

Staff members participate in training & installation of e-capacities workshop

Prof Geoffrey Kironchi (Left) and other CAVS staff members participating in e-Capacity training at KARLO.

College staff members, who are also web-champions, participated in training and installation of e-Capacities workshop at Kenya Agricultural and Livestock Research Organisation (KARLO). E-capacities is an online resource mobilization platform for workplaces, job providers, graduates and job seekers to interact.

During the training, members were equipped with skills on data entry and handling e-capacity website tools for job providers, workplaces, graduates and program managers sections as part of its design and operational features.

E-capacity platform enables individuals, who have their professional information entered, to connect with other professionals, find employers, advertise a job and advertise courses. Further to that, it makes it easy to; track alumni, assess progress and success of students during their study, understand the impact of study programs and their relevance to labor market, enhance teaching and curriculum information and also promote internal strategic development management and quality assurance.

The training was organized and facilitated by Forum for Agriculture Research in Africa (FARA).
