

## School of Pharmacy Dean's address to first years

School of Pharmacy Dean Prof. Guantai Anastasia advised newly admitted students to the school for the 2016/2017 academic year to purely concentrate on their studies in order to achieve their career goals.

Speaking during the orientation of the students at Millennium Hall 2, Chiromo Campus, Prof. Guantai told the students to use their time properly, keep right attitudes and behavior and avoid habits that might distract them from their studies.

She warned the students against cheating in exams, saying that will not reflect what they gained during their studies.

According to Prof. Guantai, the school boasts of prominent people in Kenya, including Nairobi Governor Dr. Evans Kidero, and that the students should continue to lift the good name of the school.

The students were also addressed by CHS Principal Prof. Isaac Kibwage, Deans of Schools in the College of Health Sciences, Chairmen of Departments, administrators and student leaders.
