, in addition to what we can afford, the resources of other vital exporting countries like America? Obviously, it is an impossible thing."

The hon. Member for North-West Hull seemed to think that the solution was a federation with Western Europe. He did not apparently contemplate any complete customs union. But, if losing we go in the direction of that union, do we think that the necessities of this country, which are food and raw materials, can possibly be met by economic arrangement? However, they may be, and however good a contribution they may be to a general system with Western Europe. It seems to me to be perfectly fair to say:

THORNTON HORNIGOLD did not criticize Government for signing the Agreement but for failing to enable manufacturers and adventurers in this country to give the plan full effect. He said:

"I am an advocate of Imperial Preference. It has done a great job for the Commonwealth and will do a great job for it in the future. The case for Imperial Preference has suffered from two things: it has been grossly overstated by Lord Beaverbrook, and it has not been sufficiently praised by H.M. Government."

"It is obviously not true that Imperial Preference is the only or even the main basis of Empire trade. Empire trade depends on being able to sell goods that the Empire wants at a price which the Empire can afford to pay. That is a materialistic conception of humanity; it is common sense."

"When we demand Empire trade we cannot expect the Empire to exchange foods which she wants from the United States in order to buy goods which she does not want from Britain. I believe that Imperial Preference is going to play a very large part in the future development of international trading relations, not only in the British Empire, but in the application of the Marshall Plan, and in the integration of

Government Reply

THE PRESIDENT OF THE BOARD OF TRADE said in replying to the debate that there was nothing in the letter or spirit of the Geneva Agreement which would prevent this or any other nation from making bilateral agreements.

"The best answer to the fears expressed is the fact of our policy in bilateral matters since the end of the Geneva Conference last week. I gave details of 17 trade negotiations which we have had with individual countries since August since the preparation of the Charter. In fact, we have concluded agreements with 22 countries since August. We have talks now going on with a further 10 countries. We are, in fact, prepared to have talks with any country that has useful goods to sell us, and which is prepared to take our own goods and work out with us appropriate means of payment."

The main line of attack is the suggestion that the concessions made in Geneva on preferences virtually mean the end of the British Empire. We on this side have never believed that the bonds which have kept the Commonwealth together have been based on the cash balance of Imperial Preference. The common traditions of this country and the Empire go far deeper than differences on Imperial Preference. To say that the concessions entered into in Geneva represent a weakening of the links of Empire is fantastic and just hysterical. When we have eliminated preferences on the total volume of trade amounting to only 2% of our pre-war Imperial trade, we show completely unfounded that suggestion is.

"Take the case of Rhodesian tobacco. This has been quoted very much in relation to preference concessions. Is it true that we have made a concession on Rhodesian tobacco? The present preference calls for 15.5d. to the pound reverse duty is reduced to the level prevailing before April 1947—now we hear moans that we have sold the Rhodesian tobacco products down the stream, taking another line of Empire."

"What are the facts?" One tobacco manufacturer has just concluded a long-term distribution and purchase agreement for Rhodesian tobacco covering five years ahead—the biggest thing we have ever done in the Rhodesian tobacco trade—providing that we purchase two-thirds of Rhodesian tobacco exports on an extended production. Before the war we were importing about 18,000,000 lb.; this year we shall hope to get about 29,000,000 lb.; next year if all goes well with the production, about 37,000,000 lb.—double the pre-war rate."

So I leave this question to be judged on facts and not in theory. Whether the Geneva Agreement is in fact revenue raising, having the Empire developing the bilateral trade agreements, co-operation with Western Europe, which this country has set as its programme for the immediate future. On all these facts I am sure the House will agree it is not the narrow consideration of Imperial Preference, that we shall be pursuing, but the full programme of Imperial development because H.M. Government believe that in the way made the to the future."

tools and mechanical repair facilities have been required on a far more extensive scale than it was possible to provide for at the outset.

Up to the time when operations began, it had been impossible to obtain adequate spares. The managing agents have given special attention to the improvement of the repair organisation, and additional workshop tools and plant are being provided as rapidly as possible. Further supplies of this sort of equipment are, however, needed to overcome the immediate difficulties, and for these, as for many other classes of supplies, the scheme is dependent to a very important extent on surpluses arising from military purposes. The shortage of mechanics and other skilled workers will be overcome as quickly as possible by the training of a sufficient number of Africans, but, in the meantime 200 Indians, many of them with a knowledge of Swahili, will be recruited on short-term contracts to help fill the gap.

The number of tractors available for clearing operations has also been reduced by the need to use a proportion of the available force for the urgent and important task of training men to drive effectively the handling of railways and roads, and for work in preparation for the erection of the essential buildings. In the one year so far have more than 37,000 hours been devoted to flattening the bush, or more than 25,000 for hours to winding up.

Trial and Error

The results so far achieved cover a period of only five months since bush clearing was started on a substantial scale at the beginning of July. The most important task has been to find out, largely by trial and error, the best methods to adopt in order to put on a sound footing the recruiting and training of the staff, and their assimilation into the coordinated teams for their different jobs, and to develop by continued experiment the most suitable techniques for clearing the type of bush prevalent at Kigamboni. There is good reason to expect rapid speeding up of the bush-clearing work when the preparatory phase has been completed, and a sufficient supply of suitable equipment to eradicate the roots of vegetation when bush has been obtained.

One of the most important changes in technique which has already been decided on is what may be described as selective clearing. In future any ground under native vegetation, particularly dense, will be left uncleared; the consequent concentration of equipment on the easier ground will, it is

expected, greatly accelerate clearing operations.

The number of heavy tractors in Tanganyika at the end of each month has been as follows: May, 161; June, 185; July, 258; August, 320; September, 330; October, 361; November, 370. These numbers are actually in excess of what was originally planned for the first year, but they consist of second-hand machines.

During the early months the rate of sending the tractors from the port of Dar es Salaam inland 100 miles to Kigamboni was limited to 12 a week owing to shortage of suitable driving stock. This rate was subsequently doubled by the return of wagon flats, which previously had been used for transporting oil and stores for the railway extension from Msagali to Kigamboni.

Use of Tanks

Despite the failure of the experiments with the Valentine tank, further experiments have been undertaken with other types of surplus tanks. It has become clear, however, that tanks can be used for heavy bush-clearing work only after very substantial structural and mechanical modifications, and it has proved necessary to design special equipment to go with the tanks. There is now reason to hope that a successful adaptation of the Sherman Mark III tank will be achieved, and that it will prove possible to meet from surplus tanks of this type a large proportion of the balance of the requirements of the scheme for heavy tractors.

Landing craft and cranes have been acquired for the landing of equipment, particularly in the Southern Province, for road transport. We see lorries of different types in large numbers will have to be obtained for local repairs, many kinds of tools and for both fine repairs, fully equipped workshops, including power saws and grinding machines and electric welding and other equipment, for the supply of water, equipment for boreholes, pumps and piping for the water services, drugs and surgical equipment for the land survey work and the scientific units, maps, books of laboratory supplies and surveying equipment; and for the housing and the means of subsistence of the staff. Permanent buildings can be built in large quantities of tents, huts, furniture, household and sanitary appliances, building and electrical materials and equipment.

This will all come in almost all cases either by military or commercial procurement without the exercise of priority, or from military surpluses.

[Editorial comment appears under "Matters of Moment".]

Geneva Tariff Agreement Approved by Commons

Imperial Development the Key to the Future," says Government

THE PARTICULAR INTERESTS of the colonies received little consideration in last week's debate in the House of Commons, which approved the Geneva Tariff Agreement by 321 votes to 111. The discussion, as far as the party line was characterized by an emphasis on the need to strengthen economies with Western Europe as well as with Commonwealth countries, determining up for the Government, Mr. H. Wilson, President of the Board of Trade, said, last night, taking the view that while the Government had agreed to eliminate 50 per cent of the agreements covered only 5% of the country's pre-tariff trade amounted to 21% of total trade with the Commonwealth. India could not be regarded as a serious threat to Imperial Preference.

Rights of Discrimination

MR. A. G. BOTTOMLEY, Secretary of Overseas Trade, said, when moving the adoption of the agreement, that though there was a large field for the expansion of trading relations between the United Kingdom and other Commonwealth countries, there was no hope that by concentrating on that alone this country could do without trade with the rest of the world. He said, *inter alia*:

"We have three stages which I hope will correspond with the adjustment of the present disequilibrium between the old and the new world. During 1948 countries can discriminate more or less unconditionally. From the beginning of 1949 until March, 1952, countries have the same right to discriminate at their discretion, but they may be called to justify their actions before the tribunals of the Trade Organization."

After 1952 the general assumption is that countries will not need to discriminate, but they can apply for the general

right to do so, which will be decided by the Organization. From the beginning of 1949, therefore, freedom to discriminate will to some extent be subject to the concurrence of the Organization, but until 1952 a country can, generally, without any fear of persistent interference, complain if upheld by a majority of the organization.

We have suffered a calamity in the absence of Commonwealth preferences for our exports on markets in which those foreign countries had a trade in 1938 with the Commonwealth countries concerned worth £37,000,000; in return we have obtained tariff reductions affecting UK exports value in 1938 at £48,000,000.

"There has been no question of dismantling the preferential system, but, rather, of making concessions in it as part of the general bargain and as the countries enjoying the preference had to be satisfied, we can be pretty sure that the bargain, as a whole, is reasonably sound."

MR. CECIL CYRUS, for the Opposition, stressed the unrivaled possibilities which the British Empire provided for developing the raw materials which the world needed. He added:

"I state categorically, first of all, that the Marshall Plan is incompatible with the traditional doctrine of unilateralism and non-discrimination, since it seeks by way of bilateral, unilateral or quadrilateral arrangements, to bind up trading entities which will never progress and progress towards many-sided trade."

"Mr. Amery in his recent book expresses it in this way: that Europe constitutes a group of nations whose misery is that they want of organization, and can be freed only by mutually agreed co-operation, implies an outlook fundamentally inconciliatory with the whole policy of keeping the world broken up into small non-co-operating units by the doctrine of non-discrimination."

The Marshall Plan is, however, perfectly compatible with the building up of European trade and the expansion of

White Paper on East African Groundnut Scheme

Official Report on Progress to the End of November, 1947*

THE FOLLOWING REPORT records the progress made in the first year since His Majesty's Government decided in November, 1946, to start work on the East African groundnut scheme as described in Command 7,030.

Execution of the initial phases of the plan has been entrusted to the United Africa Company Ltd., acting as managing agents for the Minister of Food, on whom H.M. Government decided to place the responsibility for carrying out the programme. H.M. Government acknowledge the valuable work which the managing agents have done in pressing forward with the development of the scheme and the untiring cooperation which they have received from the Government of Tanganyika.

The first question to be decided was which of the five main areas recommended for development to choose for the first year's operations. Despite the fact that a branch railway line and a considerable mileage of roads had been built, the choice fell upon the Central Province of Tanganyika Territory, primarily because of its relative accessibility—the selected area lying only a few miles to the north of the Central Railway Line and some 100 miles by rail from the port of Dar es Salaam—but also because it was expected that most of the land, which in this area is covered with thorn bush, would be easier to clear than the land in the other areas where the number of sizeable trees per acre is greater.

Dificulties in Getting Equipment

The aim of the first year's operations was to clear 10,000 acres of bush for sowing by the end of 1947 and to build up the organization required for the later extension of the scheme. It had been calculated that in order to achieve this the clearing equipment would have to be on the site in February, and that 200 heavy tractor units would be required. The only sources of supply for new equipment of this type in the U.K. and America soon showed that there was no chance of obtaining more than a few new machines from that source, since the demand already exceeded the supply from new production. It was therefore necessary to look for secondhand equipment, and this had to be purchased almost entirely from surplus military stores in many different countries. The largest single source of supply proved to be U.S. Army depots in the Philippines Islands, but machines were also found in the U.K., the U.S.A., the Middle East and Ceylon.

A bulldozer tank was converted experimentally for use on clearing work, but this proved this machine to be unsatisfactory for the work. All this equipment, of course, needed reconditioning before shipment. Orders also had to be placed for the wide range of agricultural tractors and implements required for delivery in Tanganyika later in the same year.

As these could not be obtained in time from the U.K., a mission was sent to the U.S.A. to examine many different types of machinery in use in the peanut-growing areas of Georgia and South Carolina. As a result of this mission a report and the fact that it would be more than two years before manufacturers in the U.K. would be in a position to meet the requirements of the scheme, a contract was concluded with a Canadian firm for the purchase of all the agricultural machinery required for the programme for the first two years. It is hoped that it will be possible later to meet at least a part of the needs of the scheme from manufacturers in the U.S.A.

Although it was clear that it would be impossible to over-haul and ship the clearing equipment in time to arrive in the Central Province of Tanganyika in February there was reason to hope that by speeding up the purchase and shipment of heavy tractors against the requirements for later years, it

might still prove possible to achieve during 1947 substantial progress towards the year's target. During January and February, however, the fuel crisis and the general dislocation of the transport system delayed the reconditioning and movement to seaboard of the machines bought in the United Kingdom; furthermore, the first shipment of supplies was held up for over two weeks by logs and storms.

It was not until January 23 that the first 10 of the 125 heavy tractors allocated to the scheme from the U.K. were shipped. These tractors were unloaded in Dar es Salaam at the end of March, and after a journey delayed by the reaching of a timber embankment owing to floods arrived at Kongwa, the site of the operations in the Central Province, on April 1.

Meanwhile preliminary negotiations were started with the Tanganyika Government on such problems as the raising from the recruitment of staff, the need for port and rail facilities, and the terms and conditions of leases, and every effort was made to ensure that any temporary dislocation of the general economy of Tanganyika due to the rapidity of the launching of the groundnut scheme should be reduced to a minimum.

Arrival of Advance Party

The advance party of the managing agents, accompanied by a number of representatives of the contractors who had been engaged for the first year's clearing operations, arrived in Dar es Salaam at the end of January 1947. Their duties were, among others, to arrange for the reception, transport and servicing of equipment, plant and machinery; the establishment of the first temporary camp and subsequent permanent camps near Kongwa, the survey of the first 10,000 acre units, the recruitment of labor, and the starting of preliminary clearing and constructional operations; including the provision of an airfield near Kongwa and the settlement, in consultation with the Tanganyika Government, of local problems as they arose.

By the end of April, the first few tractors and some 1,000 Africans had begun work at Kongwa and the first tasks of building the organization and staff, and clearing had been taken up.

The clearing work has involved the cutting of traces through the bush, the flattening of the ground, the burning of the debris, windrowing, the felling of larger trees, and the extraction of the roots. For each operation it has been necessary to develop a technique adapted to the conditions on the spot.

Bush-Clearing Problems

The complexity of the clearing work has been due to the particular character of the Kongwa thorn bush. On the basis of experience elsewhere, it had been expected that the heavy rootless bushes cleared by tractors would rip out the roots of the bush, if not at the first attempt, remaining in the second, to a sufficient depth for the planting of groundnuts. In practice the extensive, toby and durable roots of the Kongwa thorns, and the multiplicity of stumps, have proved beyond the power of normal clearing machines. After many weeks of experiment with modifications of equipment, a method of root-clearing has been found, but too late in the season to plant more than 8,000 to 10,000 acres this year. This particular difficulty is unlikely to be met with in the other areas of Tanganyika to be developed in 1948 and subsequently.

Large-scale clearing operations began on July 1, by which date 70 clearing tractors had arrived at Kongwa. Until September almost all the tractors available for clearing work were concentrated on the flattening of the maximum possible area of bush. In October the emphasis was moved to the windrowing of the debris, and in November, on the basis of the varied experiments which had by then been carried out, to the removal of the roots, so that as much as possible of the cleared area can be ploughed with groundnuts.

In addition to the clearing work, over 100 miles of traces have been cut through the bush in the Kongwa area in preparation for further clearing, and small areas have been cleared for the ploughing school at Kongwa, and experimentally in the Southern and Western Provinces of Tanganyika.

In mid-July attention was drawn to the risks, difficulties and delays inherent in a pioneering scheme of this kind. Delays in the arrival of the equipment early in 1947 caused serious set-backs to the clearing work. The most serious obstacles to the rapid progress of the scheme, however, have been the small proportion of available tractors which has proved possible to maintain in regular operation during these early months, and the character of the Kongwa bush. Spare parts

might be made dawned upon certain ones with the force of a revelation. To-day the word is sadly tarnished. Its dreams, once so bright, have been so marred by uncertain hands that their glory has departed. Purases which held a world of idealism and poetry have been spoilt by their use in bad verse and in after-dinner perorations. But in those days things were different. It was an inspiration to young men to realize the magnitude of its Imperial heritage and to think how it might be turned to spiritual uses. I dreamt of a world-wide brotherhood with the back courtiers of the Commonwealth race and creed consecrated to the service of peace. We believed we were laying the foundations of a great federation of the world. The "white man's burden" is now an almost meaningless phrase; then it involved a new philosophy of politics and an ethical standard, serious, and surely not ignoble.

The young men are there also looking for leadership and support. The man like Kipling said, "Who must turn us self to find each other in the To-morrow."

"But they have to be given the confidence that they will not be abandoned when the old men have done; that we mean to press on with the task of training and fitting the Colonies for self-government and equally that we mean to carry on that task until the proper time comes to relinquish it."

"We need for leadership and success something more than money, and brains and business sense; we need that indefinable quality, compact of character and vision, which has never been lacking in our race. I support this Bill because I believe that behind that spirit lies lives."

Not an Instrument of Exploitation

THE EARL OF LISTOWELL, Minister of State for the Colonies, making his maiden speech in that capacity, had said that the essential resources of private individuals and companies were no longer sufficient for the large-scale expansion of primary production overseas which was now envisaged, and that the time had therefore come for the Home Government to put up the necessary capital and appoint its own agencies to undertake what would be one of the largest and most imaginative financial and welfare ventures in modern times.

But too much must not be expected too soon. There would be disappointments and delays in obtaining essential equipment, even though Great Britain would deny herself in order to provide machinery. Not for two or three years would results of the overseas production drive begin to be seen, and it would be longer than that before the benefit could be felt.

Lord Paston added:

I have heard it suggested that because it is to be done by the Minister of Food to obtain food for this country at cheap rates he can the Food Corporation might become an instrument of exploitation. I do not believe there is any foundation whatever for that suggestion. A minister afterwards can provided in the Bill to prevent anything of that kind occurring. It is not the intention of the Government that the Development Corporations should have a monopoly in the building overseas investments or that they should enjoy any special privilege above that given to all competitors in the same spheres of activity. There is ample scope in the Colonies for all the private and public capital that is likely to be forthcoming in the course of the next generation. And it is not our policy to discourage the investment of private capital so long as it does agree with the plans of the Colonial Governments for the development of their facilities.

Diarchy and Triarchy

VISCOUNT SWINTON was uneasy about the diarchy, the divided responsibility between two Ministries, created by the Bill, and feared that it would fail to achieve that smooth working and quick local action and decision which were so important.

LORD RENNELL agreed. The Government should be warned by the appalling results of diarchy or triarchy in civil aviation, where two Ministries were not always on good terms while a corporation was from time to time an extreme bad neighbour to both. He continued:

One of our greatest difficulties has always been how to apply research in practice. In the past there has been little concern the discovery of an important seed, a new variety, or the improved application of a certain product to economic cultural purposes and the practical application of that research. In great many of those discoveries are not in the early stages of growth available for commercial production, and a understanding that it is one of the principal purposes of the Development Corporation to bring information and material of some sort to transmit what the scientist has found into

practical experience in commercial and industrial production. Inasmuch as the corporations fulfil this need, they seem to fulfil an even greater need than any of those that have been referred to by many speakers on this subject in another place and in correspondence with the Press."

VISCOUNT TRINCHARD said that he spoke as chairman of the United Africa Company, managing agents for the groundnut scheme until August next.

The managing director, Mr. Frank Samuel, had conceived and drawn out the scheme, which he described in one of the most remarkable seven-page documents he (Lord Trinchard) had ever read.

He did not share the view that the Overseas Food Corporation, which would soon become responsible for the work, should be transferred from the Ministry of Food to the Colonial Office. There would be no resultant advantage, and it was only right to think that Africans would prefer to work for a corporation under the control of the Colonial Office. They had no conception of the difference.

LORD HAWKE considered it fundamentally unsound that a corporation, a para-statal body, should own or hold and under long tenure, a Colony, Dominion or foreign country. The acquisition would be welcomed, of course, but once the honeymoon was over diplomatic incidents of the gravest order might well occur.

The growing nationalism of Native peoples on their way to Dominion status must make them especially averse to any continuation of exploitation, and the Ministry of Food would soon be dubbed an anachronism. If there were to be such accusations, they should be against individual or companies, never H.M. Government.

LORD LLOYD asked for a definition of the effect of the Bill of the Havana Charter, Article 30 of which appeared to him to say that we must buy at the lowest world prices, regardless of the source of the goods and of our imperial interests. That chapter might most seriously damage the intentions of the Bill.

Havanna Charter

LORD ALTRINCHAM urged the transfer of Italian and Maltese families to Colonies short of labour, saying that Italians were working well in Kenya for very high wages. Evidence that white men worked hard on the land had a good effect on the African.

He believed that in some way the undertakings which this country had been pressed to make at Havanna and elsewhere were absolutely incompatible with the welfare of the Colonies. We should be compelled either to give up these projects or cut and grind sacrifices down to the world's lowest rate of production, which was contrary to the object of these schemes. The matter required the most serious attention.

Finally, may I say how deeply I endorse all that Lord Swinton said about the need for faith in ourselves? At the moment we are being suspected all over the world of a loss of faith in ourselves. We have carried things to a great point of success and then abandoned them. The effect on the world and our Services is very grave.

In Africa the Colonial Service may once again find itself urged to proceed with schemes of political emancipation, the kind of responsibility which they know to be entirely out of keeping with the capacity of the population—demands put forward by the half-educated minorities who in no way represent the mass of the people or their welfare. This is where the Colonial Service will require help and understanding.

I hope that whatever Government may be in power in this country will remember that to allow the demand for political responsibility to outrun capacity, financial and political, is the most dangerous thing for the welfare of the people themselves and the greatest injustice which they can do to our public servants throughout the Colonial Empire.

LORD LISTWELL regretted that he had not studied the Havana Charter, but he would inform Lord Lloyd of the divergent and conflicting views of the Bill under discussion.

While there was a strong political case against the division of responsibility between two Ministries, he did not fear that their differences would be serious in practice. In case of disagreement Cabinet machinery should suffice.

There was no scruple in statements that railway material urgently needed to move groundnuts in Nigeria had been diverted to Tanganyika because of the groundnut scheme. In fact, the railways of Tanganyika and Nigeria were the different gauges.

of that shown in the schedule. Whereas it was expected that 150,000 acres could be put under groundnuts this season, the White Paper gives 10,000 acres as the maximum which it will be possible to plant. Our own information is that the figure is more likely to be about 70,000 acres. That of course, is a sad disappointment; but if the unexpected and unusual difficulties had been

clearly explained, as they should have been, everyone would have understood long ago that the crop estimates for the first year must be abandoned. Two encouraging factors are that the yields from experimental plots have been considerably above the estimated average, and that valuable timber resources have been discovered during the operations.

Firmer Faith Essential to Colonial Progress

Lord Milverton's Striking Speech in House of Lords

1 LORD MILVERTON (until lately Sir Arthur Richards) who recently retired after 39 years in the Colonial Service, made a striking maiden speech last week in the House of Lords on the second reading of the Overseas Resources Development Bill.

He mentioned that he had served under 20 Secretaries of State for the Colonies, of whom four are now members of the House of Lords;

In the Colonial Service, he said, had long prayed for the enlightenment of its masters, of whatever party, and dreamed of such action as the Bill would now make possible. Lord Milverton continued (in part):

"We have realized that something more than the animic logic of the economist and the expurgated idealism of the empire political administrator was our crying need. We wanted action inspired by dynamic faith—faith wholly held, not half held or apologetically held. We wanted effective help and a recognition of how much work study and thought it takes to believe in anything effectively."

The present Colonial production is basically inefficient, and the inefficiency is tied up with the network of tradition and suspicious outworn systems of land tenure, tribal custom, and innate conservatism. It was realized that just as was and is the contribution made by private enterprise to the development of Colonies there remained a whole field of development which private enterprise, for a variety of reasons, was unable or unlikely to touch. So the idea of a Colonial Development Corporation took shape, with the intention of supplementing, not supplanting, private enterprise, of stimulating it and working at times hand in hand with it.

Business Men Can Guide Colonies

Eighteen years ago I was seconded from the Colonial Service to serve as Governor of North Borneo at the request of the court of directors of one of the best of the chartered companies. It was a refreshing experience for a civil servant. Amongst the things I learned was that "a band of business men in the City of London will guide the destinies of a Colonial territory and look after its people with at least as much enlightenment and sense of responsibility as the Colonial Office itself."

Indeed in these modern corporations I see the old chartered company rising like a phoenix from its ashes—a chartered company with a Government halo, shorn of administrative duties and concerned only with protection and industry and welfare.

Business men are to be given a dominant position on the board of the Development Corporation, presumably because there is needed their insight and flair for what can be made commercially sound and also their ability and experience to ensure it. I admit that we need businessmen of wide vision who look beyond the immediate years, who canimeralize hope and amortize idealism as short, we can build better than they know. There is no basis at all, as I see it, for the fear that the corporation may enter on fields already satisfactorily occupied by old-established firms, unless use that could not be development in any true sense of the word."

Colonial Civil Service welcomes both corporations wholeheartedly. We particularly welcome the freedom of the decision as to whom the Overseas Food Corporation under the terms of the Secretary of State for the Colonies. Surely this is no way to preclude the position of the Colonial Secretary to place upon him the ultimate responsibility for the Overseas Food Corporation.

The suggestion of rivalry between the two corporations does not make any sense to me. Although the ultimate

responsibility will rest with the Colonial Secretary and the Minister of Food, executive management will presumably rest with the respective boards. Heaven forbid that either Lower House or Montagu House should take an active part in their executive work. That, my dear, is disaster and frustration of the very purpose for which the personnel of the board has been so carefully selected.

"Progress with a Business Sense"

These corporations—the Development Corporation in particular—have to find a middle course somewhere between those starchy old gentlemen who wish to run Utopia on a background of sternity and the pure business outlook which refuses to consider any proposition unless the prospects are adequate and immediate. I take it that what we want is romantic realism—progress with a business sense: in fact, *seams à la mode*, with the iron supplied by a business board.

We must make economic haste. But let us not make haste too recklessly. We are dealing with human beings and to do a success, responses for the welfare and the welfare of the world we must carry them with us and have their sympathy and understanding.

What is needed to attract business enterprise and capital, whether it be local or European, and having attracted it, to enable it to flourish? It can be expressed in one word—stability. In many parts of the Colonial Empire the practical programme hurried on from London and I am not now speaking of financial surpluses on the increasing of the general public debt spurred by foreign critics. This created conditions of instability which themselves bind and repel enterprise and so put further away that economic sufficiency without which no one talk about self-government and fitness for self-government.

The Colonial Civil Service knows that civil liberty needs economic security, and to have any meaning at all, our country is most anxious to maintain the meaning of civil liberty. Let us then, in maintaining your hardships, that hills such as those before us, impeded boards of inquiry, and the displaying of great plans, and costly buildings, however unless you have a Colonial Service inspired by the sense of a nation which only a government and a great faith in it can preserve. You have to do a Service worthy of your trust. The recruits who have come to the Service recently are of the quality which the situation demands.

But—and here very far—but they need your trust and your support. The Service can defend half-bred faith; and to us in the Colonies it has sometimes seemed that faith at home was faltered. Words about economic progress and improvement in the standard of living cannot supply or make up for a lack of faith. It has sometimes seemed in these bleeding times that we doubted ourselves.

A talented African has recently restated the case in clear terms. He says that talk of democracy and freedom and self-government used like incantations and not the counters of clear thought, have lost their magic power. They have to be thought and lived. Men have recently died for them.

Need for Spiritual Support

I too say that we should make no confusion of life's machinery, with its ends, purpose—of aims with methods—that we should not, in planning the details of production, overlook the far more important planning of the environment that will automatically tend to release production and to promote liberty. The Colonial Service asks neither to be smothered in plutitude nor crucified on a cross of gold, but to be given the spiritual support, the spiritual essence which lies beyond the growth of the economy.

I look back to my early days in the Colonial Service, and earth still to the beginning of this century, and I recall the words written at the end of 1914 concerning those days by the late Lord Kitchener:

"Those were the days when a vision of what the Empire

MATTERS OF MOMENT

HIS MAJESTY'S GOVERNMENT are as satisfied to-day as they were a year ago that the East African groundnut scheme can be carried out on the general lines and within the timetable set

Partly maintained by the original in Groundnut Plan, plan: This is the most important statement in a White Paper from which we quote extensively on other pages. The

document represents the kind of progress report for which we have repeatedly and vainly pleaded; and the pity is that the Ministry of Food has procrastinated so sadly and so unnecessarily in telling the public the truth. Had the facts now catalogued been made known at the appropriate time, they would have been accepted as reasonable explanations of unfavourable and incalculable factors; now they must inevitably be read by many people's excuses. Absurd rumours have been circulating in East Africa for months, simply because rumour will fill the void if news is deliberately withheld.

That elementally true and unassuredly have been recognized by the public relations officers of the Ministry, no presumption performed their duty of making the necessary representations to the Minister. Even if they neglected to press their point, it is certain that no experienced organization

that of the managing agents, The United Africa Company, will not have been guilty of such an oversight. It is therefore fair to charge Mr. Strachey with stubborn and obtuse refusal to be candid with the public in this country and in Africa, with the consequence that millions have been led to live in extravagant hopes for which no justification was to be found in the report of the groundnut mission. When, in about six months, responsibility for the administration of the scheme passes to the Overseas Food Corporation, under a chairman with a high sense of the importance of the right kind of publicity, there ought to be no repetition of such damaging reticence.

Difficulties with which the managing agents have had to contend included a world-wide search for equipment (tractors, tanks, landing craft, jeeps, and a thousand and one other items), the adaptation of tanks until a modification of the Sherman III, now

Damaging Reticence. holds out high hope. shortage of engineers and mechanics and the very belated arrival of urgently necessary machinery. As a result of all these handicaps, much less bush has been cleared in the first year than had been estimated and new sea planted, but a small fraction

TRAVEL IN RHODESIA

An experience you will enjoy. There is a wealth of interest for the tourist, including the world-famed Victoria Falls, the canyons of Great Zimbabwe, the mountains of Umtali District, the Matopos, Game Reserves and Native life.

Train services are modern with fully equipped dining cars and comfortable sleeping accommodation. The Victoria Falls are less than 3 days from Cape Town and Salisbury is within 24 hours of Beira.

The transportation services operated by the Kenya and Uganda Railways and Harbours and the Tanganyika Railways and Ports Services comprise railways, harbours, lakes and river steamers, and road motor services.

The two systems serve the internal
needs of Kenya, Uganda and Tanganyika,
in whose development they have
had an important part and provide
links with the Sudan and Belgian
Congo.

During the war, operating under conditions of great difficulty, the railways carried out the vital task of transporting military supplies and personnel for two major campaigns, as well as continuing to meet the internal transport needs of East Africa.

Now, despite an acute shortage of rolling stock and equipment, the railways are carrying more traffic than ever before. Perhaps the chief agents in this remarkable progress in East Africa, they are playing an important part in bringing about a smooth return to peace-time conditions.

A careful observer of the architecture of the Union of South Africa would probably place more emphasis on the character of the than on the spacious Old Dutch houses which form such elegant decoration to the countryside of Cape Province.

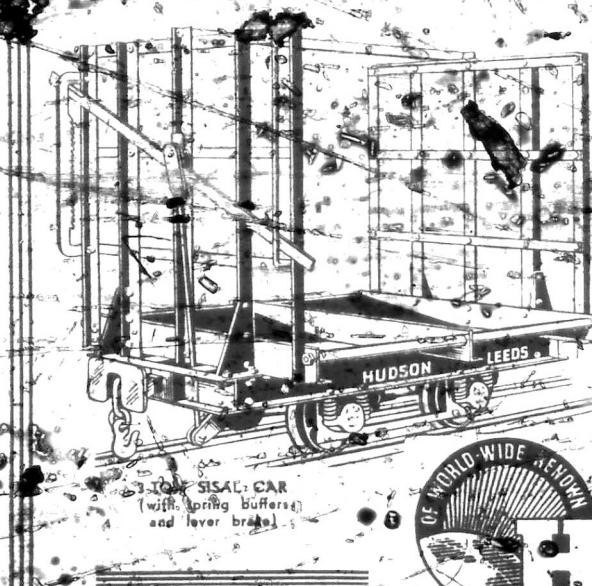

There are, however, numerous examples of this attractive form of architecture still remaining. Many of them as in the case of Constantia near Cape Town were designed as cellars for the vineyards which still surround them and have served as centres of the wine industry ever since the seventeenth century. This wine industry in turn has done much to contribute to the prosperity of the Union in general and of the port of Cape Town in particular and continues to hold its own to-day in the busy and expanding commercial life of the Union.

Full and up-to-date information from our branches in South Africa on the state and trends of local markets is readily obtainable on request.

IF YOU ADVERTISED GODS SET THEM HAVE BEEN PROVED BY USE

Of Commercial Concern

In the first 10 months of last year, 10,392 new settlers arrived in Southern Rhodesia.

India has allocated 688 tons of jute products to Northern Rhodesia in respect of the quota year ending June next.

Messrs. W. J. Bush & Co., Ltd., have declared an interim dividend of 4% (the same). Last year's total distribution was 12%.

An increase in the price of castor oil seed, of 3s. 10s. per ton, c.i.f. United Kingdom, port has been agreed by the Ministry of Food.

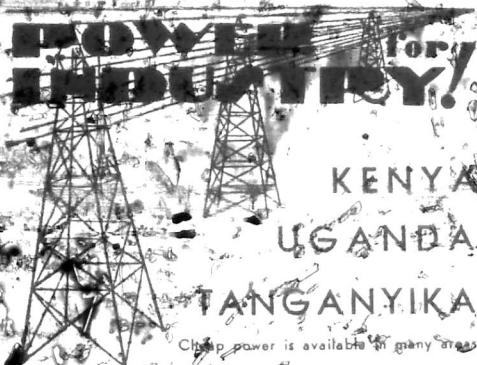

The Turkish Tobacco Industry Board of Southern Rhodesia urges growers to maintain production in the current season, since any decrease would injure the industry.

Years are to be provided for farm machinery essential to growers in Southern Rhodesia and shipments of mechanical aids for intensive conservation areas should arrive shortly.

Mgombela Plantation of Amsterdam, a sisal growing company in Tanganyika, reports a net profit for 1946 of £345,000 Dutch florins, against 323,000 ft. in the previous year. The dividend is unchanged at 9%.

Sir Alexander Gibb & Partners are calling for tenders on behalf of the Tanganyika Development Commission for the construction of main roads between Dar es Salaam and Tanga (200 miles) and Namanga-Arusha-Taveta (50 miles).

Great Britain bought 35% of Southern Rhodesia's exports in the first nine months of last year, during which only 6.4% went to America. Total imports in the nine months at £23,000,000 exceeded exports by about £6,000,000. The United States were the largest suppliers with 19% of the overseas purchases.

Company Progress Reports

London and Rhodesian. Vubatukwe, 2,800 tons of ore were treated in December, for a cost of £330, including a subsidy of £25.

Bushveld. A profit of £2,624 was earned in the quarter ended December 31, last, compared with £2,557 in the previous quarter. Development, 1,179 ft. off reef, 1,016 ft. sampled, 1170 ft. payable, 150 ft. av. 4 dwt. over 55 ft.

Vanderbijlpark. 8,311 oz. gold were recovered in the quarter December 31 from the crushing of 76,000 tons of ore, the working profit being £5,652. Development amounted to 3,011 ft. (4,700 ft. in the previous quarter) of 3,385 ft. sampled, 152 ft. payable, av. 3.3 dwt.

Castle-Etna. In the quarter ended December 31, a yield of 2,804 oz. gold and 1,276 oz. silver was obtained from the treatment of 15,000 tons of ore. The operating profit was £2,835. Development: Etna mine, 212 ft.; Tsessebe, 524 ft. sampled, 246 ft. payable, 71 ft. av. 5.3 dwt. over 26 in. Employees in service at the end of the period: Europeans, 20; Africans, 624.

Mining Share Prices

CLOSING PRICES of Rhodesian and East African mining shares on the London Stock Exchange were as follows:

Bechuanaland Exploration, 14s. 3d.; Bushveld, 2s. 6d.; Cam and Motor, 20s. 3d.; Charterland, 3s. 9d.; Queen Alannah, 18. 9d.; dat., 9d.; Fison, 10s.; Globe and Phoenix, 19s. 6d.; Gold Fields, R.Rod., 11s. 3d.; Kavirondo, 9d.; Kentan, 1s.; Kenya Cons., 9d.; London and Rhodesia, 6s. 7d.; Mashaba, 1s. 4d.; Motapa, 7s.; Nchanga, 6s.; Northern Rhodesia, 1s. 5s. 4d.; Ocean Cons., 1s. 10d.; Phoenix Finance, 2s. 9d.; Phoenix Finance, 2s. 5d.; Rezende, 3s. 7d.; Rod. pref., 2s. 6d.; Rhod. Katanga, 3s. 7d.; Rhod. Anglo-American, 6s. 10d.; Rhod. Corp., 7s. 9d.; Rhod. Selection Trust, 2s. 4d.; Rhokana, 1s. 5s. 5d.; pig., 2s. 3s.; R.Rod. Antelope, 1s. 6d.; Rosterman, 9s. 3d.; Selection Trust, 3s. 6d.; Schukwe, 1s. 9d.; Sherwood Star, 2s. 3d.; Surprise, 5s. 3d.; Tambo, 6s.; Tanganyika Concessions, 14s. 6s. 4d.; 4% pref., 2s. 7d.; Tat, 1s. 2d.; Uruwira, 10s. 2d.; Water, 18s. 6d.; Wilhelmsburg, 11s.; Zambesi Exploring, 2s. 6d.

Globe and Phoenix

GLOBE AND PHOENIX GOLD MINING CO. LTD. report that a re-estimation of the company's ore reserves shows 127,000 tons containing 1,02,560 oz. gold, or an average value of 17.64 dwt. These are divided into blocks of 79,500 tons containing 66,600 oz., and pillars of 48,500 tons containing 45,900 oz. At the end of the previous June the total ore reserve was 124,700 tons averaging 17.71 dwt.

Phosphate

MURRAY AND GRIFFIN LTD. Chairman of the Industrial Development Commission of Southern Rhodesia recently estimated that the prospects of exploitation of the large low-grade deposits of phosphates are good in the Matabele Valley. It has been said that the deposits, which contain millions of tons, will go far to solve Southern Rhodesia's fertilizer problem.

Nchanga

M.R. CARL S. DAVIS, a director of the Anglo American Corporation of South Africa, the Rhokana Corporation, Ltd., Mutuliro Copper Mines, Ltd., and Nchanga Consolidated Copper Mines, Ltd., left yesterday in the QUEEN MARY for New York in connexion with plans for the extension of operations on the Copperbelt of Northern Rhodesia.

Dividends

NIGEL VAN RYN REEFS, LTD. have announced a dividend of 10% for the year ended September 30, 1947 (the same). The dividend amounted to £49,362 (£23,413). The allocation £2,500 (£7,500) to reserve, is recommended, and balance £47,862 forward will be £9,884, against £9,687 brought in.

Mineral Production

CHROME ORE exports from Southern Rhodesia rose from 10,630 tons in November to 17,300 tons in December.

MONGAD PRODUCTION in Northern Rhodesia for the first 10 months of 1947 was worth £19,978,404 compared with £10,712,101 for the corresponding period in 1946.

Wolfram

An increase is anticipated in the world usage for wolfram, attributed mainly to currency difficulties impeding imports from South American countries. The new price is £1.10 per pound, 4.1%, compared with £0.91 per pound previously.

Uganda Cotton Problems Serious Decline in Production

MR. C. R. PATEL, M.L.C., President of the Uganda Cotton Association, said at the annual general meeting that the industry was greatly concerned at the continuing drop in production.

This year's estimate of 170,000 bales was the lowest crop for 17 years except for the 111,000 bales of 1943, when greater attention was rightly paid to food production on account of the war position. The 1946 output was no more than 227,000 bales, whereas the country ought to produce 400,000 bales if the African population was to be assured of a reasonable standard of living.

The yields per acre for the years 1941-2, 1942-3, 1943-4, 1944-5, 1945-6 and 1946-7 had been 245 lb., 171 lb., 208 lb., 336 lb., 265 lb., and 245 lb., and for the current season it would be below 200 lb. per acre for the first time since 1931. The planted acreage had also decreased. It was the duty of the Government to determine the causes of this serious situation. Among the major causes were:

Reasons for Reduced Crops

(a) Late planting. That should begin in May and end in early August at the latest, the cotton being planted simultaneously with the food crops. Experience showed that cotton planted in August and September was not likely to give good yields.

(b) The pests and diseases affecting the growth should be reduced to a minimum.

(c) The seed purity for each district should after experiment be kept apart in order to assure the best yield.

(d) Maize planting should be reduced to the acreage necessary to satisfy Uganda's needs, unless there were exceptional reasons for departure from that policy.

(e) The use of mechanical implements for the cultivation of large tracts of land should be actively encouraged. Present methods in each farmer confining his attention to an acre or two, would not result in a general increase of production.

(f) The price paid to the grower was not adequate, having regard to the higher prices paid to producers of other crops which could be grown with comparatively less manual labour. The price for the following season should be announced in March or April in order to give an impetus to planting.

(g) Government supervision of the picking of cotton should be improved, and steps should be taken to see that the 10% or 12% of the crop which remained unpicked was always collected by the growers.

Central African Airways

CENTRAL AFRICAN AIRWAYS are to expand their services. The "Golden Viking" service between Salisbury, Bulawayo and Johannesburg is being increased from four to six flights a week; the Salisbury-Nairobi-Kenya "Viking" will operate three times weekly instead of twice, and a new "Coastal Viking" service will leave Ndola at 7.35 a.m. and reach Johannesburg at 1 p.m. In addition, the corporation has applied for licences to operate between Bulawayo and Livingstone (to connect with the new B.O.A.C. service), Salisbury and Fort Victoria (Ndola and Elizabethville, Abercorn and Mbeya), Salisbury and Livingstone, Bulawayo and Beaufort West, Bulawayo and Fort Victoria, and Salisbury and Beaufort.

Currency Restrictions

NEW CURRENCY REGULATIONS stipulate that sterling notes other than those issued in Southern Rhodesia and South Africa may not be brought into Southern Rhodesia by persons other than travellers without the permission of the Minister of Finance. Travellers may import Rhodesian and Union notes to any value, but other British sterling notes are limited to £5. There are no restrictions on the import of foreign currency notes by travellers. Currency or bank notes issued in Southern Rhodesia or the Union may be freely exported to Northern Rhodesia, Nyasaland and the Union, but official permission to export them to other countries is required.

Joint Board Changes Name New Political Sub-Committee

THE EXECUTIVE COUNCIL of the Joint East and Central African Board decided at its January meeting to accept the recommendation of corporate members in East and Central Africa in favour of change of title. When the necessary legal processes have been fulfilled the organization will become known as The Joint East and Central African Board.

It was decided to establish a Political Sub Committee under a chairman other than a Member of Parliament. The main functions of the advisory sub-committee will be to study political developments in the Rhodesias and East Africa on behalf of the Executive Council and to discuss with affiliated bodies in Africa lines of political development which appear to be practicable as viewed from London.

Mr. Kyor Thomas, M.P., former Under-secretary of State for the Colonies, and Mr. A. E. Baldwin, M.P., who visited East Africa in the summer of 1946, were elected Parliamentary members of the Executive Council, from which Mr. Arthur Pearson, M.P., has regretfully resigned owing to inability to attend meetings regularly.

The resignation from the Advisory Council of Major-General Sir John Davidson, who now lives in Scotland, was accepted with regret.

The annual general meeting is to be held on April 15.

Native Taxes

NATIVE TAX for 1948 in Nyasaland has been increased to 10s. The share of tax received by the Native Treasuries will rise from 1s. to 2s., thus making it possible to increase the salaries of chiefs, councillors, and other Native officials. The additional revenue will help to pay for the development programme.

NEWS ITEMS IN BRIEF

The Tanganyika Legislative Council will reassemble in Dar es Salaam to-day.

The latest cost-of-living index figure in Southern Rhodesia is 139 (1939 = 100).

A non-Native census is to be taken in Tanganyika on the night of February 26-27.

The Governments of the Rhodesias are considering a joint savings campaign among Africans.

Southern Rhodesia has obtained 2,000 tons of barbed wire and 500 tons of flat iron from war disposal stocks in Egypt.

During a police raid on Maruano, a new Native location in the Nairobi district, 79 unauthorized Africans were arrested.

Four mechanical maize pickers are among the machines operated by the Kenya Agricultural Machinery Pool.

The Nyasaland Department of Agriculture has expressed anxiety over the shortage of fertilizers for the tobacco and tea industries.

A commission representing the Trusteeship Council of the United Nations will shortly visit Tanganyika Territory and Ruanda-Urundi.

No. 44 (Rhodesia) Squadron, R.A.F., is now expected to visit Southern Rhodesia in June on a combined training flight and goodwill mission.

A manifesto urging a boycott of the Legislative Assembly has been circulated in the Sudan by "The Sudanese Movement of National Liberation."

A complete township, covering seven miles by five, is being established in the Mackinnon Road area of Kenya, where the large military stores are to be housed.

One African was shot and later died in hospital when a police constable opened fire on a gang of about 40 Natives who broke into the house of an Indian in Nairobi.

Britain's new Industrial Journal finds immediate favour

INCE its first appearance in East Africa in May, *The Times Review of Industry* found immediate favour among business and industrial leaders and technicians. It deservedly so. The Times Trade and Engineering, a new publication is designed especially for all who require complete and up-to-date news of industry and commerce in Great Britain and throughout the world. It has proved particularly valuable to readers in East Africa, many of whom have a leading interest in the territory's newer technical and industrial advancement.

A new Native hospital is being built in Bulawayo. Four three-storey ward blocks will accommodate 1,100 beds, and another block will deal with 600 out-patients.

A major water scheme, the largest in Rhodesia, is planned by the Town Council of Gatoomba. A dam to be built on the Umvuvwe River will control a catchment area of over 2,000 square miles.

An assured market awaits Rhodesian farmers for everything they can produce during the next generation, said Mr. R. S. Hudson, Britain's wartime Minister of Agriculture, during his recent visit to Southern Rhodesia.

A public inquiry into the sale to a private company of 14,000 acres of farmland in the Qus Que district of Southern Rhodesia has been demanded by the town council. The land, known as the Kaseby Estate, was sold for £50,000.

Measures to reduce the cost of living for Africans in Dar es Salaam include closer supervision of cotton piece-goods distribution by the Economic Control Board, the provision of mobile canteens and restaurants, and the erection of 1,000 temporary houses.

The non-official members of the Legislative Council of Northern Rhodesia have informed the Government that representation of the Copperbelt in the Legislature should, in their opinion, be increased, and they have tasked that that view should be communicated to the Secretary of State.

Two Europeans recently ran a three-mile race through Mombasa for a bet of £100. The rivals were Mr. Cyril Breskof, aged 32, who was given almost a mile start, and Mr. Norman Milton, aged 25. The race was watched by crowds of spectators, and Mr. Breskof won by half a mile.

Book of Honour, containing the names of 420 British, Dominion and Colonial journalists and news photographers who died in World War II, was unveiled recently in the London Press Club. Among those recorded is Robert Lancelot Sugden, formerly of the *Rhodesia Herald*, who lost his life while on service in West Africa in 1942.

Legislation to prohibit Europeans from selling, leasing or hiring property in European areas to non-Europeans is advocated in a resolution passed unanimously by Bulawayo City Council. It was stated that Europeans were being forced out of premises by new Indian owners, and that nearly £10,000 worth of property in Bulawayo had passed into Indian hands.

Mahatma Gandhi, saying at a recent prayer meeting in Madras that an independent India could not tolerate legislation against her nationals, mentioned that a telegram had been sent to banish Indian settlers in East Africa protesting against a Bill against Indian immigration. He hoped the authorities in East Africa would realize the inadvisability of losing India's friendship.

An appeal for money and men for the Arab cause in Palestine has been made in Khartoum by the Sudanese Graduates' Congress. A recruiting centre is to be established for the registrations of volunteers, and the approval of the authorities has been sought for the collection of donations. A co-ordinating committee has been formed under the presidency of Sheikh Ahmed Es Sid El Fiq.

Representatives of every British territory in Africa, as well as delegates from French, Belgian, and Portuguese dependencies, will attend the congress on problems connected with tsetse fly control and sleeping sickness, which is due to open on Monday in Brazzaville in the Belgian Congo. Of the 26 British delegates, three represent the Tsetse Fly and Trypanosomiasis Committee in this country. They are Professor Patrick Buxton, of the London School of Hygiene, Dr. E. M. Lourie, of the Liverpool School of Tropical Medicine, and Mr. J. K. Thompson, of the Colonial Office, who is secretary of the committee.

Colonial Film Conference

(Report concluded from page 5)

meant nothing, and cameras took a amazed them. Scenes had to be linked together in the simplest possible way, and must be too short.

The ultimate aim was films for Africans with Africans by Africans, and they were turning increasingly to their Native own traditions, folklore, art and writings.

Director of Information Services

MR. K. W. BRADFIELD, Director of Information Services at the Colonial Office, stressed the need for realism in facing the financial difficulties. Film-making was extremely expensive and production output was equally costly.

There were some 450 commercial cinemas in British colonial territories, but there were only 50 cinema vans scattered among a total population of some 60 millions, and not more than an additional 300 static projectors were in use. Therefore, before films could reach a much wider audience a tremendous amount of work had to be done in providing projection facilities.

About 20 million people saw films in Colonial cinemas every year. The only way in which such films could be controlled was by censorship boards, which had now been set up in practically every Colony. These boards were, however, working very much in the dark, and the first point in future policy must be research into the effect of commercial films upon unscientific audiences.

Before 1939 practically nothing in the field of educational films was attempted overseas, but the war had seen a great burst of activity. The Colonial Film Unit had been created, the raw-stock scheme instituted, and a number of cinema vans provided by the Ministry of Information.

A new film unit was being set up to cover Southern Rhodesia, Northern Rhodesia and Nyasaland, and in widening the scope of the Colonial Film Unit it was hoped to obtain assistance under the Colonial Development and Welfare Act. The Colonial Office was anxious that the good work should be continued, and that in films as in other fields, the aim should be to teach the peoples of the Colonies to "run the show themselves."

Challenge of Illiteracy

MR. JOHN GRIERSON, the pioneer of the documentary film, made the challenge in a world half of whose people were still illiterate. The task was to spread fundamental education in each backward area. International criticism of British Colonies was often false, but the examples of the Soviet Union, Mexico, and China in eradicating illiteracy would be kept under world notice.

If Africa films must be created as part of African development. There was practically no knowledge of the most useful sort of film, and men must be found who would make this their life-work. He was tired of hearing of people dropping down Africa to make films or educate the Natives. Men must work and live with the African problem and be concerned above all with creating a sense of initiative and management in the Native.

MR. ALFRED ZON of the Films Division of the Central Office of Information, said that since 1942, the research section of the COI had graded 600 out of 4,500 films as being suitable for use in the Colonies. But much projection equipment was needed, and in view of its shortage it must be used in the best possible way. There was a great need for systematic and controlled research, which was being encouraged. The cartoon film was extremely useful in simple education, and they planned to make two five-minute cartoons on malaria and soil erosion.

The afternoon session was devoted to questions, discussion, and comment by members of the audience, including several African students, whose opinions were expressed simply but often vividly.

A girl student from the Gold Coast declared that she averred African obtained a complete false picture of the Europeans from the commercial films he saw. He believed the American to be a man who walked about with a revolver in his hand; the Frenchman a person who habitually patronized French night clubs; and the Englishman one who simply sat behind

an office desk smoking a cigarette. When students came to Britain they found to their surprise that most Englishmen actually worked hard. African audiences needed films of everyday life in Britain and other countries, films of the fisherman, the miner.

A student from Uganda said that false views could also be adopted by Europeans, many of whom believed Africans to be savagely primitive, living in hopelessly backward and wild conditions. The vital need in Colonial film-making was co-operation; Africans could be trained to help Europeans and could advise on native and Native customs.

Africans as Script-Writers

MR. M. SELLARS of the Colonial Film Unit, said there was every intention of training Africans to play their part in this new field of local development. They hoped ultimately to use Africans as script-writers and technicians and to seek their advice about local customs, superstitions and so on.

At the close of the conference, the Chairman, MR. AIDAN M. CRAWFORD, M.P., said that the Government would be urged to do its utmost to encourage the use of the cinema in Colonial development and to sponsor research into the many problems involved; the approach must not be narrow or insular, or inhibited by lack of funds.

Among those present were Mr. P. C. Gordon Walker, M.A., Parliamentary Under-Secretary for Commonwealth Relations and Chairman of the British Film Institute; Mr. W. Elmsdell, from the Office of the High Commissioner for Southern Rhodesia; Mr. B. C. Pumphrey, Welfare Officer of the Sudan Government Agency in London; Mr. Roger Norton, East African Commissioner in London; Dr. James Welsh, of the Overseas Food Corporation; and representatives from the Foreign Office and the Belgian and Portuguese Embassies.

Uganda Electricity Board

THE UGANDA ELECTRICITY BOARD, appointed on January 15, consists of Mr. G. R. Westlake (Chairman), the Financial Secretary, the Director of Public Works, and three non-official members, Mr. J. R. Fraser, M.I.C., Mr. A. N. Maini, M.I.C., and Mr. C. Handley Bird. This statutory board is empowered to acquire and operate existing electric undertakings in Uganda and to generate and supply electricity in and outside the Protectorate.

N. Rhodesian Forestry

FOREST RESERVES in Northern Rhodesia cover only 1,418 square miles, or 0.6% of the total land surface, according to the latest annual report of the Forestry Department. During the year under review 663 square miles, mainly between Ndola and the copper mines, were gazetted. The mining companies felled 957,500 cubic feet of timber under licence, for fuel. On the Copperbelt itself, however, the supply of timber is estimated to be sufficient for only 12 to 18 years at the present rate of consumption. The problem of securing adequate regeneration in the teak forests has not yet been solved.

SOUTHERN RHODESIA

CECIL RHODES LOOKS OUT OVER THE LAND WHICH IS PROUD TO BEAR HIS NAME AND WHERE HIS HOPES ARE BEING REALIZED.

Issued by the High Commissioner for Southern Rhodesia,
Rhodesia House,
429, Strand,
London, W.C.2

"Higher Wages for Africans Revolutionary Recommendations"

THE NATIONAL NATIVE LABOUR BOARD OF Southern Rhodesia recently published its report on service conditions of Native employees of Rhodesia Railways, and most of the recommendations have been accepted by the Government and embodied in new regulations.

From January 1, wages will range from 35s. a month for unskilled Native labourers to £1 17s. 6d. for senior Native employees. There are provisions for higher overtime rates; more leave; a pensions plan; housing and medical treatment. About 9,800 Natives employed by the railways in Southern Rhodesia will benefit. Although cost-of-living allowances are included in the new wages, the cost of improved rations has not yet been taken into account, in view of difficulty in obtaining such foods as fresh vegetables, fruit, sugar, tea and coffee.

"The Board," states the report, "recognizes the far-reaching consequences of some of its recommendations. There is no doubt that the conditions of Native employees have to be improved and that the fundamental principle underlying all reform is that the Natives be regarded as human beings with human needs and not merely units in a labour force. The improvements recommended are of some magnitude, possibly revolutionary, but they are in the view of the Board, fully justified."

Mbosi Planters' Association

MBOSI PLANTERS' ASSOCIATION, holding their first post-war meeting at the Cocco Experimental Station, Mbosi, Tanganyika, recently elected the following officers: Chairman, Mr. E. A. Clowes; honorary secretary, Mr. D. M. Stevens; other members of the committee, Messrs. S. M. Bellamy, M. H. G. Newton, and J. Cain.

Sisal Growers' Committee

New Body Formed in London

A NEW BODY to be known as The Sisal Growers' Committee has just been formed in London among East African sisal growers. Those who have already joined represent some 40 per cent of annual production, and other growers are expected to join shortly.

Mr. N. C. S. Bosanquet has been elected Chairman, and other members of the Executive Committee are Colonel Smith Gordon, Mr. E. Robert Orme, Mr. J. E. M. Scholvinck and Mr. Alfred Wiggleworth. Mr. F. C. Rycroft has been appointed secretary, and the offices at 1 Great Windmill Street, London, E.C.2.

The estates and companies represented at the first meeting were Ambony Estates, Arusha Plantations, Central Sisal Estates, Consolidated Sisal Estates of East Africa, Dya Plantations, East African Sisal Estates, Embu, Esigwe, Kikwetwa Sisal Estate, Kilifi Estates, Mazinde Estate, Matinyumbi, Mombazi Estate, Ruto Estate, Rudewa Estates and Tropingo Estate.

Civil Service Re-Organization

RE-ORGANISATION OF GOVERNMENT DEPARTMENTS in Southern Rhodesia is recommended by the Civil Service Survey Committee. Much bemoans that too much responsibility is placed on heads of departments who are thus prevented from moving about. The Native Affairs Department in particular suffers from this drawback, and the appointment of an under-secretary is proposed.

Other changes suggested include greater powers for the provincial Native commissioners and upgrading the post of Director of Native Education. Provincial commissioners should, says the report, be responsible for improving race relationships, for the encouragement of district councils, and the like; of training provincial Native councils as soon as possible; the attendance at Native councils and personal contact with chiefs; and for visiting stations and sub-stations not less than three times a year.

Commenting on the additional cost of duplicated services for Europeans and Africans, the report suggests that educational, agricultural, public works and engineering services might well be merged in order to reduce such expense and increase efficiency.

Tobacco and Lord Trefgarne and his Directorship

UNDER THE HEADING "The Developer-General," the Financial Times wrote on Monday:

"In the House of Commons last week it was announced that Lord Trefgarne's salary as Chairman of the Colonial Development Corporation will be £3,000 a year. Lord Trefgarne has had a varied political career. As Mr. Garro-Jones he was originally elected Parliament as a Liberal, but he was converted to Socialism in 1935. In 1945 Mr. Garro-Jones retired from politics and declared himself henceforth a business man. It was then that he accepted an offer made by Sir Hugo Cunliffe-Owen to join the board of Tobacco Securities Trust Ltd. Not long afterwards Mr. Garro-Jones was ennobled on Mr. Attlee's recommendation."

"One would have thought that the chairmanship of the Colonial Development Corporation would have provided sufficient scope for Lord Trefgarne's energies. The functions of that Board have been described in lyrical terms by Socialist spokesman as one of the most important developments of the age. Up to the present Lord Trefgarne remains a director of Tobacco Securities Trust. This situation is a novel one in political life. For Tobacco Securities Trust is directly controlled by the British American Tobacco Company. Between them these companies have considerable holdings in business, operating in African Colonial territories. Surely therefore it is highly undesirable that a director of Tobacco Securities should also be the Colonial development general. If this fact is not yet clear to Lord Trefgarne, no doubt it is becoming so to the Chairman of Tobacco Securities Trust and to Mr. Attlee."

BARCLAYS OVERSEAS DEVELOPMENT CORPORATION LIMITED

(Incorporated in the United Kingdom with Limited Liability)

A subsidiary Company formed by Barclays Bank (Dominion, Colonial and Overseas) primarily for the purpose of assisting in the economic development of certain Colonies and territories overseas in which the Bank is established. The function of the Corporation is to provide finance of a medium or long term character, such as is not normally obtainable from a commercial bank, for well-grounded schemes of agricultural and industrial development.

Enquiries and Applications for Finance should be made through local Branch Managers of Barclays' Bank (Dominion, Colonial and Overseas) as Agents for the Corporation.

Parliament**Future of the Port of Beira Cannot Handle Coal Exports.**

CONGESTION AT THE PORT OF BEIRA was the subject of Parliamentary questions last week.

SQUADRON-LEADER KINGHORN asked the Secretary of State for Commonwealth Relations what decisions were taken during recent discussions between the Governments of the United Kingdom and Southern Rhodesia.

MR. GORDON WALKER, Under-Secretary of State for Commonwealth Relations, replied:

"Following discussions with the representatives of Southern Rhodesia arrangements have been made for certain officials from this country to visit Beira at an early date to advise in conjunction with the Portuguese authorities, on any immediate steps possible to relieve congestion at the port. The future position of Beira port and railway generally has also been under consideration, and a delegation from Southern Rhodesia, accompanied by certain officials from this country and representatives of Beira Works, Ltd., have recently visited Lisbon for a discussion with the Portuguese Government. These discussions are being continued through the diplomatic channels."

Berthing Facilities

SQUADRON-LEADER KINGHORN asked whether discussions could be expected to provide better berthing facilities and increased wharfage in 1948.

MR. GORDON WALKER: "It is difficult to promise whether there will be more wharfage—actual quay space—partly because it is under the control of the Portuguese Government, and partly because of shortage of supply. We are confident that the flow of ships and the arrangements for queuing them up will be improved in 1948."

MR. WILSON HARRIS asked if it was expected that the railway and port would be capable of handling coal exports from Wankie.

MR. GORDON WALKER: "Now I think it would not be possible to hold out such hope. It would be difficult to handle coal from Wankie in any substantial quantities through Beira, because Beira is already jammed up. If Wankie coal is to come out on any large scale some alternative outlet will have to be found from Southern Rhodesia."

MR. SCOLIAN: "Have the Rhodesian Government ever considered the possibility of getting the coal brought through to Vilanculos Bay?"

MR. GORDON WALKER: "It is not for me to answer for the Southern Rhodesian Government, but in the discussions they have had with us this has been one of the chief possibilities discussed."

MR. RAY CLEARY: "Has any new scheme been arranged for the extension of the port facilities at Beira?"

MR. GORDON WALKER: "There was a joint technical inquiry by Portuguese and British engineers and they made a joint and common report about the money and the materials which must be used in two stages to improve Beira. The Portuguese Government have in general accepted this report, but the question of making supplies available is, of course, very difficult in this world of shortages."

MR. SORENSEN asked the Secretary of State for the Colonies why returns for corporal punishment of civilian prisoners in East and West African prisons between 1941 and 1945 showed an increase in Kenya and the Gold Coast and a small decrease in Uganda and Nigeria, despite the activities of the Treatment of Offenders Sub-Committee; for what offences this punishment was usually inflicted in those Colonies; and the average number of strokes inflicted and the highest number respectively.

MR. REES-WILLIAMS: "The reply is long and I am circulating the information in the Official Report. Much consideration has been and is being given to this matter, and some substantial improvements have been made as a result of the dispatch to Colonial Governors in October, 1946. My rt. hon. friend will pursue his efforts."

Medieval Punishment

MR. SORENSEN: "Does not the variation indicate that much more to be done in order to reduce the number of punishments of this medieval character?"

MR. REES-WILLIAMS: "My rt. hon. friend is giving this matter his personal attention."

The extract from the Official Report reads:

"The situation must be judged in relation to the increase in the number of persons in prison and the absence of regular prison staff on war service. The percentage of corporal punishment to male prison population in the territories concerned was: Northern Rhodesia, 1941, 2.9%; 1942, 3.4%; 1943, 1944, 3.5%; 1945, 1.7%. Kenya, 1941, 0.023%; 1942, 0.0119%; 1943, 0.023%; 1944, 0.07%; 1945, 0.036%. Uganda, 1941, 0.37%; 1942, 0.35%; 1943, 0.27%; 1944, 0.12%; 1945, 0.28%. Nigeria, 1941, 0.37%; 1942, 0.28%; 1943, 0.36%; 1944, 0.35%; 1945, 0.32%; Gold Coast, 1941, 0.052%; 1942, 0.24%; 1943, 0.09%; 1944, 0.53%; 1945, 0.15%."

"In 1945 the offences punished in this way were: assaulting a warder, file and using threatening language, refusing to obey a lawful order, and repeated serious offences against prison discipline."

"The total prison offences in the five territories range from 4,271 in 1941 to 5,84 in 1945. The average number of strokes was 60 in all with the cane. The highest number of strokes was 24 (once in Uganda and twice in the Gold Coast). The next highest was 12."

"In October, 1946, on the advice of the Treatment of Offenders Sub-Committee, I addressed a dispatch to Colonial Governors urging them to reduce further the use of corporal punishment in their territories with a view to its eventual abolition."

Racial Discrimination in Hospital Training

MR. SORENSEN asked what training hospitals refused to train Colonial medical students and nurses, and when this discrimination on the ground of colour or origin would be abolished.

MR. REES-WILLIAMS: "I am not aware that any training hospitals refuse to admit colored medical students and nurses on the ground of color or racial origin."

MR. WALTER SMITH asked the President of the Board of Trade how many tons of coal the property of his department, now stored in Tanganyika for more than six months, and tonnage lost through rotting.

MR. HAROLD WILSON: "On the latest information I have received there are about three months stocks held in transit on the Tanganyika Central Line, on which there has been some congestion. The situation, however, is rapidly improving. I have no information to support the suggestion that many tons have been already lost by rotting, and no reports of this have been received."

Promotion of African Civil Servants Position in Northern Rhodesia

PROMOTION BY MERIT was recently discussed in the Northern Rhodesian Legislative Council.

MR. WATMORE, Acting Secretary for Native Affairs, described the recommendations of the Civil Service Commission on African conditions of service as a marked improvement. Promotion would no longer be automatic, but by merit, and those who qualified by industry and talent would be able to reach much higher salaries.

Sir STEWART GORE BROWNE said that Africans wanted to be quite satisfied promotion by merit would become a fact. Only five African civil servants had so far reached the existing special grade, and many people felt that the starting points given for marginalised Africans, were too low. It was pleasing, however, to see that boma messengers would be better treated, and only right that porters should be given higher pay than warders.

Higher Output for Higher Pay

MR. G. B. BUCKETT emphasized the need for increases of pay to be followed by higher output and improved efficiency. Whilst he agreed with promotion by merit, the efficiency bars must be realistic and effective in obtaining better results.

MR. B. GOMBO said that the principle of equal pay for equal work was one for which Northern Rhodesia trade unions would fight. He believed it was the policy of Government to supplant highly paid, poor by cheap grades of labour. This would tend to drive the European workers out of the territory, and trade unions would oppose the policy with all their power.

MR. R. AVELENSKY asserted that if the African was the equal of the European, and if his production and quality were the same as the European's, then he must get the same rate of pay. To pay him less merely because his skin was black would mean

the end of European civilization in the country, which would be a bad thing for the African. At this stage the African was not the equal of the European, or the Native would have to be faced.

MR. R. S. HUNTER, Acting Chief Secretary, said that efficiency bars would be realistic, and before promotion was approved merit would be tested not only by examination but by work and character. The African would have to demonstrate real application, loyalty, and reliability before he could reach the highest grades. Women, he said, would be considered by the board which was to be set up to discuss the report in detail.

Winding up, MR. WATMORE pointed out that it was wrong to assume that an African civil servant could not reach the highest salaries unless he was highly educated. Really exceptional merit would count, as well as the appropriate qualification.

New Colonial Office Post

AN ECONOMIC INTELLIGENCE AND PLANNING DEPARTMENT has been created in the Economic Division of the Colonial Office to assist in the drive to encourage increased production and a saving of warlike expenditure in the Colonial Empire. An additional post of Assistant Under-Secretary of State in the Economic Division has also been created; and MR. W. G. G. Barnes, at present personal assistant to the Prime Minister, has been appointed on loan from Treasury to fill this post for a year. He will take up his duties on February 1.

Building Controlled

REGULATIONS to control building in Northern Rhodesia come into force on February 1. From that date a permit must be obtained for the erection of any building costing more than £10. Local authorities are required to publish a monthly return of buildings begun and completed, and the building authority will publish a monthly list of all permits issued.

VIROL
its value and use

VIROL is a concentrated food prepared from Malt Extract, specially refined Animal Fats, Eggs, Sugars (including Glucose) and Orange Juice, with added Mineral Salts, Vitamins etc.

VIROL is designed to provide, in carefully balanced proportions, those essential food factors (not Vitamins alone, but also many others just as important), which are most likely to be deficient in the rest of the diet.

VIROL is very palatable, easily and completely assimilated, and throws no strain upon the digestive system. In infancy and childhood, in illness and convalescence—in fact, in all conditions where supplementary food is required—its growth-stimulating and restorative properties are proved value.

VIROL — THE FOOD FOR GROWTH

Letters to the Editor

Problems of African Labour**Training for New Responsibilities**

To the Editor of EAST AFRICA AND RHODESIA

SIR.—Few will dissent from your strong commendation of Mr. H. Alan Walker's admirable method. Unfortunately their application in the East African territories presents greater difficulties than your editorial comments seem to suggest.

For example, we are tied to the "tied house" system by Government's insistence on our building permanent houses for our labourers. That insistence, right in existing circumstances, is one which makes the application of the rest of Mr. Walker's methods more difficult for us. That is our labourers' lack of sophistication. Mr. Walker refers to "the old days" when his labourers were known by their Christian names. We have not got nearly as far as that. Very few of ours have Christian names.

Our difficulties are greater than Mr. Walker's—they do not dismay us, and we too are endeavouring to associate the African more closely with European enterprise. Bovill, Matheson & Co., Ltd., for example, have been paying for the education of Africans at Makerere College with the object of employing them in replacement of senior Europeans. The results so far have been inconspicuous.

I was recently asked whether I should approve of an African ultimately occupying the post of branch manager. My reply was that I greatly looked forward to the day when we had an African director. That day may be distant, but it will come.

Travellers' Club,
London, S.W.1.Yours faithfully,
E. W. BOVILL

Production of Groundnuts**Mechanization of Peasant Production**

To the Editor of EAST AFRICA AND RHODESIA

SIR.—Some time ago you reported an address which Mr. Frank Samuels gave to the Royal African and Royal Empire Societies about the vast new scheme for the production of groundnuts in the East African territories by the United Africa Company as agents of H.M. Government. I hoped that this address would have produced a leading article and encouraged experts to express their views of this scheme in your columns, but as none has so far appeared I venture to do the matter myself as a former district officer in the territories.

The ambitious scheme in question may or may not result in a very large increase in the production of groundnuts in 10 years' time. It may or may not prove excellent for East African traders and for local Native employment, but it surely does nothing to meet the urgent immediate requirements for an increase in oils and fats.

The way to meet the immediate and urgent need for more oils and fats is, I suggest, to encourage and expand the present-day growth of groundnuts by the local Natives in every village and hamlet in East and West Africa. It is not essential that the district and agricultural officers and the local chiefs and Native councils in all areas should arrange for the immediate expansion of the cultivation of this crop by the peasants?

It is strange that essential administrative action on these lines was not undertaken as soon as war broke out and the need for increased supplies of oils and fats became obvious; and it is still more strange that such action has not been taken at any time since then as the need became more and more pressing. Has this action in fact been taken, and if so, with what results?

Yours faithfully,

London, S.W.7.

[Our correspondent must have overlooked our editorial comments on the groundnut scheme. It had been hoped to put 150,000 acres under the crop in Tanganyika this season, but the dislocation of transport services in this country during the winter led to a delay of two months in the shipment of essential machinery. With the consequence, we understand, that not more than about 100,000 acres have been planted this season.]

The African is being urged to grow many other crops, either for himself or on European estates, in order to relieve other shortages, and there are increasing demands for his labour for new mines and industries and in connexion with the territorial development schemes. It does not therefore appear likely that peasant production could substantially augment the output of groundnuts. It has been the policy of all the Eastern African Governments to stimulate Native production, but priorities have naturally been established from time to time in accordance with current needs. Ed., E.A. & R.I.

Tobacco Federation

CREATION of a Central African Tobacco Federation, embracing Southern and Northern Rhodesia and Nyasaland, is to be considered shortly at a conference in Salisbury. The Rhodesian Tobacco Association has declared that the Tobacco Federation of the British Empire is redundant and should be replaced, since the only point of contact which Rhodesia has with Canada, India and other tobacco countries is in the matter of Imperial preference. On all other matters affecting tobacco Rhodesia is a competitor with those countries.

GENERAL SIR GEORGE GIFFARD, Colonel Commandant of the King's African Rifles, with which regiment he served in the 1914-18 war, has just been described by Sir James Grigg, Secretary of State for War from 1945 to 1945, as one of our military leaders most worthy of praise, and as "agents in the translation of defeat into triumph." The other five names mentioned are those of FIELD-MARSHAL LORD ALANBROOK, LORD MONTGOMERY, LORD ALEXANDER and SIR JOHN DALY, and GENERAL SIR BERNARD LUGET.

PUBLIC APPOINTMENTS

GOVERNMENT OF SOUTHERN RHODESIA DEPT. OF COMMERCE AND INDUSTRY

APPLICATIONS are invited for the post of ECONOMIST, vacant in the Department of Commerce and Industry. The salary offered is £1200 per annum, and there is at present a £100 cost of living bonus payable on this salary. The appointment will be in terms of the Southern Rhodesian Public Services Act, 1936 (chap. 68, as amended), on probation for two years; thereafter the successful applicant will be eligible for appointment to the fixed establishment and service will be pensionable.

Candidates for this post should possess research and administrative qualities of a high order and must have had some years' experience in the field of economics, especially on the side of planning. A first or second class honours degree in economics is essential, and preference will be given to persons possessing post-graduate qualifications in research.

Further information and application forms may be obtained from the Secretary, Office of the High Commissioner for Southern Rhodesia, 49, Strand, London, W.C. 2, and must be returned completed not later than March 15, 1948.

GOVERNMENT OF SOUTHERN RHODESIA DEPT. OF GEOLOGICAL SURVEY

APPLICATIONS are invited for the above mentioned post. The qualification required is an Honours degree of a recognized university. Knowledge and experience of topographical surveying and/or geological methods of prospecting are also required.

The successful applicant will be required to pass a medical examination conducted by a Government medical officer.

The salary scale is £1200 £27.10s. £60 x £72 to £737 £33 to £95 per annum. A 10% cost of living bonus, a marriage allowance of £50 per annum on salaries between £330 and £660, and children's allowances £24, first child, £18, any subsequent children, also payable. Initial salary may be higher than the minimum stated depending on qualifications and previous experience.

The appointment will be in terms of the Public Services Act on probation for two years, thereafter the successful applicant will be eligible for appointment to the fixed establishment and service will be pensionable.

Further information and application forms may be obtained from the Secretary, Office of the High Commissioner for Southern Rhodesia, 49, Strand, W.C. 2, and must be returned completed not later than March 15, 1948.

CROWN AGENTS FOR THE COMMONWEALTH INCOME TAX DEPT. OF EAST AFRICA

APPLICATIONS from qualified candidates are invited for the following posts:

ASSESSOR OF INCOME TAX required for the Joint Income Tax Department of East Africa. The person appointed will be required to serve in Dar es Salaam, or Lusaka, Tanganyika Territory, or Nairobi, or Mombasa, Kenya, or Kampala, Uganda. Candidates under 45 years of age should be chartered or incorporated accountants or possess similar qualifications or should have had substantial experience in income tax work and practice. The salary according to age and qualifications in question is £720 a year. In addition there is a cost of living bonus, the amount of which depends on family size, and gratuity is payable. Overseas leave and other privileges are in accordance with Government regulations.

Successful candidates will be considered for appointment to the permanent and pensionable establishment of the department, subject to a probationary period of two to three years. There will be opportunities for promotion in future years to the higher posts of the department carrying salaries up to £1,100 a year or more.

Apply, at once, by letter, stating age, whether married or single, and full particulars of qualifications, to the Secretary, Crown Agents for the Colonies, Millbank, London, S.W. 1, quoting M. 14416 (3C) on bold type envelope.

Obituary

Mr. Charles Eickhoff

MRS. CHARLES EICKHOFF, M.P., O.B.E., who was a member of the first Southern Rhodesian Parliament, died recently in Umtali, aged 78. Born in London, and educated at the Haberdashers' School, he went to Rhodesia in 1896. He joined the Chartered Company's service in the following year and remained with them until 1912 when he assumed control of the Rhodesia Advertiser (now the Umtali Advertiser). He was one of the founders of Umtali Municipality, serving as mayor from 1917 to 1919. Through his newspaper he persistently advocated responsible government, and in 1924 was elected as semi-member for Umtali, subsequently becoming Deputy Speaker and Chairman of Committees. He was a Matriculation Trustee for several years, a member of the local hospital committee, chairman of the Umtali Adult Education Centre, and a keen worker for the National War Fund from 1914 onwards. His greatest interest was probably education, and his public services were recognised by the award of the O.B.E. A keen sportsman, he was president of the Manicaland Cricket Association.

Mrs. FRANCIS STEELE MOLLER, M.C., D.F.C., died in Victoria, Mahe, Seychelles, last Saturday at his 57th birthday. In the 1914-18 war he served in the R.F.C. and R.A.F. He is survived by Mrs. Moller.

MR. HENDRIK JACOBUS RENDEN, the youngest son of the discoverer of Zimbabwe, died recently in Bulawayo, aged 78. He arrived in Salisbury with the 1890 Pioneer Column and in 1893-4 he was a dispatch rider of the Victoria Column. He also served during the South African War.

Mrs. JULY AUBREY DOBRECKE died recently in Worthing, Sussex, after a long illness. Her husband, Mr. Claude Hatherley Dobrecke, B.E., was in the Northern Rhodesian Civil Service from 1911 to 1933. In 1921 he was appointed Treasurer, and as Chief Secretary in 1927-28 and was Acting Governor in 1930. The Rev. BIDENWA HLABANGANA, an African missionary, died recently in Bulawayo. Born in Lobengula's kraal, he was a member of one of the king's regiments. After receiving education at the London Missionary Society's station at Hope Fountain, he was ordained in 1919, and worked for the society in the Mizingwane district.

BRIGADIER-GENERAL ERIC HENRY VERNON CROWE, C.B., D.L., who served in the East African campaign in the first World War, died recently in Beckenham-on-Sea at the age of 85. He served in the Intelligence Section of the War Office during the South African War, and at the end of 1915 was sent to command the Royal Artillery in East Africa. He wrote "General Smuts's Campaign in East Africa."

We regret to report the death in Que Que of Mr. ARTHUR HAROLD ACKERMAN. Educated in England and at the University of California, he worked as a mining engineer in the Rocky Mountains before going to the colonies. In 1905 Dr. Jamieson had him appointed consulting engineer to the Chartered Company. He began farming in the Que Que district in 1913, and was for many years a man of the local farmers' association.

MR. JOHN WOLSTENHOLME DEKKER, a member of the Colonial Service, died last week in Marldon, Devonshire, aged 51. On leaving Cambridge he became in 1911 an assistant district commissioner in the British East Africa Protectorate, and was promoted to district commissioner in 1926. After returning in 1932 he became archivist of the Society for the Propagation of the Gospel. During the recent war he joined the historical branch of the Air Ministry.

PERSONALIA

SIR FRANK and LADY NEWNES are visiting Southern Rhodesia.

SIR JOHN GRAY, Chief Justice of Zanzibar, recently visited Uganda.

MRS. E. J. HILL has retired from the board of United Tobacco Companies (South), Ltd.

Mrs. P. S. CHILDE has resigned the chairmanship of the Southern Rhodesian Liberal Party.

MRS. CHARLES VILLETT has left London by air to revisit East Africa and the Rhodesias.

Mrs. A. E. ADAMS, ex-consul for Bechuanaland, and Mrs. Adams have recently visited Kenya.

Mrs. JUDY VINCENT FEENEY and Miss MAVIS M. WENTWORTH were married last week in Nairobi.

SIR ENOCH JEFFREYS, Chief Justice of Nyasaland, and LADY JEFFREYS are on their way back to Nyasaland by air.

LORD HEMINGFORD, formerly the Hon. D. G. R. Herbert, headmaster of King's College, Buganda, Uganda, has left East Africa for England.

Mrs. A. J. HUXTABLE, Commissioner of Native Labour in Southern Rhodesia, recently visited Beira for discussions with the Governor of the Province.

Mrs. and Mrs. C. H. BIRD are expected on leave from Uganda by the EARLSTEPHAN CASTLE, which is due to sail from Mombasa in mid-February.

MRS. P. E. W. WILLIAMS will shortly become Social Welfare Advisor to the Government of Kenya, but will also remain Director of Training in the Colony.

MRS. LYNN DUNLOP COWLIFFE, Salisbury architect, has prepared a plan for a Rhodesian University in Gwelo. No decision has yet been made as to the project.

MRS. RICHARD MONETON, who served in Mombasa for several years during the war, has started a Little Theatre group in Mombasa, where she was in civil employ.

The REV. R. ASHLEY LONGBOOTH, formerly ecclesiastical chaplain of the Children Overseas Reception Board from South Africa, has been appointed Rectory Chaplain, Southern Rhodesia.

THE DUKE OF DEVONSHIRE, a former Under-Secretary of State for Colonies, is to be installed March 23 as Grand Master of the United Grand Lodge of English Freemasons.

Mrs. C. H. TUNISON, director of a famous golf course architect, is visiting Southern Rhodesia. He has constructed one of the unknown courses in America and South Africa.

MR. J. WARD, assistant secretary at Rhodesia House, London, has returned from Hawaii, where he was one of the representatives of Southern Rhodesia at the International Trade Conference.

Mrs. SPENCER SWANSON, formerly a squadron leader in the R.A.F., has assumed charge of Northern Rhodesia's broadcasting station for Africans. She began broadcasting in Canada in 1928.

MRS. BERNARD KESTEIN, a director of the Sudan Plantations Syndicate, Ltd., the Kassala Cotton Co. Ltd. and Sudan Salt, Ltd., has left by air for Jamaica; she will return to the United States.

MR. W. S. ROSE has resigned from the board of Messrs. Goods, Durant and Murray, Ltd., in account of ill-health. Mr. D. M. Jackson has been appointed a director and will continue as secretary.

Two nominees for Rhodesian Rhodes scholarships are MR. B. V. EWING, a fourth-year engineering student at Witwatersrand University, who received his education at St. Andrew's College, Grahamstown, and MR. C. MONDY, who was educated at Prince Edward School, Salisbury, served in the R.A.F. during the war and is now studying for B.A. and diploma in education at Rhodes University College.

SIR WILLIAM BARTLETT, Governor of Tanganyika, recently paid a three-day visit to observe the new ports for the groundnut scheme and to groundnut areas in the Southern Province. He was accompanied by the Chief Secretary.

Mr. ARISTIDE GIBA left England by air on Friday for Kenya, Uganda, Tanganyika and Southern Rhodesia, all of which territories his firm are engaged in important development works. He expects to be back in London about the end of March.

THE REV. CHARLES A. BENDLE, of the Church Missionary Society, stationed at Mpoga, in the Belgian Congo, and Miss BERYA CONSTANCE HAYWARD, daughter of Rev. W. E. Hayward, have been married in Namirema Cathedral, Uganda.

MR. H. A. MARQUAND, the Postmaster-General and his party reached Nairobi last Sunday from the Sudan. They are expected to spend about a week in Kenya. On Monday they met Sir ALFRED VINCENT and other non-official members of the Legislative Council.

Mrs. C. E. MORTIMER, Member for Nairobi in Kenya, has appealed for 500 blood donors for a proposed blood bank in Nairobi. Only European donors are wanted at present, but if the Asians wish a scheme will be organized for them. Most Africans are superstitious about giving blood.

Sir GILBERT RENNIE BENNIE, bedridden by their four-year-old daughter, was yesterday in the Cape on their way to Government House, Nairobi, Rhodesia. Their two sons will remain at school in England. Reference to Sir Gilbert Rennie's appointment is made under Makers of Moembe.

The office has published the dispatch written by Sir CECIL MASSITH, Sir ROBERT BROOKES POPEMAN on his command of British land and air forces in Malaya, Burma and Hongkong up to the time of the Japanese invasion in December 1941. Sir Robert was at one time Governor of Kenya.

Sir JOHN HOUD-ORR, who some years ago investigated nutrition problems in Kenya, has returned to this country from the United States on his retirement from the office of Director General of the United Nations Food and Agricultural Organization. He reported that 17,000-year appointment, only on a temporary basis.

MR. D. LEOPOLD, who has taken up duty as H.M. Trade Commissioner in Southern and Northern Rhodesia and Nyasaland, following the recent death of Mr. A. W. Hall, has been in the British Trade Commission Service since 1934. He has spent 10 years in East Africa and three in Canada, where as Trade Commissioner in 1939.

Sir WALTER HARRAGAN, who is retiring from the post of Chief Justice of the Gold Coast, and has just been appointed Judge of the High Courts of Bechuanaland, Basutoland, and Swaziland, was formerly Attorney-General in Kenya and acted as Governor on several occasions for considerable periods. He had previously been Attorney-General and an acting judge in Nigeria.

MRS. LOUIS BIELINKY, of the staff of the Treasury, who is a compass-sail, Mandrill, Paymaster General's private secretary, on his present visit to East, Central and South Africa, was commissioned during the war in the Royal Irish Fusiliers, and was wounded and awarded the Military Cross while serving in Italy with the 15th Army. He was a scholar of Balliol College, Oxford.

COMMANDER ATILLA GATTI, who has made a number of visits to East and Central Africa with luxury yachts, is now on the way from the Cape to the Ruwenzori Range in Uganda at the head of an American expedition, likely to cost £10,000, according to his statement to reporters in South Africa. There are seven yachts, each with air-conditioned trailers. The dual objective are filming field experiments in short-wave radio communication.

THE NEWS

E.A.R.-marked—"Germany's
the weakest spot of the whole
Mediterranean Recovery Plan,"
Manchester Guardian.

"About 250,000 tons of waste
paper are being thrown away yearly
in this country," Mr. Sidney E.
Garland.

"Mine and steel workers in
Germany earn twice as much as
higher civil servants," Dr. Edgar
Steel-Ruston.

"Great Britain is still losing gold
at the rate of £1,000,000 a
week," Mr. Douglas Day, Economic
Secretary to the Treasury.

"We have suffered from a serious
outfit of appeasement," said
Sir Eric Smith, Chairman of the
National Provincial Bank.

"My sound greatest complaint
against the militarists' cruelty is
of course the first—is that they are
such cracking shot," said
Wansittar.

"The United States cannot long
survive as a mere citadel of self-
indulging privilege surrounded by
massed human misery," Mr. John
Lester Dillies, Republican Senator.

"My legs are the longest on the
Front Bench; but I cannot run my
foot on the Track-table line
men," Dr. Elliot Sumner-Davies,
Schoolmastering since the C.S.I.
and Bombay paedagogos have
been a piper profession—except in
land and India," Comptroller C.B.
Fry.

"It is reasonably probable that
there will not be an atomic war
yet," General Adm. McNaughton,
member of the U.S. Atomic
Energy Commission.

"For every Royal Commission
which was the forerunner of all
social reforms, there have been
engaged up time and money-wasting
tumults," *Evening Standard*.

"British war disabled have
only a £1 a week of living increase
on their pensions." Compare this
with the huge increases granted to
miners and other workers. Mr.
Cecil Lewis.

"Hollywood believes they can
cheat us of modifying but
not hide in the film due to con-
tinuing the embargo they are back
to a loss," Mr. Stanley Wilson
(M.P.) President of the Board of
Trade.

"The British Army through its
efforts has made our task in
Palestine impossible. The way in
which murders and rapes have been
committed time and again, while the
Jewish Agency has been powerless
or unwilling to cooperate with the
Mandatory Powers in suppressing
them, is a disgraceful episode in the
history of Zionism—the Hutchinson
biston of York."

"With the commission, at a
moment of world distress, of the
QUEEN'S BRAHMIN: VALENTINE ROD-
NEY, Nelson and Brown, the
country is left with only five capital
ships; compared with 70 early in
century. This state of affairs is
unique. Security is being sacrificed
in order that more money may be
available for more and bigger doles
to the individual," Sir Archibald
Hurd.

"Take two lemons, a cor-
poration, ball, dozen coloquies.
Rub them well together until
they are thoroughly sour. Cut up
responsibility into as many pieces
as possible. Add a few onions,
resin, lack of co-operation,
lack of imagination, lack of control
in fact, almost every ingredient
except oil and ginger. Do not stir.
Leave ferment for many years and
serve lukewarm," —The Marquess of
Bute, speaking in the House of
Commons on the debate on the new
tariffs.

VAUXHALL

RANGE OF DELUXE SALOON

New Vauxhalls are now available
again in the immediate post-war models
and have many improvements and
refinements of detail. Below are three
models:

The 10 h.p. 14 cylinder Vauxhall is one of
the most economical light cars on the road.
It does 30 miles to the gallon (at 30 m.p.h.)
and has ample room for four adults.

The 12 h.p. 16 cylinder in the same body
style as the 10 h.p. very nearly as com-
pact in running costs. It does 30 miles
to the gallon.

The Vauxhall 14 h.p. is the car for the
motorist who wants real luxury motoring.
The lowest possible running costs. It does
28 miles to the gallon (at 30 m.p.h.).

Look for a copy of the latest
catalogue.

BRUCE LIMITED

P.O. BOX 551 — NAIROBI

Sold and serviced throughout East Africa
Motor Mart branches in Mombasa, Nairobi,
Eldoret, Kisumu, Kampala, Dar es Salaam, Zanzibar,
Tanga, Mbeya, Arusha.

BACKGROUND

value of the pound. Twenty years ago there were strong arguments in favour of the abandonment of the then parity of \$1.66 to the pound. To-day the position is entirely different. At home wholesale prices have risen since 1945—perhaps by 20%—but those of other countries have also risen. The increase in American wholesale prices is as much as 50%, although by way of contrast the increases in Australia, New Zealand and South Africa are less than 10%. But our imports are now reduced to essentials, and therefore would not be curtailed further by devaluation itself, while those to us following would rise in proportion. Nor is there conclusive evidence that devaluation would help us to export. It would free everyone import restrictions imposed by foreign countries short of exchange, and if our imports of food and raw materials cost us more in sterling, then home production costs, gains made in sterling, would certainly not be reduced by devaluation. Sterling can be regarded as a stable currency because devaluation would not solve our problems. In view of the need for new parity and the emergence of the world's new economic pattern takes shape. The development of the pattern should be continuously watched and assessed by the International Monetary Fund. That is the way in which to arrive at a agreement at new parities between the world's currencies if ever they are required.—Mr. Norman Crump, in the *Sunday Times*.

Minister's Intransigence. The Minister buried discussions with the dealers before the Act was put on the statute book, and now it is here he tells us that Parliament has spoken and cannot reopen matters which he knows full well have always been in dispute. He referred these matters to be discussed with his subordinates for 12 months, and then himself disposed of all of them in two sessions of two hours each. Frank consideration of amending legislation to the Act as it now stands was promised. Such consideration has not been forthcoming. It has been told that amending legislation may be considered after two years' trial of the present Act. In the confidence of the profession, in the Minister's pronouncements meantime sunk to zero. This has been largely due to the fact that the Minister has behaved as though the feelings of the rank-and-file practitioner were of no importance. The impasse is due to the Minister's intransigence.—Lord

Essential Values. England presided over by the genius for husbandry and for engineering. Of course, mining is a branch of agriculture. Miner and farmer are sons of the earth, one on in the other in it. The miner may not have sown those who raise the ricks we eat and those who raise the trees we burn are comrades in work. If we cannot dig up fire without wood, we cannot deal with food without fire. If only we could stop talking about money and talk about the value of our work, and not keenly about that value; what a different civilization there would be. I often wonder how we manage to live at all without tearing each other to pieces, seeing as we all are in the insane insanity of money values. There is really only one answer—that cash values agree with what people wish to live by. Mr. John Stewart Collis, in *Time and Tide*:

Export Prices. Vast sums have been paid out of taxation to keep down the prices of, rather food-stuffs. Thus manufacturing costs have been protected from the effect of increased prices for imports—which means, in fact, that we have been subsidizing consumers overseas, as well as at home. Should we adopt more aggressive policy for export prices? For products in world demand, like coal and steel, potential customers ought unquestionably to be asked to pay world prices, and emphasis on export duty should be laid on goods commanding the highest prices overseas. Difficulty arises when we turn to the rather less essential type of product, which constitutes a substantial part of British export trade. Here price is only one ingredient in the foreign exchange yield of our exports. It is equally important to increase the volume. It would advantage us less to have a small export volume at favourable prices than a large export trade at somewhat lower prices. To attempt to force goods upon overseas customers at prices they are reluctant to pay would, naturally, we could do that for just so long as it takes them to replace our goods with supplies from their own or other sources. British manufacturers can work only for a reduction in cost and rely on increased sales, rather than high prices, to produce the additional foreign exchange to bridge the overseas payments gap.

Old School Ties. Mr. Churchill must have good men around him to turn off the Government whom has his go. This old Harvard has looked elsewhere for his comrades. Here they are: Mr. Eden (Ston), Mr. Oliver Stanley (Eton), Mr. Harold Macmillan (Eton), Mr. Robert Hudson (Eton), Mr. Harry Crookshank (Eton), and Mr. Oliver Lyttelton (Eton). Along the younger men to keep the ring evenly balanced, there are Mr. Ralph Hesketh (Stone) and Ober Peake (Eton). When fresh blood is required for the caretaker Government there was Mr. Coutins Hogg (Eton), Mr. Peter Thorneycroft (Eton) and Mr. R. E. Manningham-Buller (Eton). And to keep them all in order here is the Chief Whip, Mr. James Stuart (Eton). The old school tie, like many other things, is bettered in moderation. The Socialist Party's answer is to run public schools itself. That is why at those S. Richard Acland (Rugby) and Balliol College, Oxford, for Gravesend. That is why it has now found Mr. Harold Nicolson (Oxford) and Bullioy in North Croydon. Nicolson wants to live down its "Cross-Bencher" in the *Sunday Express*.

End. The equivalent of \$600,000,000 of French currency is held in Switzerland alone, and Swiss banks hold on behalf of French nationals enormous investments in America, securities. There is no advantage for us to follow suit and devalue the pound in relation to the dollar. On the basis merely the purchasing power in terms of goods and services of the £1 note at £1 is about right. In view of our enormous requirements of dollar imports, to change the rate would only increase the dollar gap, which would not be made up by a small increase in exports resulting from devaluation. The only pound evaluation that would be effective would be to devalue pound and dollar simultaneously in terms of gold. A rise in the price of gold would make more dollars available to meet the world dollar shortage.—Major E. Paddington Behrens.

"Imports from hard currency areas in November amounted to £62,900,000, or £11,000,000 less than in October. Exports to hard currency areas during the month declined by £2,500,000 to £20,000,000." The Board of Trade.

Board of Colonial Development Corporation

First Details of Careers of Members

NEW APPOINTMENTS have now been made by the Secretary of State for the Colonies to the board of the Colonial Development Corporation, as briefly announced in our last issue.

LORD TREGARNE and SIR FRANK STOCKDALE, the Chairman and Deputy Chairman, are to be full-time members, with salaries of £5,000 and £3,000 respectively. Part-time members are to receive £500 a year each. Those so far nominated are MR. R. E. BROOKES, SIR CHARLES DARWIN, MR. H. M. GIBSON, MR. H. N. HUME, MR. J. ROSA, MR. E. C. TANSLEY and SIR MILES THOMAS.

Since the particulars issued by the Colonial Office were inadequate to indicate the background and experience of the holders of these important posts, EAST AFRICA AND RHODESIA has compiled the following biographical notes:

Chairman and Deputy Chairman

LORD TREGARNE, formerly Mr. George Morgan Garfitt, was born in 1894, educated at Caterham School, and during 1914-18 was served in the Denbighshire Yeomanry and the S.F.C. He was private secretary to Sir Hamar Greenwood while the latter was at the Home Office, the Department of Overseas Trade and Chief Secretary for Ireland. London editor of the Manchester "Daily Dispatch" from 1922 to 1924, he was Liberal M.P. for South Hackney for the next five years, during which he paid a visit to Nigeria as a member of a Parliamentary delegation.

He then joined the Labour Party, and sat in the House of Commons from 1935 to 1945, being Parliamentary Agent to the Ministry of Production for the last three years. He also was chairman of the Raw Materials Committee, the Radio Production Committee, the Location of Industry Committee and the Central Priority Committee during the war. On withdrawal from politics he was raised to the peerage in January, 1947.

He has been a director of Barclays Overseas Development Corporation since its incorporation; is a director of the Tobacco Securities Trust, Ltd., and is on the board of British Overseas Airways Corporation until next month. He is honorary chairman of the Television Advisory Committee.

In 1946 he paid a brief visit to East Africa, Rhodesia and South West Africa.

SIR FRANK STOCKDALE, D.C.M., was born in 1881, educated at Wisbech and Marlow, and at Cambridge, and entered the Colonial Service in 1903. He taught and lectured in agricultural science in the West Indies. He was appointed Government botanist in British Guiana in 1906, Director of Agriculture in Mauritius in 1912, and Director of Agriculture and Research in Co-operative Societies in Madras in 1916. After serving as Agricultural Adviser to the Colonial Office in 1918, he returned to the West Indies, and as controller of agriculture and welfare in 1925 he was appointed to the new post of Assistant Development Planning to the Colonial Office, and has been responsible for planning on the 10-year development programme of many Colonial Governments. He has travelled widely in the Colonial Empire.

A Director of the Bank of England

MR. ROBIN F. BROOKES, a director of the Bank of England, was born in 1908, educated at Eton and King's College, Cambridge, and after leaving the university went into the City, disbanding market. During the recent war he served at the War Office and in North Africa and Normandy (with S.H.A.E.F.), subsequently becoming a brigadier in the Army of the Rhine. On demobilization he joined the board of the Bank of England and a London Bank. He is deputy chairman of the British Comptroller Board.

MR. CHARLES GALTON DAWSON, K.B.E., M.A., F.C.I.E., F.R.S., Hon. LL.B., was born in 1886 and educated at Marlborough and Trinity College, Cambridge. A lecturer in Physics at Manchester University from 1910 to 1914, he served the Royal Flying Corps and R.A.F. during the first world war. He was a Professor of Natural Philosophy at Edinburgh University from 1923 to 1934, Master of Christ's College, Cambridge, for the next two years, and since 1936 has been Director of the National Physical Laboratory.

MR. HENRY MELVILLE GIBSON, J.P., was born in 1889, and started work as a police junior in the City of Chester Town Hall. Subsequently he served for several years in local government, and from 1929 to 1931 was Labour M.P. for Mosley. He was a member of the Ministry of Health committee on local government in 1934, and a member of the Council for the Development of Overseas Trade in 1930-31.

He is a director of the English and Scottish Joint Wholesalers Society, of the Manchester Ship Canal and of Marson, Ltd., and is regarded as one of the most ardent travelled activists in the Labour Movement.

MR. H. NICHOLAS HUME, C.B.E., M.A., was born in 1894, and was gazetted to the Royal Scots before the first world war, but resigned his commission in order to emigrate to Canada. Returning to England in 1914, he was recommissioned in the Hampshire Regiment, was twice mentioned in despatches and awarded the M.C.

He is chairman of the Charterhouse Investment Trust, Ltd., and of Metcalf & Co., Ltd., the publishers, and a director of Jensen and Nicholson, Ltd., and the Java Investment, Loan & Agency Company. During the recent war he was Director of Finance (Commodities) at the Ministry of Supply, and until 1946 chairman of the Commodity Companies' Supervisory Board. He received the C.B.E. in 1940.

At present he is visiting Australia and New Zealand on private business and will then go to Malaya on behalf of the Colonial Development Corporation.

MR. JOHN ROSA, C.B.E., was born in 1903 and worked from 1942 to 1946 in the Colonial Office, where he was engaged on the programme of supplies to the Colonies under Lease-Lend. Previously he had been the Treasury representative in Syria.

While a member of the economic department of the Colonial Office, he was appointed one of the three members of the West African groundnut mission to East Africa, and was a signatory of the report on which the Government decided to provide £25,500,000 for the project.

Marketing Director

He has also been appointed a member of the board of the West African Food Corporation, and is now in business in the City.

MR. E. C. TANSLEY, aged 45, was born in London, and started work in a City merchant's office. Later he became a partner in a produce import company, and in that capacity made several trips to Africa, becoming interested in the marketing of species.

During the recent war he was appointed marketing director of the Joint West African Produce Control Board, which was responsible for the entire imports of cocoa from West Africa. He is managing director of the Gold Coast Marketing Company and the Nigerian Produce Marketing Company.

MR. HENRY THOMAS, D.C.M., M.A., was born in 1897 and educated at Bromsgrove School. Joining the Armoured Corps as a private in the first world war, he served for a short time in German East Africa and then in Egypt, Mesopotamia and South Russia with the R.F.C.

On demobilization he became a reporter, and in 1924 joined Mr. W. R. Morfis (now Lord Nuffield) as adviser on sales promotion. He was made a director and general sales manager of Morris Motors in 1927, and managing director of Wolseley Motors in 1937. Until recently he was vice-chairman of the board of the Nuffield Organisation, was chairman of the larger Tank Production Group, and chairman of the British Tank Engine Division to the U.S.A. during the recent war. In 1948 became chairman of the Public Relations Council of the British motor industry.

He has just been appointed deputy chairman of British Overseas Airways Corporation, and is now visiting the Rhodesias as chairman of a committee appointed to advise the Government of the Colony on development projects and priorities.

Tanganyika Executive Council

MEMBERSHIP of the Executive Council of Tanganyika following the reorganization of the Government is as follows:—The Governor (President), MR. E. R. E. Sudage, Chief Secretary, MR. G. Mathew, Attorney General and Member for Law and Order; MR. S. A. Sleszyński, Financial Secretary and Member for Finance; MR. R. W. P. Miller, Member for Agriculture and Natural Resources; DR. J. T. Sneath, Director of Medical Services; MR. J. McDonald, Member for Land and Minerals; MR. J. Leechman, Member for Labour, Education and Social Welfare; MR. J. Cheyne, Secretary for African Affairs; CANON R. M. Gibbons, and Messrs. E. G. Wilson, M. Nazeran and J. H. G. Gant, non-official members.

Government should very seriously pay attention to the question of land tenancy and the availability of labour. It is frightening many people in certain parts of Central Africa, and I have had some reports such as that on Nyasaland, showing that there may be some doubt whether people already settled there have the right to go on developing their land. Hundreds of thousands of European stock settled out there for many years have as much right to be regarded as citizens as the indigenous population.

Importance of Imperial Preference

Government should only make single market arrangements which will not prevent more people from going into the Empire. As it is, the members of the British Empire Producers' Organisation, and they could increase their production to the limit, but they give them some help in the creation of guaranteed markets for the future. It is here that Imperial Preference played such an important part in the past and must play an important part in the future.

"Under the borrowing powers of the Bill I am certain that we are not going to be able to develop Southern Africa in the time at our disposal—five years—and obtain all equipment entirely from this country—the bulldozers,

rails, rolling-stock and hydro-electric equipment. We shall have to get assistance from outside, and I believe it is quite possible to obtain a lot from North America. South Africa may provide some assistance, but I would ask if it is the intention of the Government that the corporations shall have the right to sell kinds in, say, Canada, to pay for equipment which they are going to use in Africa? That would be of great help in developing these territories, and would bring considerable support, particularly in Canada, if the corporations were able to float debenture stock in Canada to provide the capital equipment.

The Chancellor of the Exchequer has said that on our ability to develop Africa depends the survival of Britain. Those are staggering words, but the country which we have encouraged is one in which there is a sense of great possibilities in overcoming to a large extent, though not completely, many of our economic problems and, above all, out of the shortage of primary products in Britain. I therefore express the good will of the British to all those in various parts of the world who will be active in making it work."

Editorial comment appears under "Matters of Moment."

Contribution of the Film to Empire Development

Breaking Down Mass Ignorance in the Colonies

THE FILM IN COLONIAL DEVELOPMENT was the subject of a conference sponsored by the British Film Institute and held recently at the Royal Empire Society's Headquarters in London.

THE SECRETARY OF STATE FOR THE COLONIES, MR. GREGOR JONES, M.P., said that today there was increasing awareness that backward areas were a source of potential conflict between nations, and a higher sense of our Colonial responsibility for the creation of nationhood, the establishment of free political institutions, and the perpetuation of that sense of values which is rooted in Western Europe.

It was important that as education and social services developed we should obtain full co-operation, goodwill and understanding of the Colonial peoples. When there was so much traducing of British institutions and motives there was a great chance to develop in the Colonies a correct appreciation of good moral and ethical principles.

Need for More Knowledge

The cinema was an important means of breaking down mass ignorance and illiteracy and of creating sound social institutions, and the Colonial film unit was evolving special techniques to ensure the success of a film and an unprejudiced audience. Its purpose was to take to the Colonies films from other countries and to make films of African life to inform audiences. Some Colonies also had their own film units. But there was still very little knowledge of the types of films best suited to educational work in backward areas, and he would welcome an inquiry into the place of the commercial film and the results of the documentary film in such areas.

Colonial films needed to be introduced to British audiences. There were two worlds, for instance, and at least brought home to audiences in this country the difficulty of eradicating sleeping sickness in the tropics and of moving whole populations to save them. If the Colonial Film Unit, or other could be established, it would be an important factor in creating an understanding of Colonial peoples, an individual sense of values, and in training them to play a part in their own development. The Colonial Office would study the conclusions of the conference with the greatest care.

The moral aspect of films in Africa was the keynote of the address by MR. COOK, B.A., secretary of the Edinburgh House Bureau for Visual Aids.

While there were areas where Japs were now hearing of the cinema for the first time, in some places Africans already were using cinema as nucleus for

times. Weak Africans in the towns had become Hollywood "fans," and their emphasis was upon quantity rather than quality.

In certain territories much thought had been given to the subject of film censorship, and the approach had been enlightened. This was particularly true in Uganda, where the Board of Censors included Europeans, Indians, and two Africans. There only one type of film could be shown—one which was regarded as suitable for all sections of the community.

Censorship had represented at best a negative approach, and many steps were thoroughly pernicious. A member of the censorship board in Northern Rhodesia had written: "So we sit through a dreary afternoon of feature films, comedies, shorts, cartoon musicals, simply certifying the films as suitable. If we certified only those films which we thought were fit for Africans we should cut out many."

Potential African criminals were obtaining ideas from crime films. One group of young Africans questioned by the police about a house-breaking offence and the use of gunpowder had explained that they had copied men seen on screen, and their gun and cheap sentiment were giving the African a false view of European civilization. His reaction was: "The European does not work all day, why should I?"

Whilst the British made film was appreciated as being of better colour quality than the American, it was unfortunately often not understood by the local audiences, for appreciation of the film as a form of art for sophisticated audiences demanded a basic cultural level which the primitive African had not yet attained.

Many millions of the state money in countries up to 10,000,000 in population damage was done by the films outside cinemas, post offices and "stills" based on sex appealing to the ignorant masses. People had been converted to raise the spiritual and cultural level of primitive people, but much of this work was turned by the wrong ideas instilled by films. The cinemas could have immeasurable influence in the right hands, and if backward people were instructed as entertained.

"Raw Stock" Scheme

MR. GEORGE PEARSON, speaking for the Colonial Film Unit, said their task was to elevate minds. The school must go to the Native, and in that task the travelling cinema played a great part.

Experimental work had begun in 1939, and now the Colonial Film Unit had staff of 31, whom 10 were working in East and West Africa. In 1941 they had inaugurated the "raw stock scheme" under which Europeans in the Colonies who knew something of film-making had been given equipment; their products were processed in Britain by the Unit, which had distributed 110,000 feet of raw through the scheme.

A film unit had been sent to Kenya and Uganda last year, and another had recently gone to Tanganyika and Zanzibar.

The work of the Colonial Film Unit was most difficult, making films for children; they were making films for adults who frequently could not read or write, and had to contend with folklore, legend and native superstitions. All the conventional methods of shot editing as commonly used in motion pictures were quite unsatisfactory with African audiences. Diagrams

Waddington said the experiment embodied in this Bill will prove a success which redounds to the credit and prosperity of this country and the Colonial Empire. I accept entirely the assertion made by the Secretary of State that he approached this Bill and the operations under it in no selfish desire merely to benefit the people of this country, but to bring benefits to the Colonial Empire, to this country and why not to those countries—and to the world at large? Whatever differences we may have had in the past, and no doubt will have in the future, the hon. gentleman has gained a reputation for sympathy with the Colonies and Colonial objectives that make an assertion of that kind of unusual of particular value.

Corporates of Development

These new corporations are a valuable method by which we assert, with the Colonial Welfare and Development Act and with private enterprise, a third method of arriving at the economic development of Colonial territories. It seems to me that the Government are determined that all three of these partners shall be allowed to play their proper and particular part, and that there is room inside the Colonial territories for all three. I would think that there will be found particular things at which one or one of the three will prove to be the better.

Certain kinds of development are clearly best done by Colonial Governments themselves—development of communications, water supplies, and things of that kind. Certain larger-scale operations are probably best done by the corporations; and under present conditions it would not have been possible for private enterprise to tackle the groundnut scheme. On the other hand, there are a number of cases where private enterprise will be found the best method of stimulating the economy of those territories. We must now have a proper co-operation between these three partners.

I thought the rt. hon. gentleman wise to warn people about extravagant hopes of quick results from these corporations. I am not depressed by the idea that development will not be too rapid or too sudden. The hon. gentleman will not fall into the error of thinking that nothing is any good unless it can make a big splash and catch the public eye. Colonial economies unless it is big enough, cover enough, and is so called progressive enough to hit the headlines in the newspapers.

The most immediate and lasting benefit from these schemes and these corporations will be to tiny, small ways in which we can develop and stimulate already existing or nascent industries and agricultures. I am sure that is his intention, and on the composition of the board we can rest assured that they will not be people looking only for dramatic but possibly extremely expensive schemes, but people looking for every opportunity to develop, even in the smallest way. So we on this side of the House wish both corporations the greatest success in their work, believing that from their success will come great advantage to the country and above all to the Colonial Empire.

Minister of Food

THE MINISTER OF FOOD, MR. STRACHEY, said that Mr. Frank Stockdale and Mr. Rosa would be members of both the Colonial Development Corporation and the Overseas Food Corporation.

There would now be three instruments of overseas development—the Colonial Government acting directly, private enterprise, and Government corporations.

We do not want to score points. Our national position is to leave no warrant for indulgence in our particular opinions on the methods of overseas development. By one means or another, by hook or by crook, the development of primary production of all sorts in the dependent areas in the Commonwealth, as well as generally throughout the world, in far more abundant quantities than exist to-day, is a life-and-death matter for the economy of this country.

MR. BALDWIN hoped that an industrial development scheme for Africa would soon be placed before Parliament. He added:

"Too much has been expected from the groundnut scheme. We are rather putting the cart before the horse. I should have liked to see development on two entirely different lines before the scheme was started—development of transport and of labour. In the African development schemes money would be better employed on railway and road construction than on irrigation. Private enterprise can deal with that much better than a public corporation."

"Labour is one problem that has never been properly faced by the originators of this scheme. It is thought that the African is a source of cheap labour. I have found the Native some of the dearest labour I have ever seen! We must give the Native primitive education, better food, and more incentives. If production is increased before labour supplies in the right position the difficulties will be accentuated."

The sisal industry lost over fifteen tons of sisal last year, because the necessary labour was not available. The sisal was computed at £1,000,000, not 1,000,000 tons. Ed. M. They are drawing labour from as far away as 1,000 miles. This does not sound a practical proposition. Steer should take men to get the native labourers out of their reserves and to the job. They should have good villages with their own schools and hospitals, and they should be fed better and given a higher standard of living so that they are able to do the work. Before any steps to increase production are taken these difficulties must be made.

In the development schemes above, proposed there should be provision for co-operation between the Minister of Defence and the Colonial Secretary. The development of transport systems in Africa can be of immense importance not only to food production but to industrial developments and from the military point of view. Development should be undertaken from the long-term, not the short-term, point of view.

The Ministry of Food is interested in the scheme because when the foods of the world enter the competitive market again first place will be given here to the home producer, second to the Empire producing the rest of the world coming in at the tail end. For instance, the Minister of Food mentioned the development of the cattle industry and the sisal industry of Austria. I do not agree that he should produce that beef, but he should give the edge to the pastoralist that when he has produced food he should find a market for it in this country.

SIR WALTER SMITH wanted more expert knowledge of tropical agriculture on the boards of the two corporations.

Native Co-operation Essential

COLONEL WHEATLEY stressed the long-range nature of the native economy.

If we can select good people to carry on the educational, labour, and medical work of the corporations, we shall be on the right lines and, in time—a long time ahead—we shall get full co-operation of the Natives. But until we can do that, I ought to be warned not to think that we shall not need to worry day by day about food. Particularly in regard to the groundnut scheme we shall have drawbacks, and there is going to be a wonderfully quick production of oils and other things as required.

DR. SEGAL pleaded for the elimination of all party considerations and party slogans and said:

It is quite premature for us in this side of the House to assert that the foundations for a brave new world of Bush-Socialism have now been well and truly laid in Central Africa. We shall have to wait a long time yet before 'Let Us Face the Future' has been translated into the language of the drums and the beat of the tom-tom resounds to all its rhythmic cadence.

I hope, above all, that no one in any of our Colonies will have in his mind the least vestige of suspicion that anyone connected with the machinery which this Bill creates will be able to lend himself in the slightest degree to the exploitation of any single Native in any of our Colonial territories.

Both sections of the House have combined to give this Bill their blessing, and I hope that it may in the not-too-distant future open up a great new era for a happier and fuller life to many of our colonial populations who to-day are groping in the darkness of economic, cultural and political uncertainty.

End of the Single Family Farm

MR. DODDS-BARKER said that he was one of a group of members on both sides of the House who were thinking but tenaciously of practical development in East and Central Africa. The Government should build first harbours, railways, roads, and water (whether hydro-electric for irrigation or for domestic purposes), and the provision of cement and fertilisers, which would be the basis upon which Africa could develop and raise her standard of living. These are the basics which were needed through these Government corporations.

He continued:

Enterprise has been tremendous in Africa already. Encouragement should be given to enterprise of all sorts, whether private or public. Government, individual or co-operative. Mr. Frank Stockdale in his report was right to say probably the single family farm is going in Africa to be replaced by the co-operative system; and there are tremendous numbers of people, whether African peasants, co-operative workers or settlers, who can produce a tremendous amount to assist us in the next few years.

London carefully bricked with your views on future plans for marketing your surplus production, in particular meatstuffs. Should we advocate, for example, some extension of the markets and prices as guaranteed under the Agriculture Act of 1947?

Great Era of Development

On the interest which you take in the developments, political and economic, which are bound to take place, will depend the success or otherwise of future progress in Africa. If a clear policy is now determined at the top between Government and non-officials of all races and creeds, then we can each get on with our part of the task. We are on the threshold of another great era of development, which will benefit all in Africa as

much as ourselves in the United Kingdom. Our development will probably be slower and less progressive than some believe, but I am convinced that it will be very considerable.

A year ago, after a meeting of the Parliamentary Select Committee, a distinguished scientist said to me that "on our ability to develop East and West Africa depends our ability to keep 50,000,000 people in Britain." In a public statement six weeks ago Sir Stafford Cripps told the African Governors that our ability to develop Africa within the time limit depends on the survival of Britain. The political and economic task that faces us is therefore one of the greatest significance to you and to us.

Overseas Resources Bill Passed by Parliament

Colonial Development and Overseas Food Corporations Established.

THE OVERSEAS RESOURCES BILL, establishing the Colonial Development Corporation and the Overseas Food Corporation, has passed its third reading in the House of Commons.

The SECRETARY OF STATE FOR THE COLONIES, Mr. A. Creech Jones, said (in part):

"This Bill is as much designed for the purpose of meeting the needs of the world as for meeting the special needs of the Colonial peoples. By that I mean that it is imperative to-day, if the Colonial peoples are to go forward and attain that standard of living, in reaching a higher stage of social development, and in enjoying the social services they demand, that their economic resources should be fully developed."

"This Bill will give some assistance in making Colonial economies more stable, in encouraging enterprise, and in increasing the number of economic activities possible in the territories. At the same time, it will minister to the needs of Europe, and of our own country, in particular."

I have no apprehension that, because the Bill provides for an Overseas Food Corporation, we shall be diverted as a nation from our main purpose of building up Colonial standards. The Secretary of State for the Colonies, answerable to Parliament, will fulfil carry a general responsibility in regard to the whole of the economic development of the territories under his immediate control. It will be his duty to see that, whether it is the Colonial Development Corporation or the Overseas Food Corporation which is functioning in these territories, reasonable and proper standards are maintained, and that these activities fit in with the general economic plan of development of the territory concerned. It will be his special responsibility to see that the corporation functions only with the understanding and consent of the local Government and of the people involved."

Ten-Year Programmes

This Bill marks a further big step forward in our conception of Colonial development. The Colonial Development and Welfare Acts of 1940 and 1943 were of great importance because of the planning which was involved under them in respect to social and economic development. Under the programmes for the next 10 years which have been prepared a tremendous amount of economic development becomes possible. We are able by grants from Imperial funds to push on with road construction, railways, water conservation, soil conservation, irrigation works, power stations, and all those other essential facilities on which the rest of the economic activities depend.

"We now have the opportunity of carrying economic development a stage beyond what we have so far as we are able to encourage enterprise, of both a private and public character, in order to increase the economic health and to explore the economic resources for the general development of these territories."

"So far in Colonial development only a comparatively small sum of money has been invested for the purposes of exploiting the territorial resources. The capital has gone to some extent on mineral development, and chiefly on railway development. In regard to the normally production activities the amount of capital expenditure has been comparatively small. Much of a good deal of investment was switched away from Africa and our other Colonies for use in the American

Continent, to that extent we have not given to the development of these territories the attention which we should have given in days gone by."

There are enormous difficulties in the way of development. We ought not to delude ourselves the results can never quickly cast arid areas, great backwaters with tsetse fly, problems of irrigation and water supply, large areas where there is a dearth of labour—these are enormous problems which have to be overcome.

"By the creation of these two corporations enormous assistance can be given to enterprise. By collaboration with existing enterprises, by the creation of new enterprises of a public character by association with peasant production and with co-operative groups, and in a thousand ways, enterprise which previously was impossible can now go forward for the betterment of those territories."

Colonial Development Board

I think it would probably be of interest to the House if I stated the composition of the Colonial Development Corporation. The appointments are, of course, in anticipation of the passing of this measure. We have invited Lord Trefgarne to be chairman of the corporation; his salary will be £5,000 a year. The deputy chairman will be Sir Frank Stockdale, whose reputation is widely recognised not only here but in the Colonial Empire generally. As a full-time deputy chairman his salary will be £3,000 a year.

The Board will be a part-time board, and the remuneration of each of the members will be £2,000 a year. The persons who have been invited to serve and have accepted are as follows: Mr. Tansley, formerly marketing director of the West African Produce Control Board; Sir Miles Thomas, chairman of the Development and Co-ordinating Committee of Southern Rhodesia, and until recently vice-chairman of Morris Motors Ltd.; Mr. H. J. Hume, managing and managing director of Chamberhouse Investments Ltd.; Mr. H. M. Gibson, who is a director of the Cooperative Wholesale Society; Sir Charles Dugay, director of the National Physical Laboratory; Mr. R. S. Brook, a director of the Bank of England, Mr. J. Ross, a banker who saw war service in the Treasury and the Colonial Office and was on the South African Groundnut Commission. One or two vacancies have not yet been filled, but we have tried to secure a widely experienced board, and I think it will satisfy the test which is laid down in the Bill.

"We shall drive ahead with our developmental tasks, and I am quite certain not only will our own country profit from the working of the Bill, but also enormous social and economic benefits will come to the Colonial people themselves."

MR. OLIVER STANLEY said that the best arrangement was to have a whole-time chairman and deputy chairman, part-time people on the board with specialist knowledge, and then to have functional direction in the hands of an executive under the chairman.

Two find in this list of names a number of highly respected people of exactly the type of experience which would seem desirable for a chairman of this kind. Sir Frank Stockdale's services have been incalculable, not only in the field of agriculture because he also rendered extremely valuable service in a wider sphere in the West Indies development administration. I had experience at the Colonial Office during the days of the great service Mr. Tansley did, and I can think of no one likely to give sounder advice and richer knowledge. The Foreign gentleman said that there was still some gap. A cursory glance at the list suggests that it might be wise to strengthen the side of actual Colonial experience.

Major Problems of East and Central Africa

Broadcast Talk by Mr. Douglas Dodds-Parker, M.P.

AM VERY GLAD to follow Horatio Ross in this Opinion from Westminster. Sir. The Colonial Office suffered a loss when he ceased to be Under-Secretary, but their loss we intend shall be East Africa's gain, and I am glad that he has joined the joint East and Central African Board to which he will be a most powerful adjutant.

I feel a little diffident at this somewhat prominent position I seem to be taking in the affairs of Eastern and Southern Africa after so short an acquaintance with you; but I am so conscious of the importance of fully considering and rapid action in your area during 1948 that I am venturing once again to stick out my neck and give you my ideas. I like to think that at the other end of a large bit of air there are some of the many most friendly and hospitable people who were so kind to me during my nine weeks' visit to Africa last year. To them in particular I am addressing my remarks, in the hope that they will find in them something constructive and something which will stimulate all of you to think as hard as we are, trying to in London about the part which Africa can play in the reconstruction of what is being called the Third British Empire.

Long-Term Effect of Fiscal Policies

While we in the Mother of Parliaments still have final responsibility for your affairs, most of us realize our own limitations; as politicians our occupations too much with the next general election rather than long-term policies, and constitutional development of self-government within the Empire, important though it is, has to do with the immediate problems of land tenure, taxation, trade controls, development, and so on. What is to be the long-term effect of certain land acquisition Bills, if carried? What is to be the long-term policy? What is to be the long-term effect of the recommendations of the Pleyman and Butter reports on fiscal and tax policy? What developments of trades union organizations should we envisage now to ensure that they get off on the right foot rather than be delayed and forced on us through inertia?

There are some of the vital problems which I think should be considered at the conference of non-officials in London later this year. If properly approached by all concerned, this conference will prove one of the turning-points of post-war development in Africa. I am confident that the politicians and the Government's servants here and overseas are prepared to approach ideas for development in the most sympathetic manner. I suggest to the non-official members who will come to London that this is the great opportunity to put forward their plans—which must be based on the well-being of all those of whatever origin who now make their homes in Africa.

The High Commission has at last been set up in East Africa. By the time the conference is held we believe that anything that will have been or grown. Similarly, the Central African Council will have had a further year of development, and the next step for further integration between the two areas will have become clearer. Many of us in London are thinking very hard about the future political connexion between all the British, and even some of the non-British, territories in Eastern and Southern Africa. We believe that economic developments will lead to closer political union, and it is never too early to think of this with the ultimate aim in view of a region within the United Nations.

Being a somewhat abbreviated report of a talk in last Sunday's "Calling East Africa" programme of the B.B.C.

The Overseas Resources Development Bill passed third reading in the House of Commons on the first day after the recess. The Opposition felt that the Colonial Secretary, through the Colonial Development Corporation, should be responsible for all developments within the territories under the Colonial Office; whereas the Government felt that the Colonial Secretary should be free to defer them, unless fit, to the Overseas Food Corporation, which comes under the Minister of Food.

Production by Private Enterprise

The real scope of the Bill was hardly touched on in the various debates. The Colonial Secretary opened up a bit in his speech on the third reading. The Bill is in fact a piece of machinery for making available to the British territories overseas £150,000,000 for all types of development—that is, for industry as well as for production of primary products. My opinion is that the function of the Government is primarily to create the conditions in which the individual can live his own life and get on with his job provided he does not do this to the detriment of the community as a whole. To this end therefore I believe that the Colonial Development Corporation should concentrate on certain basic projects, railways, roads, water supply, irrigation and domestic services, hydro-electric power and cement and fertilizers. If this is done production can and will increase through the existing agencies, whether individuals, or private companies, and through individuals, farmers, whether European, African, or Asiatic.

Companies Could Handle Large Schemes

In any such scheme as the groundnut project, where the element of speed and experiment will mean certain inevitable losses, it would probably have been impossible to find a private company who would have taken on the scheme on agreed terms; but this brings me to the one point on which I disagree with Mr. Ivor Thomas in his broadcast last month. I am certain that he is wrong when he says that "henceforth, only public enterprise backed by all the credit of the State, can hope to find the means to finance the big developments which are now necessary." I believe that given a proper basis of agreement—such as was given to the Sudan Plantations Syndicate some quarter of a century ago there would be no difficulty in finding companies prepared to take on the development of primary products.

Of course, if taxation is going to be as high as some people suggest, and if priority for Government schemes is going to override the efforts of private companies, then the private company has not a reasonable chance against such unfair competition. But, allowing for this factor, I have found little sign that the spirit of enterprise, imagination and initiative has disappeared, which in the 19th Century brought all these lands in Africa under British suzerainty.

Thursday night we are to discuss the Geneva Agreement. The issue which confronts the U.K. is to find open markets for its manufactured goods, while you require assured markets for your primary products. Economists seem to agree that the economic strength of the U.S.A. and Russia lies in producing virtually all the food and raw materials of a modern State within their own economic frontiers, which sustain also some 150,000,000 consumers. The British Commonwealth and Empire can and must aim at being such another group. I regard Imperial Preference basically as a tax towards free trade, and believe that it is vital that we do not sell out on the principle. Meantime, I ask you to send your representatives to

quite other habit of mind and vision. Not even two wars and the continuing generosity of the Overseas Empire have sufficed to teach our politicians the obvious—that the first and overriding consideration should always be for the British family of nations and their well-being. If increasing colonial commitments drive home the lesson, they will yield a magnificent indirect return.

THREE IS TO BE no immediate and table discussion in London of the proposals of the non-official members of the Legislative Council of Northern Rhodesia for a modified form of responsible government. On this page last week we expressed the hope

that the Secretary of State would invite representatives of the non-official members to do to this country at once and ask Sir Gilbert Rennie to postpone his departure in order that matters might be considered here before the Governor designate left for Lusaka. Mr. Speechley Jones has decided against that course, and Sir Gilbert Rennie will therefore sail to-day to take up his appointment, which everyone will wish him all possible happiness and success. We still believe that it would have been better to examine without delay in London matters on which the non-official leaders of Northern Rhodesia feel so strongly, and, so far as we can judge, that view is endorsed by those in this country outside the Colonial Office who are closely concerned with Northern Rhodesia. Not one opinion to the contrary has reached us since our leading article appeared, and we have received expressions of complete agreement from a number of influential sources. However that may be, the Minister has rejected that approach to the problem, which would evidently have been welcomed by Sir Stewart Gore-Browne and Mr. Welensky, and the new Governor will therefore be faced from the moment of his arrival in territory of which he has no previous experience with a difficult and delicate situation.

The non-official members of the Legislature we are no doubt show understanding and forbearance, especially when they discover, as they quickly will, that Sir Gilbert Rennie is a man of considerable sympathy with the aspirations of communities.

New Governor's General Outlook.—With a strong sense of local patriotism for a greater share in Government. That sympathy has been amply demonstrated in recent years in Kenya, which, starting with the firm but quite mis-

taken idea that he was under instructions to weaken the powers of the non-officials on the Standing Finance Committee, has made appreciate his qualities of open-mindedness, frankness, sincerity, and application. There he provided himself one of those senior officials who exerted progressive increase in responsibility for non-officials, and we can think of no reason for a different attitude on his part in Northern Rhodesia. On the contrary, we are confident that he will support the general principle of the devolution of growing responsibility to non-officials—which does not necessarily mean that he will approve the present plan of the non-official members (which document had still not reached the Secretary of State early this week). If it bears a close resemblance to the constitutional pattern evolved in Kenya since 1939, it would be likely to engage the special interest of Sir Gilbert, for he has whole-heartedly approved that development, to which he has himself contributed considerably personally, as he bore the chief burden of preparing Kenya's Ten Year Development Plan and setting it in train. He carries to his new territory experience which should be very valuable at this particular moment.

The Secretary of State may also be expected to sympathise in principle, though not necessarily in detail, with the ambitions of the public leaders of a Protectorate which is destined for greater

Plea for Early and Decided Progress Publication.—than would have seemed possible not long ago for the present policy of the Colonial Office to promote rather than to retard the assumption of new political power by Colonial populations. It is significant that the non-official members of the Legislature in Northern Rhodesia have never before shown so united a front. Missionaries and other members representing African interests, farmers, business men, professional men, and trade unionists are at one in demanding a form of responsible government appropriate to the present stage of the country's advancement, and providing for adequate African representation and the abandonment of government by bureaucracy. However enlightened and well meaning, their unity divides broad and liberal views on the drafting of the plan, on which they must be anxious to know the opinions of their constituents. It is therefore to be hoped that it will be published in full as soon as it has reached the Secretary of State.
