

**Data Science for Development Training to be held from 12-13th October 2015**

○ **Data Science for Development Advert**

The Africa Center for Technology studies in conjunction with University of Nairobi's School of Computing and Informatics will hold a training on how to extract, manipulate and implement strategy on big data from the 12-13th October 2015. The theme of the training is **Harnessing the use of Big Data for Socio-economic Development in Africa.**

The course outline will include data science ecosystem and case studies in Africa as well as emerging research and science issues. The course aims to give an overview of data science and how it can be used to provide solutions in organizations. It targets managers, programmers, architects and administrators.

The course convenors are from Makerere University and University of Nairobi's Dr. Christopher Chepken.

**To register**, send a short curriculum vitae by **October 5, 2015** to Dr. Raymond Mugwanya ([r.mugwanya@acts-net.org](mailto:r.mugwanya@acts-net.org)) and a copy to Dr. Christopher Chepken, ([chepken@gmail.com](mailto:chepken@gmail.com))

The training will be held at the College of Biological and Physical Sciences.
